Abstract.....	iv
Preface.....	viii
List of Tables.....	xvii
List of Figures.....	xviii
List of Schemes.....	xxxi
List of Appendices	
Appendix A: Research papers published/ communicated/ under preparation.....	xxxviii
Appendix B: List of Research Papers in the Proceedings of National/ International Seminar/ Conference/Workshop.....	xxxix
Appendix C: Abbreviations.....	xli

## Chapter I

### **Carbocyclic compounds and their transformative reactions: A general perspective on natural products chemistry**

---

I.1 Carbocyclic compounds.....	2
I.2 Natural products and carbocyclic compounds.....	2
I.3 Steroids.....	5
I.3.1 Recent selective transformative reactions on cholesterol and $\beta$ -sitosterol.....	6
I.3.1.1 Recent transformative reactions on cholesterol.....	7
I.3.1.2 Recent advances in the $\beta$ -sitosterol chemistry.....	17
I.4 Pentacyclic Triterpenoids .....	24
I.4.1 Different groups of pentacyclic triterpenoids.....	25
I. 4.1.1 Friedelane triterpenoids.....	25
I. 4.1.2 Lupane triterpenoids.....	26
I. 4.1.3 Ursane and oleanane triterpenoids.....	27
I. 4.1.4 Serratane and $\Psi$ -taraxastane triterpenoids.....	28
I.4.2 Recent advances in the transformative reactions on pentacyclic triterpenoids.....	28
I.5 Some steroid- and PT-based marketed drugs .....	58

I.6 References.....	60
---------------------	----

## Chapter II

### First report of solvent selective steroidal aromatization, efficient access to 4 $\beta$ ,7 $\alpha$ -dihydroxy steroids, and syntheses of natural diaromatic ergosterols

---

II.A A short review on the action of selenium dioxide on steroids.....	63
II.A.1 Introduction of selenium dioxide as a reagent for organic syntheses.....	63
II.A.2 Application of the reagent on steroids.....	64
II.A.2.1 Biological consequences of 4- and/ or 7-hydroxy steroids.....	71
II.B A brief review on steroidal aromatization reactions.....	72
II.B.1 From dieneones.....	73
II.B.2 From enone and diene.....	79
II.C Present work .....	82
II.C.1 Background and abstract of the work.....	82
II.C.2 Results and discussion.....	82
II.C.2.1 SeO <sub>2</sub> -oxidation of cholesterol, cholesteryl acetate and cholesteryl benzoate.....	82
II.C.2.2 Study of the solvent dependent product ratio.....	84
II.C.2.3 Raising the yield of 4 $\beta$ ,7 $\alpha$ -dihydroxycholesterol.....	86
II.C.2.4 Application of the reaction protocol: syntheses of the diaromatic Natural ergosterols.....	87
II.C.2.5 Mechanistic concern towards aromatization.....	88
II.C.2.6 Further extention.....	90
II.C.2.7 Description of the molecular structures of 447 and 456.....	90
II.D Experimental .....	92
II.D.1 General .....	92
II.D.2 X-ray crystallography.....	93
II.D.3 Representative procedure for the oxidation reactions.....	93
II.D.4 Product characterization.....	94
II.D.5 NMR Spectral Data Comparison of Natural and Synthetic Diaromatic Ergosterol (457) in CDCl <sub>3</sub> .....	99
II.E Conclusion.....	100

II.F Supporting spectra ( <sup>1</sup> H NMR, <sup>13</sup> C NMR, DEPT-135 NMR, mass).....	100
II.G References.....	119

### Chapter III

#### **Polyhydroxy and epoxy-polyhydroxy steroids: design, synthesis, and study of their preliminary gelation behaviour**

---

III.A Introduction.....	122
III.A.1 A brief review on the polyhydroxy steroids .....	122
III.A.1.1 Natural abundance.....	122
III.A.1.1.1 Isolated from plants.....	122
III.A.1.1.2 Isolated from animals.....	124
III.A.1.1.2.a From coral.....	124
III.A.1.1.2.b From sponge.....	131
III.A.1.1.2.c From fungus.....	139
III.A.1.1.2.d From starfish.....	139
III.A.1.1.2.e From mollusca.....	144
III.A.1.1.3 Miscellaneous.....	145
III.A.1.2 Synthetic polyhydroxy steroids.....	157
III.A.2 A brief review on the epoxy- and epoxy-polyhydroxy steroids.....	165
III.A.2.1 Natural abundance.....	165
III.A.2.1.1 Isolated from plants.....	165
III.A.2.1.2 Isolated from animals.....	166
III.A.2.1.2.a From coral.....	166
III.A.2.1.2.b From mushroom.....	169
III.A.2.1.2.c From algae.....	169
III.A.2.1.2.d From sponge.....	169
III.A.2.1.2.e From mollusc.....	172
III.A.2.1.2.f From starfish.....	172
III.A.2.2 Synthetic epoxy- and epoxy-polyhydroxy steroids.....	172
III.A.2.3 Biologically important epoxy- and epoxy-polyhydroxy steroids.....	193
III.A.2.4 Transformative reactions on epoxysteroids.....	194

