	<u>PAGE</u>
Preface ...	1 - xxii
Notations ...	xxiii - xxv

CHAPTER I

Linear and Non-linear Analysis of Circular and Rectangular Plates 1 - 28
---	--------------

Abstract, Differential equations, Vibrations of Circular Plates Supported at Several Points, Deflections of Heated Circular Plates Supported at Several Points, Large deflection of a Circular Plate under Symmetrical Load, Non-linear Analysis of a Rectangular Plate with sides Clamped and Supported under a Concentrated Load at the centre.

CHAPTER II

Some Linear and Non-linear Problems of Polygonal Plates 29 - 109
---	----------------

Abstract, Differential equations, Deflections of Orthotropic Polygonal Plates under Concentrated Load at the centre, Vibrations of Orthotropic Polygonal Plates, Vibrations of Polygonal Plates due to Sonic Boom, Note on Regular Polygonal Viscoelastic Plates of Simply Supported edges, Vibrations of Polygonal Plates due to Thermal Shock, Note on Thermal Deflection of Regular Polygonal Viscoelastic Plates, Non-linear Vibrations of Orthotropic Polygonal Plates Carrying Concentrated Mass.
