

List of Figures

Figure 1.1 : Plot of the dissension between the observed and expected rotational curve for the Milky Way.	5
Figure 2.1. Plot of equation of state function showing its non-Newtonian values as discussed in subsection 2.2.2.	29
Figure 2.2. Plot of equation of state function showing the transition behavior as discussed in subsection 2.2.2.	30
Figure 2.3. Plot of equation of state function indicating repulsive gravity as discussed in subsection 2.2.2.	31
Figure 3.1. Plot of rotational curve for the galaxy ESO1870510 (for PI profile).	57
Figure 3.2. Plot of the logarithmic slope of the density profile for the galaxy ESO1870510 (for PI profile).	58
Figure 3.3. Plot of the logarithmic slope of the rotational curve profile for the galaxy ESO1870510 (for PI profile).	58
Figure 3.4. Plot of rotational curve for the galaxy ESO1870510 (for NFW profile).	59
Figure 3.5. Plot of the logarithmic slope of the density profile for the galaxy ESO1870510 (for NFW profile)	59
Figure 3.6. Plot of the logarithmic slope of the rotational curve profile for the galaxy ESO1870510 (for NFW profile).	60
Figure 3.7. Plot of the logarithmic slope of the density profile (for Case-I) with $D=0.01$ and $l=0.000001$	60
Figure 3.8. Plot of the logarithmic slope of the rotational curve profile (for Case-I) with $D=0.01$ and $l=0.000001$	61
Figure 3.9. Plot of rotational curve (for Case-II) with $D=0.01$ and $l=0.000001$	61
Figure 3.10. Plot of the logarithmic slope of the density profile (for Case-II) with $D=0.01$ and $l=0.000001$	62

Figure 3.11. Plot of the logarithmic slope of the rotational curve profile (for Case-II) with $D=0.01$ and $l=0.000001$	62
Figure 6.1. Plot of the square of the tangential velocity w.r.t R (cm) using Eq.(6.26) for ESO 1200211.	111
Figure 6.2. Plot of the expression (6.31) w.r.t R (cm) for ESO 1200211. . .	114
Figure 6.3. Plot of the expression (6.40) for ESO 1200211. The orbits are unstable as discussed in section 6.4	119
Figure 6.4. Plot of the expression (6.40) for ESO 1200211. The orbits are unstable in some intermediate radii as discussed in section 6.4	120
Figure 6.5. Plot of the expression (6.40) for ESO 1200211. The orbits are stable in the entire chosen region as discussed in section 6.4	121
Figure 6.6. Plot of the density profile w.r.t. r for three profiles for the Milky Way. The bottom one is for the BEC profile, the middle one is due to Burkert profile and the upper most curve represents NFW profile. Data taken from [56]	129

List of Tables

Table 1. Lower bound on average density [eq. (6.46)].	134
Table 2. Central densities of dark matter and upper bounds [eq. (6.41)]. . .	135
