<b>1. Introduction</b>	<b>1</b>
1.1. Overview of herbal drugs	1
1.2. Aims of present investigations	4
<b>2. Review of literature</b>	<b>5</b>
2.1. Overview of Darjeeling Himalaya	5
2.1.1. Geographic position	5
2.1.2. Population and demography	6
2.1.3. Vegetation	6
2.1.4. Knowledge of local medicinal plants	6
2.2. Overview of antioxidant biology and chemistry	6
2.2.1. Oxygen metabolism in aerobes	6
2.2.2. Flip side of oxygen metabolism	7
2.2.3. ROS	7
2.2.3.1. Generation of ROS in living systems	8

2.2.3.1.1. Endogenous generation	8	
2.2.3.1.2. Exogenous generation	8	
2.2.4. Oxidative stress	9	
2.2.5. ROS-mediated damages to biomolecules	9	
2.2.5.1. DNA damage	9	
2.2.5.2. Lipid peroxidation	10	
2.2.5.3. Protein oxidation	11	
2.2.6. Herbal antioxidants	11	
2.2.6.1. Antioxidants as radioprotectors	12	
2.2.6.2. Nutraceutical antioxidants and health	12	
2.2.7. Antioxidant screening methods	13	
2.2.7.1. ET assays using molecular probe	13	
2.2.7.1.1. TPC assay	14	
2.2.7.1.2. FRAP assay	14	
2.2.7.1.3. 2,2-Diphenyl-1-picrylhydrazyl radical (DPPH <sup>•</sup> )-scavenging assay	14	
2.2.7.2. HAT assay using molecular probes	15	
2.2.7.2.1. Oxygen radical absorbance capacity (ORAC)	15	
2.2.7.3. Methods measuring inhibition of induced LPO	15	
2.2.7.4. Methods that measure uptake of oxygen	15	
2.2.7.5. ROS and RNS scavenging	16	
2.2.7.5.1. Measuring O <sub>2</sub> <sup>•-</sup> -scavenging	16	
2.2.7.5.2. Measuring <sup>•</sup> OH-scavenging	16	
2.3. Antimicrobials in plants	17	
2.3.1. Herbal antimicrobials	17	
2.3.2. Benefits of herbal antimicrobials	20	
2.3.2.1. Therapeutic benefits	20	
2.3.2.2. Economic benefits	20	
<b>3. Materials and methods</b>	<b>21</b>	
3.1. Materials	21	
3.1.1. Culture media	21	
3.1.2. Reagents	21	
3.1.3. Test microorganisms	22	
3.2. Experimental	22	
3.2.1. Survey	22	
3.2.2. Sampling	23	
3.2.3. Preparation of methanolic extracts of samples	23	
3.2.4. Assay of antioxidant activities of crude methanolic extracts	23	

3.2.4.1. Total phenolics	23	
3.2.4.2. Total flavonoids	23	
3.2.4.3. DPPH <sup>•</sup> -scavenging	23	
3.2.4.4. ABTS <sup>•+</sup> -scavenging	24	
3.2.4.5. <sup>•</sup> OH-scavenging	24	
3.2.4.6. Oxygen radical absorbance capacity (ORAC)		24
3.2.4.7. Reducing power (RP)	24	
3.2.4.8. Metal-chelating (MC) power	25	
3.2.5. Evaluation of protection to biological targets/whole cells		25
3.2.5.1. Preparation of mice liver homogenate		25
3.2.5.2. Anti-LPO assay	25	
3.2.5.3. DNA protection assay	25	
3.2.5.4. Protein oxidation assay	26	
3.2.6. Antimicrobial activity assay	26	
3.2.6.1. Disc diffusion protocol	26	
3.2.6.2. Broth dilution protocol	26	
3.2.7. HPLC analysis of <i>Fragaria nubicola</i> root (FNR) extract		26
3.2.8. Antiproliferative potential of the extracts		27
3.2.8.1. Cell Culture	27	
3.2.8.2. Cytotoxic activity of FNR extract	27	
3.2.9. Isolation of furanocoumarins from <i>Heracleum nepalense</i> fruits		27
3.2.10. Isolation of alkaloids from <i>Stephania hernandifolia</i> roots		27
3.2.11. Statistical analysis	28	
<b>4. Results</b>	<b>29</b>	
4.1. Survey of ethnomedicinal herbs of Darjeeling hills		29
4.2. Screening of plants	29	
4.3. <i>In vitro</i> antioxidant activity screening	29	
4.3.1. DPPH <sup>•</sup> -scavenging	39	
4.3.2. Reducing power (RP)	40	
4.3.3. MC power	40	
4.4. Phenolic and flavonoid contents	40	
4.5. Principal Component Analysis (PCA) of antioxidant parameters		40
4.6. Further antioxidant screening	42	
4.6.1. ABTS <sup>•+</sup> -scavenging ability	42	
4.6.2. <sup>•</sup> OH-scavenging activity	42	
4.6.3. ORAC	42	
4.6.4. Protection against LPO	43	
4.7. Comprehensive analyses of the antioxidant capacity of FNR		43
4.7.1. ABTS <sup>•+</sup> -scavenging	43	

4.7.2. DPPH <sup>•</sup> -scavenging	43
4.7.3. RP	44
4.7.4. Anti-LPO	44
4.7.5. DNA protection	45
4.7.6. Radioprotection of proteins	45
4.8. Toxicity of FNR	45
4.9. Antiproliferative activity of FNR	46
4.10. HPLC of FNR	46
4.11. Antimicrobial assay of plant extracts	46
4.12. Isolation of active principles from extracts	48
4.12.1. Furanocoumarins from <i>H. nepalense</i> fruits	48
4.12.2. Alkaloids from <i>S. hernandiifolia</i> roots	52
4.12.3. Antioxidant and antimicrobial activities of <i>H. nepalense</i> furanocoumarins	52
4.12.3.1. DPPH <sup>•</sup> -scavenging	52
4.12.3.2. Anti-LPO	52
4.12.3.3. <sup>•</sup> OH-scavenging	52
4.12.3.4. DNA protection	52
4.12.4. Antimicrobial activity of isolated furanocoumarins	52
<b>5. Discussion</b>	<b>56</b>
5.1. Overview	56
5.2. Survey	57
5.3. Screening of antioxidant activity	57
5.4. PCA	59
5.5. <i>In vitro</i> antioxidant activity-based selection of herbs	59
5.6. Antioxidant activities of FNR	61
5.6.1. Free radical-scavenging	61
5.6.2. RP	61
5.6.3. Anti-LPO	61
5.6.4. DNA protection	62
5.6.5. Protein protection	62
5.6.6. Antiproliferative activity	62
5.7. HPLC profile of FNR	63
5.8. Antimicrobial activity of herbs	63
5.9. Isolation of phytochemicals from <i>H. nepalense</i> and <i>S. hernandiifolia</i>	65
5.9.1. Furanocoumarins and alkaloids from <i>H. nepalense</i> and <i>S. hernandiifolia</i> , respectively	65
5.9.2. Antioxidant and antimicrobial activities of isolated furanocoumarins	65
<b>6. Summary</b>	<b>66</b>
<b>7. Bibliography</b>	<b>69</b>
