

## List of tables

---

### Chapter II

Entry	Table No.	Title of tables	Page No.
1	Table.II.B.1.	Epoxidation of steroids on silica under solvent free condition	28
2	Table.II.B.2.	Chemicals used for the present investigation	28

---

### Chapter III

Entry	Table No.	Title of tables	Page No.
1	Table.III.B.1.	Selective synthesis of mono and dioxime from 1, 2 dicarbonyl system	63
2	Table.III.B.2.	Synthesis of oxime from aromatic monocarbonyl system	64
3	Table.III.B.3.	Synthesis of alicyclic and steroidal oximes	65
4	Table.III.B.4.	Chemicals used for the present investigation	66
5	Table.III.B.5.	Melting point comparison of known prepared oximes with authentic samples	70

---

### Chapter IV

Entry	Table No.	Title of tables	Page No.
1	Table.IV.B.1.	Selection of iron salts	102
2	Table.IV.B.2.	FeCl <sub>3</sub> -mediated transformation of aldehydes to nitriles	103
3	Table.IV.B.3.	Chemicals used for the present investigation	104

---

## Chapter V

Entry	Table No.	Title of tables	Page No.
1	Table.V.B.1.	Optimization of temperature	136
2	Table.V.B.2.	Optimization of catalyst at 60 °C	137
3	Table.V.B.3.	Optimization of temperature in the presence of 10 mol % catalyst	137
4	Table.V.B.4	Screening of solvent	138
5	Table.V.B.5	MgCl <sub>2</sub> .6H <sub>2</sub> O catalyzed synthesis of 2-substituted benzimidazole	139
6	Table.V.B.6	Chemicals used for the present investigation	140

## Chapter VI

Entry	Table No.	Title of tables	Page No.
1	Table.VI.B.1.	Model reaction on pure silica	171
2	Table.VI.B.2.	Optimization of temperature	172
3	Table.VI.B.3.	Screening of catalyst recycling	172
4	Table.VI.B.4	Comparative profile of the atom compositions according to EDX measurements	179
5	Table.VI.B.5	Synthesis of 2, 4, 5-trisubstituted imidazole	182
6	Table.VI.B.6	Synthesis of 1, 2, 4, 5-tetrasubstituted imidazole	183
7	Table.VI.B.7	Chemicals used for the present investigation	184
