CHAPTER 1 INTRODUCTION	1
CHAPTER 2 LITERATURE REVIEW	7
2.1. Siderophores: An overview	7
2.2. Biological control: A concept and case study	18
2.3. Biocontrol of plant diseases by siderophore producing bacteria	32
CHAPTER 3 ISOLATION OF SIDEROPHORE PRODUCING ANTAGONISTIC BACTERIA FROM SOIL AND THEIR CHARACTERIZATION	41
3.1. Introduction	41
3.2. Materials And Methods	43
3.2.1. Isolation of bacteria from soil	43
3.2.1.1. Collection of sample	43
3.2.1.2. Media	43
3.2.1.3. Isolation process	45
3.2.2. Screening for siderophores producing bacteria using CAS agar medium	46
3.2.3. Fungal pathogens used in the study	47
3.2.3.1. Source of fungal pathogens	47
3.2.3.2. Maintenance of cultures in PDA	48
3.2.4. Evaluation of antifungal activity	48
3.2.4.1. Screening of isolates by dual culture test	48
3.2.4.2. Quantitative test for study of <i>in vitro</i> antagonism	48
3.2.4.3. Statistical analysis	49
3.2.5. Characterization of selected bacterial isolates	49
3.2.5.1. Morphological characterization	49

3.2.5.1.1.	Shape and size	49
3.2.5.1.2.	Endospore staining	50
3.2.5.1.3.	Colony characteristics	50
3.2.5.1.4.	Motility test	51
3.2.5.2.	Biochemical characterization	51
3.2.5.2.1.	Gram Staining	51
3.2.5.2.2.	Indole production	51
3.2.5.2.3.	Methyl Red and Voges-Proskauer Test	52
3.2.5.2.4.	Citrate Utilization	52
3.2.5.2.5.	Nitrate Reduction	52
3.2.5.2.6.	ONPG Test	53
3.2.5.2.7.	Oxidation or Fermentation of glucose	53
3.2.5.2.8.	Gelatin Liquefaction	53
3.2.5.2.9.	Phenylalanine Deamination Reaction	53
3.2.5.2.10.	DNase activity	54
3.2.5.2.11.	Urease activity	54
3.2.5.2.12.	TSI agar Test	54
3.2.5.2.13.	Catalase activity	54
3.2.5.2.14.	Oxidase activity	54
3.2.5.2.15.	Ornithine Decarboxylase Test	55
3.2.5.2.16.	Lysine Decarboxylase Test	55
3.2.5.2.17.	Acid formation from different carbohydrates	55
3.2.5.2.18.	Fluorescence on <i>Pseudomonas</i> Agar (For Fluorescein) medium	56
3.2.5.3.	Phylogenetic characterization	56
3.2.5.3.1.	Isolation of genomic DNA by CTAB method	56
3.2.5.3.2.	RNase treatment	57
3.2.5.3.3.	Quantification of DNA	57
3.2.5.3.4.	Gel electrophoresis	57
3.2.5.3.5.	PCR amplification of 16S rRNA gene	58
3.2.5.3.6.	Detection of PCR amplicon in agarose gel	58
3.2.5.3.7.	Cloning of PCR amplicons	59
3.2.5.3.7.1.	Preparation of competent cells	59
3.2.5.3.7.2.	Transformation	59

3.2.5.3.7.3.	Blue white screening	60
3.2.5.3.8.	Sequencing of cloned PCR products	60
3.2.5.3.9.	Identification of <i>Pseudomonas</i> strains using 16S-23S ITS specific primer	60
3.2.5.3.10.	Phylogenetic analysis of <i>Pseudomonas</i> isolates	61
3.3.	Results	61
3.3.1.	Isolation of bacteria from rhizosphere soil	61
3.3.2.	Screening for siderophore production	61
3.3.3.	<i>In vitro</i> antagonism of bacterial isolates	62
3.3.4.	Characterization of antagonistic bacterial isolates	63
3.3.4.1.	Morphological characterization	63
3.3.4.2.	Biochemical and physiological characterization	67
3.3.4.3.	Phylogenetic characterization	71
3.3.5.	Identification of the antagonistic isolates	71
3.3.6.	Amplification of fluorescent <i>Pseudomonas</i> specific gene	72
3.3.7.	Phylogenetic analysis of the <i>Pseudomonas</i> isolates	73
3.4.	Discussion	73
CHAPTER 4	MECHANISM OF ACTION OF SIDEROPHORE PRODUCING RHIZOBACTERIA SHOWING ANTAGONISTIC ACTIVITY AGAINST PLANT PATHOGENIC FUNGI	81
4.1.	Introduction	81
4.2.	Materials and methods	83
4.2.1.	Siderophore production assay	83
4.2.2.	Antimicrobial metabolite production	83
4.2.2.1.	Cellulase production	84
4.2.2.2.	Pectinase activity	84
4.2.2.3.	Lipase activity	84
4.2.2.4.	Chitinase activity	84
4.2.2.5.	Amylase activity	85
4.2.2.6.	Protease activity	85
4.2.3.	Evaluation of PGPR traits	85
4.2.3.1.	Indole-3-acetic acid production	85
4.2.3.2.	Phosphatase activity	86
4.2.4.	Detection of HCN Production	86