III.B Present work.....	197
III.B.1 Abstract of the work.....	197
III.B.2 Design and Synthesis.....	197
III. B.2.1 Background and design of the work.....	197
III.B.2.2 Preparation of the starting materials.....	198
III.B.2.3 Synthesis of epoxy-polyhydroxy steroids.....	199
III.B.2.4 Synthesis of tetra- and pentahydroxy steroids.....	202
III.B.2.5 Structural feature: H bonding .....	203
III.B.3 Application of the epoxy-polyhydroxy and polyhydroxy steroids: study of their preliminary gelation behaviour.....	204
III.B.3.1 Introduction: Gelation, low molecular-weight gelation (LMWG), and gelation of steroid molecules.....	204
III.B.3.2 Present work.....	206
III.B.3.2.1 Preparation of the gels: tests in different solvents.....	206
III.B.3.2.2 Phase selective gelation ability.....	207
III.B.3.2.3 Gel melting temperatures ( $T_{gel}$ ) and related physical parameters.....	209
III.B.3.2.4 Rheological behaviour.....	210
III.B.3.2.5 Morphology through electron microscopes.....	212
III.B.3.2.6 Justification of the gelation abilities of the synthesized steroids through their presumable molecular interactions....	217
III.C Experimental.....	219
III.C.1 General.....	219
III.C.2 Representative reaction for the syntheses of the epoxy-polyhydroxy steroids...219	
III.C.3 Representative reaction for the syntheses of the tetra- and pentahydroxy steroids.....	220
III.C.4 Characterization of the products.....	220
III.D Conclusion.....	224
III.E Supporting spectra.....	225
III.F References.....	245

## Chapter-IV

### Syntheses of new friedelane triterpenoids: A-ring modifications including 2-homoderivatives

---

IV.A Introduction: A brief review on the A-ring modified friedelane triterpenoids.....	248
IV.A.1 Naturally occurring A-ring modified friedelane triterpenoids.....	248
IV.A.2 Synthetic A-ring modified friedelane triterpenoids.....	255
IV.A.2.1 Oxidative transformations.....	257
IV.A.2.2 Reductive transformations .....	259
IV.A.2.3 Transformations based on both oxidation and reduction reactions.....	260
IV.A.2.4 Photochemical transformations .....	261
IV.A.2.5 Rearrangement-based transformations.....	263
IV.A.2.6 Transformative reactions of bromo-friedelane triterpenoids.....	265
IV.A.2.7 Other transformations.....	266
IV.A.2.8 Additional bioactivities and concluding remarks.....	272
IV.B Present work .....	274
IV.B.1 Background and abstract of the work.....	274
IV.B.2 Results and Discussion.....	274
IV.B.2.1 Extraction and isolation of friedelin and from <i>Quercus suber</i> bark.....	274
IV.B.2.2 Action of Vilsmeier-Haack reagent on friedelin: Syntheses of 3-chlorofriedel-2-ene ( <b>1327</b> ), 3-chloro-2-formylfriedel-2-ene ( <b>1328</b> ), 3-hydroxy-2-formylfriedel-2-ene ( <b>1329</b> ) and 4 $\alpha$ -hydroxy-3-chloro-2-formylfriedel-2-ene ( <b>1330</b> ).....	274
IV.B.2.2.1 A-ring modified friedelanes.....	276
IV.B.2.2.1.a Extraction and isolation of cerin ( <b>116</b> ) from <i>Quercus suber</i> bark.....	276
IV.B.2.2.1.b Reaction of 3-chlorofriedel-3-ene ( <b>1327</b> ) with selenium dioxide.....	276
IV.B.2.2.1.c Reaction of 3-chlorofriedel-3-ene ( <b>1327</b> ) with <i>m</i> -CPBA.....	277
IV.B.2.2.1.d Reaction of 3-chlorofriedel-3-ene ( <b>1327</b> ) with	

<i>N</i> -bromosuccinimide.....	277
IV.B.2.2.1.e Synthesis of 3,4-secofriedelane-3,4-diol.....	278
IV.B.2.2.1.f Synthesis of 3- <i>epipachysandiol</i> A.....	278
IV.B.2.2.1.g Synthesis of 3 $\beta$ -amino-4 $\alpha$ -hydroxyfriedelane from friedelin.....	279
IV.B.2.2.2 2- <i>Homofriedelanes</i> .....	280
IV.B.2.2.2.a Synthesis of 3-chloro-friedel-2-ene-2-carboxaldoxime.....	280
IV.B.2.2.2.b Reduction of 3-chloro-2-formylfriedel-2-ene into its 2-hydroxymethyl derivative.....	280
IV.B.2.2.2.c Synthesis of 3-chlorofriedel-2ene-2-carboxamide.....	281
IV.B.2.2.2.d Allylic hydroxylation of 2-formyl derivative <b>1328</b> with SeO <sub>2</sub> .....	281
IV.B.2.2.2.e Transformation of 2-hydroxymethyl derivative <b>1344</b> with SeO <sub>2</sub> .....	282
IV.B.2.2.2.f Preparation of the oxime derivative of <b>1330</b> .....	282
IV.B.2.2.2.g Synthesis of 3-chloro-4 $\alpha$ -hydroxy-2- hydroxymethylfriedel-2-ene.....	283
IV.B.2.2.3 Heterocycle-linked <i>homofriedelanes</i> .....	283
IV.C Experimental .....	284
IV.C.1 General.....	284
IV.C.2 General procedure for the Vilsmeier-Haack reaction of friedelin (d0).....	285
IV.C.3 General procedure for the reduction with NaBH <sub>4</sub> .....	285
IV.C.4 General procedure for the acetylation reactions .....	285
IV.C.5 General procedure for the oximation reactions.....	286
IV.C.6 Procedure for the synthesis of nitrile 3-chlorofriedel-2-ene-2- -carboxamide <b>1346</b> from oxime <b>1343</b> .. .....	286
IV.C.7 Oxidation of 3-chlorofriedel-2-ene with <i>m</i> CPBA.....	286
IV.C.8 Allylic hydroxylation by selenium dioxide.....	286
IV.C.9 General procedure for the syntheses of heterocycle-linked 2- <i>homofriedelanes</i> .....	287
IV.10 Characterization of the compounds... ..	287
IV.D Conclusion.....	297
IV.E Supporting spectra.....	297

IV.F References.....	337
Bibliography.....	338
Index.....	380
