

Acknowledgement

First of all, I feel tremendously excited and fortunate enough while expressing my deepest sense of gratitude and inner sentiments to my research Guide, Dr. Mahendra Nath Roy, Professor of Chemistry, University of North Bengal, Darjeeling. I am highly thankful to him because he has not only guided me during the completion of research work but also motivated me, encouraged me and for his being dynamic and mesmerizing one. I am deeply indebted to him for his keen interest, strong motivation, constant encouragement and sympathetic consideration. His subtle guidance, advice and suggestions have always helped me to think positively and remain optimistic. The fruitful scientific discussions with him furthered my keen interest in Chemistry. He gave me the freedom to pursue an interesting research as well as trusted me often times more than myself and never let me go out of his office without a positive thought. His presence in my life is very significant at times and will remain so throughout my life. Without his loving care, scrupulous guidance and precious supervision, it would not have been possible for me to bring the present contour to this thesis. I shall ever remain grateful to him.

I also express my profound sense of gratitude to all of my respected faculty members and thanks to the non-teaching staff, Department of Chemistry, University of North Bengal for their helpful assistance and continued inspiration during the course of my research work.

I am grateful to the University authority for providing library and laboratory amenities, especially Computer Centre and University Scientific Instrumentation Centre (USIC) for helping me in my research.

My special thanks are also due to Sri Arijit Bhattacharjee, Dr. Riju Chanda, Miss Rajani Dewan of our research laboratory for their valuable assistance and cooperation during my research work.

It is impossible for me to express my gratitude to those authors of monographs, articles etc. from which I have collected information related to my research work. I can only hope that some measure of my gratitude is expressed by the references I have cited to their works.

Verily, thanks are also due to my colleagues as well as members of the Managing Committee of Parbati Sundari High School (H. S.), Kaliyaganj, Uttar Dinajpur for their cordial help and inspiration during my research period.

The inspiration and encouragement from my lovable family members deserve to be recorded here with the same intensity of gratitude

I would like to acknowledge my thanks to my beloved wife, Ankana, for her ceaseless inspiration, sincere help, constructive suggestion and whole-hearted cooperation in order to complete the work associated with my thesis and keeping me aloof from the family responsibilities.

Finally, I would also like to record my thankfulness to the Departmental Special Assistance Scheme under the University Grants Commission, New Delhi (No. F 540 / 27 / DRS / 2007, SAP-1) for financial and instrumental assistance in connection with my research work.
