

C O N T E N T S

PART - I

Some studies on keto carbenes addition to double bonds and related reactions.

	Page
CHAPTER-I A general Introduction to carbene chemistry.	
Section-A Historical background	1
Section-B Singlet and triplet state of carbene	4
Section-C Nature of the transition state for C-H insertion and addition of carbene to double bond.	20
Section-D Effects of carbene reactions	25
Section-E General procedure for carbene generation	36
CHAPTER-II Some aspects of keto carbene reactions.	
Section-A A short review on keto carbene and their reactions	43
Section-B Mechanistic pattern of keto carbene addition to double bonds	54
CHAPTER -III Reactions of diazoketones with cinnamic esters.	

Section-A	Aims and objects	30
Section-B	Results and discussions	63
Section-C	Experimentals	101
CHAPTER-IV	Reactions of diazo ketones with some olefinic systems.	
Section-A	Aims and objects	138
Section-B	Results and discussions	139
Section-C	Experimental	149
CHAPTER-V	Intra molecular keto carbene addition to aromatic system.	
Section-A	Aims and objects	155
Section-B	Results and discussions	156
Section-C	Experimental	157
CHAPTER-VI	Relative catalytic activity of metal ions in carbene reactions.	
Section-A	Objects, Results and discussions	166 167
CHAPTER-VII	Potassium t-butoxide treatment on cyclopropyl ketones.	
Section-A	Aims and objects	168
Section-B	Results and discussion	174
Section-C	Experimental	176

PART -II

Reactions of diazomethane with cinnamic esters and other olefins.

CHAPTER -I

Section-A	A short review on the structure of diazomethane and 1,3 cyclo addition and various reactions of diazomethane with olefinic double bonds.	190
Section-B	Aims and objects	200
Section-C	Results and discussions	202
Section-D	Experimental	210

CHAPTER-II

Section-A	Aims and objects of the decomposition of diazomethane with metal catalyst.	214
Section-B	Results and discussion	215
Section-C	Experimental	216
