

Contents

| | |
|---|-----|
| 1. Introduction | 1 |
| 2. Review of Literature | 12 |
| 2.1. Discovery of nitrogen fixation | 12 |
| 2.2. Legume and non-legume symbiosis | 12 |
| 2.3. Free-living nitrogen fixers | 14 |
| 2.4. Nitrogenase | 14 |
| 2.5. Genetics of nitrogen fixation | 16 |
| 2.6. Pre-genomic era research in nitrogen fixation | 17 |
| 2.7. Beginning of interdisciplinary research and dawn of bioinformatics | 17 |
| 2.8. Post genomic era and BNF | 19 |
| 2.9. Previous works on codon usage patterns | 21 |
| 2.10. Proteomics and structural bioinformatics of nitrogen fixation | 24 |
| 2.11. Phylogenetic studies on BNF | 27 |
| 3. Materials and Methods | 31 |
| 3.1. Codon usage analysis | 31 |
| 3.2. Analysis of TTA codons from GC rich diazotrophs | 37 |
| 3.3. Proteome analysis | 38 |
| 3.4. Phylogenetic analysis of <i>nif</i> genes | 39 |
| 3.5. Homology modeling of NifH proteins from <i>Frankia</i> | 42 |
| 4. Results and Discussion | 46 |
| 4.1. The synonymous codon usage patterns | 46 |
| 4.2. Synonymous codon usage pattern of nitrogen fixation related genes | 81 |
| 4.3. Analysis of TTA codon containing genes from GC rich diazotrophs | 86 |
| 4.4. Analysis of proteomes | 91 |
| 4.5. Phylogenetic analysis of <i>nif</i> genes: an alternative approach | 110 |
| 4.6. Three dimensional homology models of <i>Frankia</i> NifH proteins | 125 |
| 5. Conclusion | 136 |
