

LIST OF TABLES

CHAPTER-I		Page No.
Table-I.1. Pd-NHC naphthquinone complex (12) catalyzed Heck coupling reactions.....		26
Table-I.2. [Pd(IAd) ₂] (13) catalyzed Suzuki coupling reaction of aryl chlorides.....		28
Table-I.3. Effect of substitution at the allyl moiety on pre-catalyst performance in the Suzuki-Miyaura coupling of simple substrates.....		30
Table-I.4. Sonogashira reaction catalyzed by Batey's Pd-NHC complex.....		32
CHAPTER-II		
Table-II.1. Optimization of Suzuki coupling of 4-iodotoluene and phenylboronic acid.....		63
Table-II.2. Catalyst screening and loading experiment.....		64
Table-II.3. Suzuki cross coupling reaction of mono aryl halides.....		65
Table-II.4. Suzuki cross-coupling of hetero aryl halides.....		67
Table-II.5. Multi Suzuki cross coupling reaction in one step.....		68
Table-II.6. Cross coupling reaction of acid chlorides with arylboronic acids.....		69
CHAPTER-III		
Table-III.1. Standardization of Suzuki coupling.....		87
CHAPTER-IV		
Table-IV.1. Optimization studies of reaction condition in Heck coupling between 4-iodoanisole and butylacrylate.....		105
Table-IV.2. Heck coupling of aryl halides with different olefins.....		106
Table-IV.3. Optimization for reaction between 4-bromoanisole and styrene.....		107

LIST OF SCHEMES

CHAPTER-I	Page No.
Scheme-I.1. Wanzlick Carbene Dimer.....	2
Scheme-I.2. Deprotonation of tetraphenylimidazolium perchlorate.....	3
Scheme-I.3. Synthesis of Arduengo carbene.....	3
Scheme-I.4. Methods for synthesis of <i>N</i> -heterocyclic carbenes.....	5
Scheme-I.5. Wanzlick's Hg- <i>NHC</i> complex.....	14
Scheme-I.6. Herrmann's Pd- <i>NHC</i> complexes.....	14
Scheme-I.7. Common synthetic method to Pd- <i>NHC</i> complexes.....	15
Scheme-I.8. Synthesis of complex 12	15
Scheme-I.9. Synthesis of complex 13	16
Scheme-I.10. Synthesis of complex 14	16
Scheme-I.11. Synthesis of [(NHC)Pd(π -allyl)Cl] complexes.....	16
Scheme-I.12. Synthesis of monomeric IPr-Pd complex 21	17
Scheme-I.13. Synthesis of complex- 22 using KHMDS as base.....	17
Scheme-I.14. Synthesis of complex 23 using KO <i>t</i> Bu as base.....	18
Scheme-I.15. Synthesis of [(IPr)Pd(allyl)Cl] and [(SIPr)Pd(allyl)Cl].....	19
Scheme-I.16. Synthesis of complex 34	19
Scheme-I.17. Synthesis of benzimidazole based Pd- <i>NHC</i> complex 35	19
Scheme-I.18. Synthesis of bridged Pd- <i>NHC</i> complexes.....	20
Scheme-I.19. Synthesis of sulfonate-functionalized Pd- <i>NHC</i> complexes.....	20
Scheme-I.20. Synthesis of [(IPr)Pd(acac)Cl] complex.....	21
Scheme-I.21. Synthesis of [(NHC) ₂ PdCl ₂] complex 43	22
Scheme-I.22. Synthesis of picolyl Pd- <i>NHC</i> complexes.....	22
Scheme-I.23. Synthesis of pyrimidine functionalized chelated Pd- <i>NHC</i> complexes.....	23
Scheme-I.24. Synthesis of thioether-functionalized Pd- <i>NHC</i> complexes.....	23
Scheme-I.25. Abnormal binding mode in <i>NHC</i> coordination.....	24
Scheme-I.26. Synthesis of normal and abnormal Pd- <i>NHC</i> complex.....	25
Scheme-I.27. General scheme from Heck coupling reaction.....	25
Scheme-I.28. Pd- <i>NHC</i> complex 57 and 58 catalyzed Heck coupling reactions.....	27
Scheme-I.29. General scheme for Suzuki coupling reaction.....	28
Scheme-I.30. Suzuki coupling of aryl sulfonates and aryl sulfamates.....	31

Scheme-I.31. General reaction scheme of Sonogashira cross-coupling.....	31
Scheme-I.32. General scheme for Negishi cross-coupling reaction.....	33
Scheme-I.33. Pd-PEEpsi-IPent catalyzed Negishi cross-coupling.....	34
Scheme-I.34. General reaction Scheme for Kumada-Tamao-Corriu cross-coupling.....	34
Scheme-I.35. [Pd((μ -Cl)Cl(SIPr)) ₂] catalyzed Kumada cross-coupling reaction.....	35
Scheme-I.36. General reaction scheme for the Stille reaction.....	35
Scheme-I.37. First example of Pd-NHC catalyzed Stille reaction.....	36
Scheme-I.38. Stille reaction in presence of TBAB.....	36
Scheme-I.39. General reaction scheme for Hiyama cross-coupling reaction.....	36
Scheme-I.40. General reaction scheme for Pd-NHC catalyzed oxidation of alcohol.....	37
Scheme-I.41. Oxidative kinetic resolution of alcohols using chiral bis-NHC-Pd complexes.....	38
Scheme-I.42. Oxidative esterification of benzyl alcohol.....	38
Scheme-I.43. Pd-NHC catalyzed oxidation of methane.....	39
Scheme-I.44. [(NHC)Pd(ally)Cl] catalyzed α -arylation of ketones.....	39
Scheme-I.45. Direct arylation using benzaldehyde as the directing group.....	40
Scheme-I.46. Intramolecular direct arylation reactions with aryl chlorides.....	40
Scheme-I.47. [Pd(NHC)(cinnamyl)Cl] catalyzed C-H arylation of heterocycles.....	40
Scheme-I.48. Pd-NHC catalyzed transfer semihydrogenation.....	41
Scheme-I.49. Coupling of electron -poor anilines with electron-rich aryl chlorides.....	42
Scheme-I.50. Amination of aryl chlorides with amides.....	43
Scheme-I.51. Catalytic activity of Pd-NHC complexes in C-N bond formation.....	44
Scheme-I.52. [Pd-PEPpsi-IPent] catalyzed C-S bond formation reaction.....	45
Scheme-I.53. [(NHC)Pd(R-allyl)Cl] complex catalyzed C-S bond formation.....	46

CHAPTER-II

Scheme-II.1. Synthesis of benzimidazole base-Pd-NHC complexes.....	61
Scheme-II.2. Two different cross coupling in one pot.....	69

CHAPTER-III

Scheme-III.1. General synthesis of 4-quinolones.....	85
Scheme-III.2. Synthesis of <i>N</i> -methylated derivatives of 4-quinolones.....	86
Scheme-III.3. Synthesis of 6-bromo-4-quinolone derivatives.....	86

Scheme-III.4. Synthesis of 6-aryl-4-quinolones.....	88
Scheme-III.5. Suzuki cross coupling with heteroarylboronic acids.....	89

CHAPTER-IV

Scheme-IV.1. Synthesis of 4-aryl-2-quinolone via Heck coupling and cyclization...	108
Scheme-IV.2. Synthesis of structurally diverse 4-aryl-2-quinolones.....	109
