Abstract		i-ii
Preface		iii-iv
Chapter I INTRODUCTION		
1.	Introduction	1-2
1.1.	Location	2-3
1.2.	General feature	3
	1.2.1. Topography	3-4
	1.2.2. Geology	4-5
	1.2.3. Soil	5
	1.2.4. River and Drainage	6-7
1.3.	Climate	7-8
	1.3.1. Rainfall	8
	1.3.2. Temperature	8-9
	1.3.3. Relative humidity	11-12
1.4.	Communication Network	12
1.5.	Biological Resource	12
	1.5.1. Flora	13-14
	1.5.2. Fauna	14
1.6.	Past Floristic work	15-16
	1.6.1. Past floristic study on ferns and Fern-allies	16-18
	1.7. Aims and Objective	19
Chapter II MATERIALS AND METHODS		
2.1.	Selection of the Vegetation for Survey and Collection	20-21

2.1.1.	Collection and Preservation of Materials	21
2.1.2.	Field Note Book	22
2.1.3.	Identification	22
2.1.4.	Enumeration and Description	22-23
2.2.	Phytosociological Studies	23
2.2.1.	Location of the Study area	23
2.2.2.	Sampling	23-24
2.2.3.	Phyto-Sociological analysis	25
2.2.3.1.	Density	25
2.2.3.2.	Frequency	25
2.2.3.2.	Abundance	26
2.2.3.4.	Basal Area	26
2.2.3.5.	Importance value Index	27
2.2.4.	Diversity Indices	27
2.2.4.1.	Species Diversity	27
2.2.4.2.	Species richness	28
2.2.4.3.	Concentration of Dominance	28-29
2.2.5.	Local utilization of Fern and their allies	29
Chapter III TAXONOMIC ENUMERATION		
3.	Key to families	30-33

3.1.	Enumeration of Pteridophytic Flora of Darjiling Hills	33-247
3.2.	Result	248-251
3.3.	Discussion	251-253
3.4.	Conclusion	253
3.5.	Summary	253-255

#### Chapter IV PHYTOSOCIOLOGICAL STUDIES

4.	Introduction	256
4.1.	Result	257-268
4.2.	Discussion	269
4.3.	Conclusion	269
4.4.	Summary	270-271

#### Chapter V UTILIZATION OF FERN AND FERN ALLIES

5.	Introduction	
5.1.	Utilization of Fern and Fern allies	272-274
5.2.	Result	275-279
5.3.	Discussion	280
5.4.	Conclusion	280-281
5.5.	Summary	281
	Reference	282-290
	Appendices	291-308
	Index	309-312
