<b>Contents</b>	<b>PAGE NO.</b>
<b>CHAPTER I</b>	
INTRODUCTION	1-3
<b>CHAPTER II</b>	
LITERATURE REVIEW	4-17
II.2 Tanning process and Characteristics of tannery effluent	
II.3 The polluting features of tannery waste on different surfaces	
II.4 Requirements of Pollution Control and Management	
II.5 Minimization of waste in Leather processing	
II.6 Cleaner leather processing	
II.7 Reduction of pollutants at source	
II.8 Reduction of BOD&COD	
II.9 Reduction of sulfide load	
II.10 Reduction of nitrogen salts	
II.11 Reduction of chrome	
II.12 Bioremediation	
<b>CHAPTER III</b>	
PROBLEM STATEMENT AND SCOPE OF THE PRESENT WORK	18-22
III.1. Benefits of Bioclean cultures	
III.2. View of the present work	
<b>CHAPTER IV</b>	
MICROBIOLOGY OF EFFLUENT TREATMENT	23-39
IV.1: Enzymatic Hydrolysis	
IV.2: Energy production	
IV.3: Cell synthesis	
IV.3.1 Reaction in the activated sludge process for new cell synthesis	
IV.3.2. Reactions for Electron Donors	
IV.3.3. Process kinetics	
IV.4. Microorganisms in activated sludge treatment process	

## **CHAPTER V**

### **DETAILS OF AN EFFLUENT TREATMENT PLANT**

40-68

- V.1. Definition of wastewater
- V.2. Necessity of wastewater treatment
- V.3. Methods of treatment
- V.4. Application of treatment methods
  - V.4.1. Preliminary wastewater treatment
  - V.4.2. Primary wastewater treatment
  - V.4.3. Secondary wastewater treatment
    - V.4.3.1. Biological treatments
      - V.4.3.1.1. Aerobic Processes
        - V.4.3.1.1.1. Activated sludge systems
        - V.4.3.1.1.2. Aerated lagoons
        - V.4.3.1.1.3. Aeration
        - V.4.3.1.1.4. Trickling filters
        - V.4.3.1.1.5. Rotating biological contractors
        - V.4.3.1.1.6. Selection of aerobic treatments
      - V.4.3.1.2. Anaerobic Treatment
  - V.4.4. Tertiary Treatment
- V.5. Effluent treatment process at Mokamehghat tannery of Bata India Limited (Bihar)
  - V.5.1. The design and functioning principles of the plant
  - V.5.2. Pre-treatment & Treatment system
  - V.5.3. Zero discharge system

## **CHAPTER VI**

### **IDENTIFICATION OF MICROBES AND STUDY OF THEIR EFFICACY**

69 - 81

- VI.1.1. Selections of spots for study of effluent quality
- VI.1.2. Spot Testing of effluent sample at selected points
- VI.1.3. Procedure for determination of Bacterial count
- VI.2. Method of isolating pure culture
- VI.3. Determination of efficiency of 65 isolated pure strain

VI.3.1 Procedure for Nitrate ( $\text{NO}_3^-$ ) Determination

VI.3.2. Procedure for Phosphate ( $\text{PO}_4^{3-}$ ) Determination

VI.4. Identification of species name of 4 efficient bacteria

VI.5. Efficiency determination of 4 isolated strains singly and in combination, under atmospheric condition with respect to BOD reduction

## **CHAPTER VII**

CONCLUSION

82-85

### **Appendix-I**

a-g

1. Materials

2. Specification of Equipments/ Instruments

3. Biochemical oxygen demand (  $\text{BOD}_5$  <sup>25</sup> –  $\text{BOD}_5$  <sup>20</sup> )

4. Chemical oxygen demand ( COD ) :

### **Appendix -II**

List of Tables for efficiency judgement of bacteria

A1- A14

### **Appendix-III**

Figures for efficiency judgement of bacteria

B1- B 88

### **Appendix-IV**

C1- C11

Colony picture of four pure strains

And Pictures of Laboratory Equipment

### **Appendix- V**

D1-D10
