<b>OLIGOTROPHIC BACTERIA: A GENERAL INTRODUCTION</b>	<b>1</b>
I. Nutrient availability for bacterial growth in oligotrophic environment.....	2
II. Oligotroph: Definition.....	3
III. Classification of oligotrophic Bacteria.....	4
IV. Predicted properties of oligotrophs.....	4
V. Oligotroph vs. Copiotroph.....	5
VI. Methods for studying oligotrophic bacteria.....	7
VII. Ubiquity of oligotrophic bacteria.....	10
VIII. Antibiotic resistance in Oligotrophic bacteria.....	11
IX. Recent advances in studies related to oligotrophic bacteria.....	12
X. Aim of this study.....	13
XI. Significance of study.....	13
XII. Objectives .....	13
REFERENCES.....	14
<b>1. ISOLATION OF OLIGOTROPHIC BACTERIA FROM RIVER MAHANANDA AND DETERMINATION OF ANTIBIOTIC SUSCEPTIBILITY/RESISTANCE PATTERNS OF THE ISOLATES.....</b>	<b>23</b>
1.1 BACKGROUND.....	23
1.2 MATERIALS AND METHODS.....	28
1.2.1 Sampling strategy.....	28
1.2.2 Selection of sampling sites.....	28
1.2.3 Study design.....	29
1.2.4 Sample collection.....	29
1.2.5 Preparation of sample and dilution series.....	29
1.2.6 Preliminary isolation of antibiotic sensitive facultative oligotrophic bacterial strains from Mahananda river water and standardization of the protocol for determining antibiotic susceptibility/resistance patterns of oligotrophic bacteria.....	30
1.2.7 Detailed microbiological analysis of the water samples collected from three sampling sites for three consecutive years.....	31
1.2.7.1 Routine enumeration of oligotrophic bacteria on nutrient poor agar medium and determination of fractions resistant to different antibiotics..	31
1.2.7.2 Screening of facultative oligotrophs from the population of oligotrophic bacteria (obligate + facultative oligotrophic bacteria.....	31
1.2.7.3 Determination of antibiotic susceptibility/resistance of facultatively oligotrophic bacteria.....	32
1.3 RESULTS.....	32
1.3.1 Data analyses of total oligotrophic bacteria enumerated on NPA and NPA amended with specific antibiotic used in this study.....	32
1.3.1.1 Enumeration of oligotrophic bacterial load in water samples collected from three sampling sites in three consecutive years (2007-2009) from river Mahananda and determination of oligotrophic bacterial fractions resistant to each antibiotic tested.....	32
1.3.1.2 Comparative analyses of annual average percentages of twelve different antibiotic-resistant oligotrophic bacteria and their trends of increase or decrease.....	38
1.3.2 Occurrence (s) of sensitive, single and multiple-antibiotic-resistant bacteria among randomly selected facultatively oligotrophic (from second generation master plate) population.....	40
1.4 DISCUSSION.....	42
1.5 CONCLUSION .....	46
REFERENCES.....	48

<b>2.</b>	<b>DETECTION OF CLASS 1 INTEGRON AND MOLECULAR CHARACTERIZATION OF THEIR GENE CASSETTES IN FACULTATIVE OLIGOTROPHIC BACTERIA OF RIVER MAHANANDA.....</b>	
<b>2.1</b>	<b>BACKGROUND.....</b>	<b>54</b>
2.1.1	Types and structural organization of integrons.....	54
2.1.2	Class 1 integron.....	55
2.1.3	Gene cassette.....	57
2.1.4	Integron epidemiology.....	59
2.1.5	Integron study in India.....	60
<b>2.2</b>	<b>MATERIALS AND METHODS.....</b>	<b>61</b>
2.2.1	Random selection of facultatively oligotrophic isolates and detection of class 1 integrons in them.....	61
2.2.2	Antibiotic resistance determination of oligotrophic bacteria.....	62
2.2.3	Polymerase chain reaction based screening for detection of class 1 integrons.....	62
2.2.4	Gel electrophoresis and size determination of the CS-PCR products.....	63
2.2.5	Cloning of CS-PCR products.....	63
2.2.5.1	Purification and elution of the PCR products .....	63
2.2.5.2	Preparation of competent E coli by CaCl <sub>2</sub> method.....	63
2.2.5.3	Cloning of the purified PCR products.....	63
2.2.5.4	Selection of recombinants.....	63
2.2.6	DNA sequencing and computer analysis of the sequences data.....	64
2.2.7	Bioinformatic tools used in data analysis.....	64
2.2.8	Homology modeling of DfrA1 and AadA1 proteins derived from bacterium MB47... ..	65
2.2.9	Accession numbers.....	65
<b>2.3</b>	<b>RESULTS.....</b>	<b>65</b>
2.3.1	Antibiotic resistance profile of integron positive isolates.....	65
2.3.2	Detection of class 1 integrons.....	66
2.3.3	Characterization of integron borne gene cassettes.....	67
2.3.3.1	Gene cassette revealing ORFs unrelated to any known antibiotic resistance gene function.....	67
2.3.3.2	Antibiotic resistance gene cassettes.....	68
2.3.3.3	Integron carriage in samples collected from three different sampling sites (SS I, SS II, and SS III); and occurrences of class 1 integrons in different resistance index groups.....	71
<b>2.4</b>	<b>DISCUSSION.....</b>	<b>71</b>
<b>2.5</b>	<b>CONCLUSION.....</b>	<b>78</b>
	<b>REFERENCES.....</b>	<b>103</b>
<b>3.</b>	<b>IDENTIFICATION OF OLIGOTROPHIC BACTERIA BEARING CLASS 1 INTEGRON.....</b>	
	<b>[A]: Identification of isolates using basic approaches</b>	
<b>3A.1</b>	<b>BACKGROUND.....</b>	<b>112</b>
<b>3A.2</b>	<b>MATERIALS AND METHODS.....</b>	<b>114</b>
3A.2.1	Bacterial isolates.....	114
3A.2.2	Morphological and physiological characterization of isolates.....	114
3A.2.3	Numerical taxonomy followed by total protein profiling.....	114
3A.2.4	Amplification, cloning and sequencing of 16S rRNA gene sequence.....	115
3A.2.5	Analyses of 16S rRNA gene sequences using tools of Bioinformatics.....	115
3A.2.6	16S rRNA gene sequence based phylogeny.....	116
<b>3A.3</b>	<b>RESULTS AND DISCUSSION.....</b>	<b>116</b>

