

## TABLE OF CONTENTS

Abstract.....	i-ii
Preface.....	iii
List of Tables.....	viii
List of Schemes.....	ix-xi
List of Figures.....	xii-xiii
Abbreviation.....	xiv
List of Publication.....	xv-xvi
<b>Chapter I. Introduction.....</b>	<b>1-57</b>
I.A. N-heterocyclic carbenes.....	2
I.A.1. Synthesis and characteristic of NHCs.....	4
I.A.2. Reactivity and ligand properties of NHCs.....	6
I.A.3. Electronic character of NHCs.....	8
I.A.4. Steric effect in M-(NHC) bond.....	9
I.A.5. NHCs as ligand and replacement of phosphines.....	10
I.B. Synthesis and catalytic activity of Pd-NHC complexes.....	13
I.B.1. Synthesis of Pd-NHC Complexes.....	13
I.B.1.1. Method-A.....	15
I.B.1.2. Method-B.....	17
I.B.1.3. Method-C.....	21
I.B.2. Abnormal Pd-NHC complexes.....	23
I.B.3. Catalytic activity of Pd-NHC Complexes.....	25
I.B.3.1. C-C bond formation.....	25
I.B.3.1a. Mizoroki-Heck reaction.....	25
I.B.3.1b. Suzuki-Miyaura cross-coupling.....	28
I.B.3.1c. Sonogashira cross-coupling reaction.....	31

I.B.3.1d. Negishi cross-coupling reaction.....	33
I.B.3.1e. Kumada-Tamao-Corriu cross-coupling.....	34
I.B.3.1f. The Stille reaction.....	35
I.B.3.1g. Hiyama cross-coupling reaction.....	36
I.B.3.2. Miscellaneous reaction.....	37
I.B.3.2a. Oxidation of alcohol.....	37
I.B.3.2b. Oxidative esterification.....	38
I.B.3.2c. Oxidation of methane.....	38
I.B.3.2d. $\alpha$ -Arylation of ketones.....	39
I.B.3.2e. Direct C-H arylation.....	39
I.B.3.2f. Semihydrogenation of alkynes.....	41
I.B.3.3. Pd-NHC catalyzed C-N bond formation.....	41
I.B.3.4. C-S bond formation.....	45
I.C. References.....	47

**Chapter-II. Synthesis of Benzimidazole Based Palladium-*N*-Heterocyclic Carbene Complexes as Useful Catalyst for C-C Cross-Coupling Reaction at Ambient Conditions.....58-81**

II.A. Introduction.....	59
II.B. Present work: Background, objective and strategy.....	60
II.C. Present work: Result and discussion.....	60
II.C.1. Synthesis of benzimidazole-base Pd-NHC complexes.....	60
II.C.2. Suzuki coupling reaction.....	62
II.C.3. Synthesis of aryl ketone.....	68
II.D. Conclusion.....	70
II.E. Experimental.....	70
II.E.1. General consideration.....	70
II.E.2. Preparation of Pd-NHC (catalyst-A and B).....	70

II.E.3. Spectral analysis of catalyst A and B.....	71
II.E.4. General procedure for Suzuki reaction.....	74
II.E.5. Spectral analysis of Suzuki coupled products.....	74
II.E.6. General procedure for unsymmetrical ketone synthesis.....	77
II.E.7. Spectral analysis of aryl ketones.....	77
II.F. References.....	79
<b>Chapter-III. Synthesis of 6-Aryl Substituted 4-quinolones via Pd-NHC Catalyzed Suzuki Cross-Coupling.....</b>	<b>82-100</b>
III.A. Introduction.....	83
III.B. Present work: Background, objective and strategy.....	84
III.C. Present work: Result and discussion.....	85
III.D. Conclusion.....	90
III.E. Experimental.....	90
III.E.1. General consideration.....	90
III.E.2. Preparation of compound 1.....	90
III.E.3. Spectral analysis of compound 1.....	91
III.E.4. Preparation of N-methylated derivatives.....	91
III.E.5. Spectral analysis of N-methylated derivatives.....	92
III.E.6. Preparation of bromo derivatives.....	93
III.E.7. Spectral analysis of bromo derivatives.....	93
III.E.8. Preparation of 6-aryl substituted 4-quinolones.....	94
III.E.9. Spectral analysis of 6-aryl substituted 4-quinolones.....	94
III.F. References.....	98
<b>Chapter-IV. A Straight Forward Synthesis of 4-Aryl Substituted 2-quinolones via Pd-NHC Catalyzed Heck Reaction.....</b>	<b>101-117</b>
IV.A. Introduction.....	102
IV.B. Present work: Background, objective and strategy.....	103

IV.C. Present work: Result and discussion.....	104
IV.D. Conclusion.....	110
IV.E.Experimental.....	110
IV.E.1. General consideration.....	110
IV.E.2. General procedure for Heck reaction.....	110
IV.E.3. Spectral analysis of Heck coupled products.....	110
IV.E.4. General procedure for synthesis of 4-aryl 2-quinolones.....	113
IV.E.5. Spectral analysis of 4-aryl 2-quinolones.....	113
IV.F. References.....	115
<b>Bibliography.....</b>	<b>118-136</b>
<b>Index.....</b>	<b>137</b>
