

CONTENTS

<u>Chapter</u>	<u>Page Number</u>
INTRODUCTION	1
REVIEW OF LITERATURE	5
MATERIALS AND METHODS	15
Culture media	15
Reagents	21
Reference Strains	23
Experimental	24
Survey	24
Collection of samples	24
Microbial analysis	24
Characterisation of bacterial isolates	26
Characterisation of yeasts isolates	33
Pathogenic contaminants	35
Identification	37
Enzymatic activity	39
Protease activity assay	40
α -amylase activity assay	40
Enzymatic profiles	41
Antimicrobial activity	42
Biogenic amine screening	43
Degree of hydrophobicity	44
Proximate composition	45

RESULTS

Indigenous fish products	48
Microorganisms	58
Pathogenic contaminants	74
Enzymatic activity	77
Antimicrobial activity	82
Biogenic amine screening	84
Degree of hydrophobicity	84
Proximate composition	84

DISCUSSION

Indigenous fish products	89
Microorganisms	91
Pathogenic contaminants	95
Enzymatic activity	96
Antimicrobial activity	97
Biogenic amine screening	99
Degree of hydrophobicity	100
Proximate composition	101
Conclusion	102

SUMMARY	105
----------------	-----

BIBLIOGRAPHY	111