4.2.5.	Antagonism by crude extracellular products	86
4.2.5.1.	Preparation of crude extract	86
4.2.5.2.	<i>In vitro</i> antifungal activity of the crude extract	87
4.2.6.	Scanning Electron Microscopy	87
4.3.	Results	88
4.3.1.	Siderophore production	88
4.3.2.	Antimicrobial Metabolite Production	88
4.3.3.	Detection of HCN Production	90
4.3.4.	Antagonism by crude extracellular products	90
4.3.5.	Evaluation of PGPR traits	91
4.3.6.	Scanning Electron Microscopy	91
4.4.	Discussion	93
CHAPTER 5	CHARACTERIZATION AND PURIFICATION OF SIDEROPHORES	98
5.1.	Introduction	98
5.2.	Materials and Methods	100
5.2.1.	Media for siderophore production	100
5.2.2.	Detection of hydroxamate siderophores	100
5.2.2.1.	Tetrazolium test	100
5.2.2.2.	Ferric chloride test	101
5.2.3.	Detection of catecholate siderophores	101
5.2.3.1.	Arnow's test	101
5.2.3.2.	Ferric chloride test	101
5.2.4.	Detection of Carboxylate siderophores	101
5.2.5.	Optimization of siderophore production	102
5.2.5.1.	Siderophore production in different media supplement	102
5.2.5.2.	Siderophore production after different periods of incubation	103
5.2.5.3.	Siderophore production at different incubation temperatures	103
5.2.6.	Purification of siderophore	103
5.2.6.1.	Amberlite XAD-2 chromatography	103
5.2.6.2.	Sephadex LH-20 chromatography	104
5.2.6.3.	Thin layer chromatography	105
5.2.6.4.	Spectral scan analysis	105

5.3.	Results	105
5.3.1.1.	Hydroxamate	105
5.3.1.2.	Catecholate	106
5.3.1.3.	Carboxylate	107
5.3.4.	Optimization of siderophores production	107
5.3.4.1.	Media components	107
5.3.4.2.	Incubation time	108
5.3.4.3.	Incubation temperature	108
5.3.6.	Purification of siderophore	110
5.3.6.1.	Amberlite XAD2 chromatography	110
5.3.6.2.	Sephadex LH20 chromatography	110
5.3.6.3.	TLC	110
5.3.6.4.	Spectral scan analysis	110
5.4.	Discussion	111
CHAPTER 6	<i>IN VIVO</i> EVALUATION OF <i>Pseudomonas putida</i> STRAINS AS01 AND AS04 AS BIOCONTROL AGENTS AGAINST WILT IN BRINJAL	116
6.1.	Introduction	116
6.2.	Materials and Methods	118
6.2.1.	Host plant	118
6.2.1.1.	Selection of brinjal varieties	118
6.2.1.2.	Collection of selected varieties	118
6.2.1.3.	Cultivation of selected varieties	118
6.2.1.4.	Raising of seedlings	119
6.2.1.5.	Transplantation	119
6.2.2.	Pathogenicity test of <i>Fusarium solani</i> and verification of Koch's postulates	119
6.2.3.	Disease evaluation process	120
6.2.4.	<i>In-vitro</i> studies on growth and antagonism of the antagonistic <i>Pseudomonas putida</i> strains AS01 and AS04	121
6.2.4.1.	Growth kinetics study	121
6.2.4.2.	Study of <i>in vitro</i> antagonism in liquid culture	121
6.2.5.	<i>In vivo</i> studies for management of <i>Fusarium</i> wilt in brinjal	121
6.2.5.1.	Preparation of bacterial inoculum	121

6.2.5.2.	Preparation of fungal inoculum	122
6.2.5.3.	<i>In vivo</i> studies for management of <i>Fusarium</i> wilt in brinjal	122
6.2.5.4.	Statistical analysis	123
6.3.	Results	123
6.3.1.	Verification of Koch's postulates	123
6.3.2.	<i>In vitro</i> studies	123
6.3.3.	<i>In vivo</i> evaluation of biocontrol potential of the antagonistic bacterial isolates AS01 and AS04 against <i>Fusarium</i> wilt in brinjal	125
6.4.	Discussion	126
CHAPTER 7	GENERAL DISCUSSION	131
CHAPTER 8	SUMMARY	137
CHAPTER 9	REFERENCES	141