[B]: Identification of a novel gram positive bacterium using polyphasic approach  
 3B: Polyphasic taxonomy of *Brevibacterium siliguriense*, strain MB18<sup>T</sup>, a novel Gram positive facultative oligotrophic bacterium isolated from river Mahananda, Siliguri, India.....

3B.1	Description of <i>Brevibacterium siliguriense</i> sp. nov.....	119
3.4	CONCLUSION.....	123
	REFERENCES.....	124
		145

4. CHARACTERIZATION OF CLASS 1 INTEGRON ASSOCIATED NOVEL TRIMETHOPRIM RESISTANCE GENE, DFRA28, FROM *ACINETOBACTER*SPP. MB52.....

150

4.1	BACKGROUND.....	150
4.2	MATERIAL AND METHODS.....	151
4.2.1	Sampling, isolation, and identification of oligotrophic strain.....	151
4.2.2	Antibiotic resistance determination.....	151
4.2.3	Phenotypic tests of facultatively oligotrophic test strain MB52.....	151
4.2.4	DNA extraction amplification, cloning and sequencing of 16S rRNA gene.....	151
4.2.5	16S rRNA gene sequence based phylogeny.....	151
4.2.6	Oligotrophic characteristics of the strain MB52.....	152
4.2.7	DNA extraction, detection of class 1 integron, cloning and sequencing of variable region.....	152
4.2.8	Sequence analysis of class 1 integron borne gene cassette and phylogeny of novel DfrA protein.....	152
4.3	RESULTS.....	152
4.3.1	Phenotypic characterization and 16S rRNA phylogeny.....	152
4.3.2	Oligotrophic nature of MB52.....	153
4.3.3	Detection of class 1 integron borne gene cassette and characterization of novel <i>dfrA28</i> gene.....	153
4.4	DISCUSSION.....	155
4.5	CONCLUSION.....	156
	REFERENCES.....	157

5. CLONING, SEQUENCE ANALYSIS AND EXPRESSION OF A NOVEL DIHYDROFOLATE REDUCTASE GENE, DFRA30, FROM *KLEBSIELLA PNEUMONIAE* STRAIN MB45.....

160

5.1	BACKGROUND.....	160
5.2	MATERIALS AND METHODS.....	160
5.2.1	Sampling, isolation and identification of oligotrophic bacterial strain from river water.....	160
5.2.2	Selection of the test strain and antibiotic susceptibility test.....	160
5.2.3	Phenotypic characterization of MB45.....	161
5.2.4	Determination of oligotrophic characteristics of MB45.....	161
5.2.5	DNA extraction, amplification, cloning and sequencing of 16S rRNA gene.....	161
5.2.6	16S rRNA gene sequence based phylogeny.....	161
5.2.7	Cloning and sequencing of the amplicon corresponding to the variable region of the class 1 integron of MB45.....	162
5.2.8	Sequence analysis and phylogeny of the novel DfrA protein.....	162
5.2.9	Expression of novel <i>dfrA</i> gene in pJET1.2 vector.....	162
5.2.10	Sequence alignment and the effect of mutation in the novel DfrA.....	163
5.3	RESULTS.....	163
5.3.1	Phenotypic characterization and 16S rRNA gene sequence phylogeny.....	163
5.3.2	Oligotrophic nature of strain MB45.....	164
5.3.3	Description of class 1 integron borne gene cassette and phylogeny of novel DfrA protein.....	164
5.3.4	Mutation study of DfrA30.....	166
5.3.5	Expression of the novel <i>dfrA30</i> in <i>E. coli</i> JM109.....	167
5.4	DISCUSSION.....	168
5.5	CONCLUSION.....	170
	REFERENCES.....	171

6.	AN EVALUATION OF BACTERICIDAL PROPERTY OF ZINC OXIDE QUANTUM DOTS ON A MULTIPLE ANTIBIOTIC AND HUMAN SERUM RESISTANT BACTERIUM, <i>KLEBSIELLA PNEUMONIAE</i> MB45.....	174
6.1	BACKGROUND.....	174
6.2	MATERIALS AND METHODS.....	175
6.2.1	Isolation, selection, oligotrophic characteristics, and characterization of test strain MB45.....	175
6.2.2	Antibiotic susceptibility test and determination of resistance.....	175
6.2.3	Serum bactericidal assay.....	175
6.2.4	Effect of ZnO QDs on viability and growth of MB45.....	175
6.3	RESULTS AND DISCUSSION.....	176
6.4	CONCLUSION.....	177
	REFERENCES.....	178
	GENERAL DISCUSSION AND SUMMARY.....	180
	REFERENCES.....	186
