

# Table of Contents

INTRODUCTION.....	1-8
MATERIALS AND METHODS.....	9-28
Animals.....	9
Preparation of ethanolic leaf extract of <i>Eupatorium adenophorum</i> (EEA).....	9
Separation of immunocompetent cells.....	10
<i>Separation of Macrophages (Mφs)</i> .....	10
<i>Separation of B and T cells</i> .....	11
<i>In vitro</i> cell culture medium and viability assay.....	12
Measure of <i>in vitro</i> blastogenesis.....	12
Measure of DNA synthesis .....	12
Cell cycle analysis by FACS .....	13
Induction of Delayed type hypersensitivity reaction with 2,4-DNFB and application of EEA.....	14
Differential leukocyte count from inflammation site of DTH mice.....	15
Isolation of CD4 <sup>+</sup> T cells through Magnetic Assorted Cell Sorter(MACS).....	15
Estimation of serum TNF-α.....	17
Gene expression analysis.....	17
RNA isolation.....	17

<i>cDNA synthesis</i> .....	18
<i>Primer utilized and amplification schedule</i> .....	18
<b>Linear skin incision and topical EEA treatment</b> .....	19
<b>Induction of burn wound and EEA treatment</b> .....	19
<b>Tumor induction</b> .....	20
<i>Maintenance of ascitic tumor cell line by serial passage</i> .....	20
<i>Solid tumor induction</i> .....	21
<i>Effect of EEA on tumor growth</i> .....	21
<sup>51</sup> Cr- release assay (cytotoxicity assay).....	21
<b>Immunization with SRBC and EEA treatment</b> .....	22
<i>Count of B and T lymphocytes and macrophages after primary and secondary immunization</i> .....	23
<i>Plaque formation cell assay (PFC)</i> .....	23
<b>Immunoglobulin G (IgG) estimation by ELISA</b> .....	24
<b>Biochemical Estimation of Free Radical</b> .....	25
<i>Superoxide Scavenging Assay</i> .....	25
<i>Hydroxyl radical scavenging assay</i> .....	25
<i>Lipid Peroxidation Assay</i> .....	26
<i>Nitric Oxide Synthase (NOS) Activity</i> .....	27
<b>Isolation and characterization of the different fractions of EEA</b> .....	28
<b>Statistical Analysis</b> .....	28
<b>RESULTS</b> .....	29-62
<b>Effect of ethanolic leaf extract of <i>Eupatorium adenophorum</i> (EEA) on Hematological parameters</b> .....	29
<i>Effect on percentage of haemoglobin</i> .....	29

<b>Effect on RBC count.....</b>	<b>29</b>
<b>Effect on WBC count.....</b>	<b>30</b>
<b>Effect of EEA on viability of lymphocytes <i>in vitro</i>.....</b>	<b>31</b>
<b>In vitro blastogenic transformation of T and B cells in presence of EEA.....</b>	<b>31</b>
<b>T cells.....</b>	<b>31</b>
<b>B cells.....</b>	<b>32</b>
<b>Measure of DNA synthesis.....</b>	<b>32</b>
<b>Cell cycle analysis of lymphocytes with EEA treatment.....</b>	<b>33</b>
<b>Effect of EEA on delayed type hypersensitive (DTH) reaction.....</b>	<b>36</b>
<b>    <i>With topical application</i>.....</b>	<b>36</b>
<b>    <i>With intravenous (i.v.) application</i>.....</b>	<b>39</b>
<b>Differential count of leukocytes at the inflammation site of the DTH mouse after EEA treatment.....</b>	<b>40</b>
<b>Estimation of the number of CD4<sup>+</sup> cells in DTH mice.....</b>	<b>41</b>
<b>Elevation of serum TNF-<math>\alpha</math> of DTH bearing mice upon EEA treatment.....</b>	<b>42</b>
<b>Expression of certain genes in splenic T cells of DTH mice with and without EEA treatment.....</b>	<b>42</b>
<b>Wound healing property of EEA.....</b>	<b>44</b>
<b>    <i>Effect of EEA on skin incision</i>.....</b>	<b>44</b>
<b>    <i>Effect of EEA on burnt skin</i>.....</b>	<b>45</b>
<b>Tumor regression assay.....</b>	<b>46</b>
<b>Cytotoxicity to tumor cells measured by <sup>51</sup>Cr release assay.....</b>	<b>47</b>
<b>Effect of EEA on expression of a few genes related to immune regulation.....</b>	<b>48</b>

Effect of EEA on primary and secondary immunization.....	50
<i>Increment in total lymphocyte and macrophage count with EEA treatment.....</i>	<i>50</i>
<i>PFC response during primary and secondary response.....</i>	<i>51</i>
<i>Amount of IgG in serum of mice after secondary immunization.....</i>	<i>52</i>
Anti-oxidant property of EEA.....	53
<i>Inhibition of superoxide generation.....</i>	<i>53</i>
<i>Inhibition of lipid peroxidation in murine lymphocytes.....</i>	<i>53</i>
<i>Inhibition of hydroxyl radical generation.....</i>	<i>54</i>
<i>Induction of NO<sup>•</sup> generation in murine lymphocytes by EEA.....</i>	<i>55</i>
Isolation and chemical characterization of the major fraction from total EEA extract.....	56
Effects of the major fraction of EEA isolated in chromatography on blastogenesis and generation of ROS.....	60
<i>Effect on blastoid transformation of T and B cells.....</i>	<i>60</i>
<i>Effect on inhibition of superoxide radical generation.....</i>	<i>60</i>
<i>Effect on inhibition of lipid peroxidation in mouse splenocytes.....</i>	<i>61</i>
<i>Effect on generation of hydroxyl radical.....</i>	<i>62</i>
<i>Effect on generation of NO<sup>•</sup> in mouse splenocytes.....</i>	<i>62</i>
DISCUSSION.....	63-77
SUMMARY.....	78
APPENDICES.....	82
REFERENCES.....	87
List of Publications.....	108
Corrigendum.....	109
