<b>Chapter 1</b> Introduction	2-17
<b>Chapter 2</b> Estimation of growth of composite entire and meromorphic functions of order zero on the basis of slowly changing functions	18-31
2.1 Introduction, Definitions and Notations	18
2.2 Lemmas	22
2.3 Theorems	26
<b>Chapter 3</b> On the growth of composition of entire functions with respect to minimum modulus	32-39
3.1 Introduction, Definitions and Notations	32
3.2 Lemmas	33
3.3 Theorems	34
<b>Chapter 4</b> Relative L-order and related comparative growth properties of entire functions on the basis of their minimum modulus	40-53
4.1 Introduction, Definitions and Notations	40
4.2 Lemmas	44
4.3 Theorems	44
<b>Chapter 5</b> Relative $(p,q)$ th order and related growth estimates of entire functions on the basis of their minimum modulus	54-60
5.1 Introduction, Definitions and Notations	54
5.2 Lemmas	56
5.3 Theorems	57
<b>Chapter 6</b> Sharing and $(t) L^*-(p,q)$ th order of meromorphic and entire functions	61-67
6.1 Introduction, Definitions and Notations	61
6.2 Lemmas	65
6.3 Theorems	65

<b>Chapter 7</b>	<b>Generalised <math>L^*</math>-(p,q)th order of the derivative of a meromorphic function</b>	<b>68-73</b>
	7.1 Introduction, Definitions and Notations	68
	7.2 Lemmas	69
	7.3 Theorems	70
<b>Chapter 8</b>	<b>A note on relative L-order and relative <math>L^*</math>-order of entire functions</b>	<b>74-80</b>
	8.1 Introduction, Definitions and Notations	74
	8.2 Theorems	76
<b>Chapter 9</b>	<b>Relative L-Ritt order and related comparative growth properties of entire Dirichlet series</b>	<b>81-92</b>
	9.1 Introduction, Definitions and Notations	81
	9.2 Theorems	84
<b>Chapter 10</b>	<b>Growth properties of composite entire Functions of two complex variables</b>	<b>93-104</b>
	10.1 Introduction, Definitions and Notations	93
	10.2 Theorems	95
<b>Chapter 11</b>	<b>Study of growth properties on the basis of Gol'dberg order of composite entire functions of several complex variables</b>	<b>105-119</b>
	11.1 Introduction, Definitions and Notations	105
	11.2 Theorems	108
<b>Bibliography</b>		<b>120-125</b>
<b>List of Publications</b>		<b>126-127</b>
