

# LIST OF TABLES

## CHAPTER II

Table II.C.1. Optimization of the reaction conditions	41-42
Table II.C.2. Reaction of different 2-aminopyridines with different acetophenones to synthesise imidazo[1,2-a]pyridines	42
Table II.C.3. Preparation of library of 3-sulfenylimidazo[1,2-a]pyridines from multicomponent reaction of 2-aminopyridines, acetophenone and thiol under the optimized reaction condition	43
Table II.C.4. Recyclability of GO in three-component tandem reaction of 2-aminopyridine, acetophenone and phenylthiol	44

## CHAPTER III

Table III.C.1. Optimization of sequential dehydration-hydrothiolation reaction conditions	62
Table III.C.2. Graphene oxide (GO)-catalyzed reaction of <i>sec.</i> aryl alcohols with different thiols	64
Table III.C.3. Recyclability test of GO in carbocatalysis of one-pot sequential dehydration-hydrothiolation of 1(2-naphthyl)ethanol and 4-Chlorobenzenethiol	65

## CHAPTER IV

Table IV.C.1. Optimization of one-pot sequential substitution-hydrothiolation of allylic substrate with excess benzenethiol over silica at room temperature	83
Table IV.C.2. Regioselective one-pot synthesis of 1,2- and 1,3-Dithioethers using dry (pre-calcined) or moist silica gel at room temperature	84-85

## CHAPTER V

Table V.C.1. Optimization of the one-pot thiobenzamide synthesis reaction	105
Table V.C.2. Reactions of different diaryl disulfides with DMF	105-106
