<b>1.</b>	<b>Introduction</b>	<b>1-5</b>
1.1	Background	1
1.2	Role of forests for the society	2
1.3	Different factors influencing forest growth	2
1.4	Non-Timber Forest Produces (NTFP)	2
1.4.1	Rationale to conserve NTFPS	3
1.4.2	NTFP in poverty alleviation	4
1.4.3	Valuation of non-timber forest resources	4
1.4.4	India's perspective	4
1.5	Carbon sequestration	5
1.6	Soil and water – role of forest	5
1.7	Understanding the BTR vegetation	5
<b>2.</b>	<b>Study area</b>	<b>6-12</b>
2.1	Location	6
2.2	Different physical attributes	6
2.2.1	Topography	6
2.2.2	Geology	6
2.2.3	Drainage	7
2.2.4	Soil	7
2.2.5	Archeology	7
2.3	Climate	7
2.3.1	Rainfall	7
2.3.2	Temperature	7
2.3.3	Relative humidity	8
2.3.4	Wind	8
2.4	Ecological significance	8
2.5	Vegetation type	10
2.6	Biological resources	10
2.6.1	Flora	10
2.6.2	Fauna	11
2.7	Settlements	11
2.8	Communication network	11
2.9	Forest history	11
2.10	Conservation history	12
<b>3.</b>	<b>Methodology</b>	<b>13-16</b>
3.1.	Sampling of vegetation	13
3.1.1	Plot Selection	13
3.1.2	Plot layout	13
3.1.3	Physical attributes	13
3.1.4	Soil sampling	13
3.1.5	Qualitative observation	14
3.1.6	Recognition through vernacular names	14

3.1.7	Processing of specimens	14
3.1.8	Identification of Plants	14
3.2	Sampling of Socio-Economic aspects	14
3.2.1	Analysis of Socio-Economic information	15
3.3	Phytosociological analysis	15
3.3.1	Frequency	15
3.3.2	Density	16
3.3.3	Dominance	16
3.3.4	Importance value Index (IVI)	16
3.3.5	Shannon – Weaver Index of Diversity (SWID)	16
3.3.6	Simpson’s Dominance Index (SDI)	16
3.3.7	Species richness	16
<b>4</b>	<b>Enumeration of recorded vascularplants</b>	<b>17-79</b>
4.1	Classification of Major Taxa	17
4.2	Enumeration	21
4.2.1	Division: Pteridophyta	21
4.2.2	Division: Pinophyta	23
4.2.3	Division: Magnoliophyta	23
4.2.3.1	Class: Magnoliopsida	23
4.2.3.2	Class: Liliopsida	71
<b>5</b>	<b>Results</b>	<b>80-95</b>
5.1	Flora	80
5.1.1	Habit groups	80
5.1.1.A	Trees	81
5.1.1.B	Shrubs	81
5.1.1.C	Herbs	81
5.1.1.D	Seedlings	82
5.1.1.E	Saplings	82
5.2	Non Timber Forest Produces (NTFP)	82
5.2.1	Species used for subsistence	83
5.2.2	Major commercial species	83
5.2.3	Minor commercial species	83
5.2.4	Threatened and Endangered NTFPs	83
5.2.5	Altitudinal variation and availability of NTFPs	84
5.3	Impact of different attributes on vegetation	84
5.3.1	Elevation	84
5.3.2	Slope	84
5.3.3	Plot aspect	84
5.3.4	Soil nutrients	84
5.4	Analysis of association among the dominant species	85
5.4.1	Association among the dominant trees	85
5.4.2	Association among the dominant shrubs	86
5.4.3	Association among the dominant herbs	86
5.4.4	Association of NTFPs with dominant trees	87
5.4.5	Crown cover	87
5.4.6	Ground cover	88
5.4.7	Epiphytes	88

5.5	Survival rate of existing species	89
5.6	Human intervention	89
5.7	Social attributes	89
5.7.1	Bhutia Basti Bengal Line settlement	89
5.7.2	Jainti settlement	90
5.7.3	Nurpur settlement	91
5.7.4	Socio-ecological relationship	91
5.7.5	Ethnobotany	91
5.8	Local institutions and their role in forest management	94
<b>6 Discussion</b>		<b>96-111</b>
6.1	Flora	96
6.2	Effect of altitude on flora and vegetation	97
6.2.1	Altitude and vegetation	97
6.2.2	Altitude and NTFPs	97
6.2.3	Altitude and volume of plants	98
6.2.4	Effect of altitude on crown and ground cover	98
6.2.5	Altitude and epiphyte	99
6.3	Effect of slope on flora and vegetation	99
6.3.1	Slope and stem count	99
6.3.2	Slope on vegetation volume	100
6.4	Effect of aspect on flora and vegetation	101
6.4.1	Aspect and vegetation	101
6.4.2	Aspect and vegetation volume	101
6.4.3	Major soil nutrients and other components	101
6.5	Phytosociology	102
6.5.1	Phytosociology of NTFPs	103
6.5.2	Effect of crown-cover on ground-cover	104
6.5.3	Simpson's dominance index	105
6.5.4	Shannon – Weaver index of diversity	107
6.5.5	Menhinick index of species richness	108
6.6	Mortality and its impact	108
6.7	Threatened and endangered species	108
6.8	Socio – ecological relationship	109
6.8.1	Impact of NTFP on local economy	109
6.9	Role of local managements: Community institutions	109
6.10	Future challenge	109
6.11	Conclusion	110
6.11.1	Locational disadvantage and ethnobotanical knowledge	110
6.11.2	Alternate livelihood option (s) and forest dependence	110
6.11.3	Value addition of NTFPs to reduce exploitation	110
6.11.4	Soil management for nutritional rejuvenation	110
6.11.5	Management (s) in forest conservation	110
6.11.6	Transboundary National Park to conserve BTR	110
6.11.7	Further research to conserve ethnic knowledge	111
<b>Bibliography</b>		<b>112-120</b>
<b>Summary</b>		<b>121-124</b>
