

CONTENTS

	Content	i
	Foreword	iv
	Financial support	v
	Preface	vi
	List of abbreviations	ix
Chapter 1	Introduction	1
1.1	Ischemic Heart Disease	2
1.2	Myocardial Ischemic Reperfusion Injury	4
1.3	Treatment for Ischemic Heart Disease	9
1.4	Epidemiology of Cardio Vascular Disease	24
1.5	Pyrazolone Derivatives in Ischemic Injury	25
1.6	Evaluation of Cardio Protective Properties	27
1.7	References	31
Chapter 2	Literature review	38
2.1	Etiology of Coronary Heart Disease	38
2.2	Pathophysiology of Ischemic-Reperfusion Injury	40
2.3	Preconditioning	45
2.4	Post conditioning	46
2.5	Clinical Relevance of Preconditioning and Post Conditioning	49
2.6	Molecular and Cellular Mechanisms of Myocardial Ischemic Reperfusion Injury	50

2.7	Endothelial Function in Cardiovascular Diseases	51
2.8	Mechanisms of Ischemic Injury	52
2.9	International Status on CVD	58
2.10	National Status on CVD	58
2.11	Pharmacology of Pyrazolones	60
2.12	Current and Future Developments on CVS	69
2.13	References	71
Chapter 3	Aims and Objectives	81
3.1	Synthesis of Novel 3-Methyl Pyrazol-5-one Derivatives as Heterocyclic Scaffold	81
3.2	Characterization of Synthesized Compounds by Modern Physio Chemical Methods	81
3.3	Evaluation of Cardio Protective Activities by Chemical Methods.	82
3.4	Evaluation of Cardio Protective Activities by Using Langendorff's Apparatus	82
3.5	Histopathology	82
3.6	Analgesic , Anti Inflammatory and Antipyretic Activity Studies	82
3.7	Statistical Analysis to Verify the Significance of the Results	82
Chapter 4	Materials and Methods	83
4.1	Materials	83
4.2	Scheme of Synthesis	83
4.3	Methods	95

4.4	Pharmacological Studies	101
4.5	References	111
Chapter 5	Results	113
5.1	Physical Parameters	113
5.2	Melting Point Measurement	113
5.3	Thin Layer Chromatography	114
5.4	Determination of λ_{\max} by UV-Visible Spectrophotometer	114
5.5	FTIR Spectral Analysis	120
5.6	NMR Spectral Analysis	131
5.7	Mass Spectral Analysis	142
5.8	Biological Evaluation	152
5.9	Structure Activity Relationship of Pyrazolone Derivatives	182
Chapter 6	Discussion	184-192
Chapter 7	Summary and Conclusion	193-196
	List of Publications	197
	Table index	198
	Figure index	199

Addendum/Corrigendum - 1
