

Acknowledgements

I would like to express my deep sincere respect and gratefulness to my thesis supervisor Dr. B. C. Paul, Sr. Lecturer, Physics Department, NBU for introducing me to the wonderful world of Theoretical Physics in particular cosmology and encouraging me to tackle difficult problems from the very beginning of my research career. Without his constant encouragement and help at many critical times, this work could not have been finished. It was a great experience to work with him. I thank him for having given me this opportunity.

I would like to thank the Physics Department, North Bengal University and to Prof. S. Mukherjee, former Professor of Physics, NBU for providing and extending all facilities of the IUCAA Reference Center (IRC), Physics Department at North Bengal University to carry out the research work. I would also like to thank the Inter-University Center for Astronomy and Astrophysics (IUCAA), Pune for permitting me to use excellent Library and computing facilities where a part of this work was carried out.

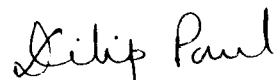

I am thankful to Mr. Souvik Ghose, JRF, NBU for the help he provided me to overcome the difficulties with the computers and his cooperation as and when required.

I must also thank my colleagues and dear friends for their support and encour-

agement that helped me in executing the project.

Last but not the least I must thank my family whose support is one of the few constants in life.
