1. INTRODUCTION	1-4
2. REVIEW OF LITERATURE	5-35
3. MATERIALS AND METHODS	36-57
3.1 Plant material	36
3.1.1 Source of seeds	36
3.1.2 Growth of plants	36
3.2 Fungal cultures	36
3.2.1 Source of culture	36
3.2.2 Completion of Koch's Postulate	36
3.2.3 Maintenance of stock cultures	37
3.3 Test chemicals	37
3.3.1 Metal salts	37
3.3.2 Growth regulators	37
3.3.3 Other compounds	37
3.4 Process of chemical treatment	38
3.5 Inoculation technique	38
3.5.1. Sand maize meal culture	38
3.5.2. Water culture	38
3.6 Disease assessment	39
3.7 Fungitoxicity assay	39
3.8 Extraction of enzymes	39
3.8.1 Pectolytic enzymes	39
3.8.2 Polyphenoloxidase	39
3.8.3 Peroxidase	39
3.8.4 Phenylalanine ammonia lyase	39
3.9 Assay of enzyme activity	39
3.9.1 Pectolytic enzymes	39
3.9.2 Polyphenoloxidase	41
3.9.3 Peroxidase	41
3.9.4 Phenylalanine ammonia lyase	42
3.10 Total phenol	42
3.10.1 Extraction of phenol	42
3.10.2 Estimation	42
3.11 Ortho-dihydroxyphenol	43
3.11.1 Extraction	43
3.11.2 Estimation	43
3.12 Soluble protein	43
3.12.1 Extraction	43
3.12.2 Estimation	44
3.13 Calcium and magnesium	44
3.13.1 Extraction and estimation	44
3.13.2 Estimation	44

3.14 Lignin	45
3.14.1 Extraction	45
3.14.2 Estimation	45
3.15 Extraction and separation of glyceollin	45
3.16 UV-spectrophotometry and quantification of glyceollin	46
3.17 Petridish bioassay of phytoalexin	46
3.18 Preparation of antigen	47
3.18.1 Root antigen	47
3.18.2 Mycelial antigen	47
3.19 SDS-polyacralamyde gel electrophoresis of total soluble protein	48
3.19.1 Preparation of slab Gel	48
3.19.1.1 Stock solutions	48
3.19.1.2 Slab gel preparation	49
3.19.2 Sample preparation	50
3.19.3 Electrophoresis	50
3.19.4 Fixing and staining	51
3.20 Antisera production	51
3.20.1 Rabbits and their maintenance	51
3.20.2 Immunization	51
3.20.3 Bleeding	52
3.21 Purification of IgG	52
3.21.1 Precipitation	52
3.21.2 Column preparation	52
3.21.3 Fraction collection	53
3.22 Immunodiffusion test	53
3.22.1 Preparation of agar slides	53
3.22.2 Diffusion	53
3.22.3 Washing, staining and drying of slides	53
3.23 Immunolectrophoresis	54
3.23.1 Preparation of agarose slides	54
3.23.2 Electrophoresis	54
3.23.3 Diffusion	54
3.23.4 Washing, drying and staining of slides	55
3.24. Enzyme linked immunosorbent assay (ELISA)	55
3.25. Immunofluorescence	57

4. EXPERIMENTAL 58-133

4.1 Pathogenicity test of <i>S.rolfsii</i> on different soybean varieties	58
4.2 Comparison of glyceollin contents of soybean varieties after inoculation with <i>S.rolfsii</i>	65
4.3 Fungitoxicity assay of various chemicals on <i>S.rolfsii</i> and their effects on disease alteration of reaction of soybean plants	68
4.3.1. Fungitoxicity of test chemicals	68
4.3.2. Seed treatment with chemicals and their effect on disease development	69

4.4	Biochemical changes associated with induction of resistance in soybean plants	79
4.4.1.	Total phenol ¹⁸⁰	
4.4.2.	Orthodihydroxyphenol	85
4.4.3.	Polyphenol oxidase	89
4.4.4.	Peroxidase	93
4.4.5.	Pectolytic enzyme	97
4.4.6.	Oxalic acid	97
4.4.7.	Calcium and magnesium	99
4.4.8.	Phenylalanine ammonia lyase	103
4.5	Seed treatment with chemicals and their effect on lignification in soybean plants	107
4.6	Accumulation of glyceollin in soybean plants before and after alteration of disease reaction by selected chemicals	109
4.7	Analysis of host - parasite protein by SDS-PAGE	111
4.8	Detection of cross-reactive antigen (CRA) between <i>S.rolfsii</i> and soybean varieties	114
4.8.1.	Immunodiffusion	114
4.8.2.	Immuno-electrophoresis	116
4.8.3.	Direct antigen coated enzyme linked immunosorbent assay (DAC-ELISA)	118
4.8.3.1.	Optimization of ELISA	118
4.8.3.1.1.	Enzyme dilution	118
4.8.3.1.2.	Antiserum dilution	118
4.8.3.1.3.	Antigen dilution	119
4.8.3.2.	Comparison of ELISA reactivity among antigens of different soybean varieties against antiserum of <i>S.rolfsii</i>	119
4.9	Detection of <i>S.rolfsii</i> in artificially inoculated soybean root tissues by DAC-ELISA	124
4.10	Cellular location of CRA using immunofluorescence	124
4.10.1.	Soybean root	126
4.10.2.	Mycelia and Sclerotia	126
4.10	Serological changes associated with induction of resistance in soybean plants	126
5	DISCUSSION	134-147
6	SUMMARY	148-150
7	REFERENCES	151-180
