

ACKNOWLEDGEMENT

Throughout the journey of my research period at the University of North Bengal, the company of great and wise people has always enriched me and made me a better person. Although a little thank you seems to be powerless to express my deep gratitude, but no other opportunity could be better than this to express how overwhelmed I am by your generosity. I express my heart felt gratitude to all those who kept their faith on me & did contribute in different ways to achieve my goal.

First and foremost I would like to express my humble gratitude to my supervisor Prof. (Dr.) Mahendra Nath Roy, the Honourable Head of the Department, for his encouragement & providing me healthy atmosphere for pursuing research. I would not have been travelled so far without his excellent guidance and flexibility as an academic advisor. It is a pleasure to learn from him and he will always be an inspiration. I am grateful to him for never giving up hopes, in spite of my failures and mistakes during my research work. I thank him for his unconditional faith and trust in me and also for his liberty that he gave me throughout the tenure of my work. Without his motivation and priceless inputs, this dissertation would not have seen daylight. I feel blessed and privileged to work under his superlative guidance.

I express my sincere thanks to present and former faculties of our department for their constant inspiration and encouragement to carry out my research work. Also, I would like to thank all non-teaching staff of our department who extended their affirmative support and help.

I would also like to thank all past and present members of our lab whom I worked with. In particular Dr. Deepak Ekka, Biraj Kumar Barman, Dr. Milan Chandra Roy, Subhadeep Saha, Mitali Kundu, Biswajit Dutta, Kanak Roy, Koyeli Das, Aditi Roy, Ananya Yasmin, Raja Ghosh, Biplab Rajbanshi and Sayanta Roy for their help, encouragement and making a friendly atmosphere in lab. I feel honoured to have company like them in my life.

I would like to express my deepest gratitude to the headmistress, colleagues and friends of my school (Chopra Girls High School) where I have been serving as an Assistant Teacher in Chemistry. I am grateful to them for their invaluable suggestions and friendly cooperation to proceed my research work.

I take this opportunity to sincerely acknowledge the University of North Bengal for providing a second home away from home & a mesmerizing environment. I am also grateful to Departmental Special Assistance Scheme under University Grants Commission, New Delhi (No. F540/27/DRS/2007, SAP-1) for providing financial support & instrumental assistance to give a shape to my research work.

Finally, I would like to express deepest gratitude and affection to my parents for their unconditional love and continuous encouragement throughout my PhD degree to pursue my interest. All of them are like my silent partners who propel me to greater heights with their unrelenting support. The aforesaid list is neither complete in names, nor in deeds of all the people whom I met across my path of progress towards achieving my PhD degree. Thank you all for never letting me down, this dissertation would not have got a complete shape without their blessings.

Once again I am glad to have this chance to pursue my PhD because it has truly been a wonderful experience.
