

Acknowledgement

At the outset, I feel tremendously excited and fortunate enough while expressing my deepest sense of gratitude and inner sentiments to my research Guide, Dr. Mahendra Nath Roy, Reader in Physical Chemistry, University of North Bengal, Darjeeling. He deserves my thanks because he has not only guided me during the completion of research work but also motivated me, encouraged me and for his being dynamic and mesmerizing one. I am deeply indebted to him for his keen interest, strong motivation, constant encouragement and sympathetic consideration. His subtle guidance, advice and suggestions have always helped me to think positively and remain optimistic. The fruitful scientific discussions with him furthered my keen interest in Chemistry. He gave me the freedom to pursue an interesting research as well as trusted me often times more than myself and never let me go out of his office without a positive thought. His presence in my life is very significant at times and will remain so throughout my life. Without his loving care, scrupulous guidance and precious supervision, it would not have been possible for me to bring the present contour to this thesis. I shall ever remain grateful to him.

I also express my profound sense of gratitude to all of my respected faculty members and thanks to the non-teaching staff, Department of Chemistry, University of

North Bengal for their helpful assistance and continued inspiration during the course of my research work.

I am grateful to the University authority for providing library and laboratory amenities, especially Computer Centre and University Scientific Instrumentation Centre (USIC) for helping me in my research.

My special thanks are also due to Dr. Anuradha Sinha , Sri. Riju Chanda, Sri. Ashis Banerjee, Miss Lovely Sarkar, Miss Rajani Dewan and Sri. Palash Chakraborti of our research laboratory for their valuable assistance and cooperation during my research work.

It is impossible for me to express my gratitude to those authors of monographs, articles etc. from which I have collected information related to my research work. I can only hope that some measure of my gratitude is expressed by the references I have cited to their works.

I shall be failing in my duty if I do not express my deep sense of gratitude to my father for his constant encouragement and self-belief during my research work. It will remain incomplete if the name of my daughter Samraggi is not mentioned who has keen interest and curiosity in my research work.

I would like to acknowledge my thanks to my beloved husband, Shomenath for his ceaseless inspiration, sincere help, constructive suggestion and whole-

hearted cooperation in order to complete the work associated with my thesis and keeping me aloof from the family responsibilities.

Finally, I would also like to record my thankfulness to the Departmental Special Assistance Scheme under the University Grants Commission, New Delhi (No. F 540 / 27 / DRS / 2007, SAP-1) for financial and instrumental assistance in connection with my research work.
