

Acknowledgement

At the outset, I owe a deep sense of gratitude to my respected teacher and supervisor, Dr. Mahendra Nath Roy, Professor of Chemistry, University of North Bengal, Darjeeling, India for his constant guidance, valuable suggestions, inspirations and constructive criticism during my research period. Without his loving care, meticulous guidance and priceless supervision, it would have not been possible for me to bring this thesis to the present shape. I am especially thankful for his encouragement, which motivated me to work on this topic and obviously for providing me invaluable time notwithstanding his busy university engagements.

I also express my deep sense of gratitude to the honourable faculty members, Department of Chemistry, University of North Bengal for their invaluable assistance and continued inspiration during the course of my research. I am grateful to the University authority for providing laboratory facilities, especially University Scientific Instrumentation Centre, University of North Bengal for helping me in my research.

I am highly obliged to my co-research scholars of our research laboratory for their valuable assistance and cooperation during my research work.

No word is enough to pay my sincere gratitude to my father Sri Bimal Chandra Sarkar and mother Smt. Doli Sarkar, for their contributions to my career building and whose inspiration went a long way to the completion of this thesis. It would be amiss if I do not mention the contributions of my beloved husband Mr. Samar Kumar Biswas who provided me every possible support to complete the research work.

I am constantly aware of what a huge debt I owe to the sources of the information required for my research work: the numerous books, monographs, articles, computer website, etc. I put on record some measure of my gratitude to those whose references I have cited in this thesis.

In the long run, I am to record my thankfulness to UGC Research Fellowship in Science for meritorious student Ref. No. F.4 -1 /2006 (X1 plan /BSR) under **SAP** for sanctioning a Junior Research Fellowship and providing financial aid in order to continue this research work.
