

<u>CONTENTS</u>	<u>Page :</u>
<u>PREFACE</u>	1 - 11
<u>SYMBOLS</u>	12 - 13
<u>CHAPTER - I</u>	14 - 23
<p>A new Approach to the Non-linear Analysis of Moderately Thick Elastic Plates.</p> <p>Abstract, Formulation of the differential equations.</p>	
<u>CHAPTER - II</u>	24 - 39
<p>Non-linear Dynamic Response of Moderately Thick Plates placed on Elastic Foundation.</p> <p>Abstract, Vibrations of Square plates, Rounded cornered square plates and Circular Plates.</p> <p>A useful observation on Berger's equation.</p>	
<u>CHAPTER - III</u>	40 - 79
<p>Influences of large Amplitudes, Transverse Shear Deformation and Rotatory Inertia on Free Lateral Vibrations of Transversely Iso- tropic plates.</p> <p>- A new Approach.</p> <p>Abstract, <i>Non-linear analysis of square.</i> Elliptical and Isosceles right angled triangular plates.</p> <p>Vibrations of Clamped Circular Plates, Vibrations of Thick Polygonal Plates.</p>
