

ACKNOWLEDGEMENT

Taking up research work quite late in my life was not an easy decision but I have been blessed by the Almighty to have some precious souls who gave wings to my dreams and helped me follow my passion. Though it would not be possible to mention all the people yet I would be failing in my duty if I do not acknowledge those who spared some of their valuable time and put in relentless efforts to help me accomplish this task.

The first name that comes to my mind is of my revered supervisor and thesis advisor Dr. Shanti Chhetry. This would not have been possible without his minute instructions and inspiring guidance through the entire tenure of my research. My heartfelt gratitude is reserved for you, Dr. Shanti Chhetry.

Words would not suffice to express the way I feel indebted to Professor Sanchari Roy Mukherjee and Associate Professor Sudakshina Ray Datta of the Department of Economics, North Bengal University and Dr. Samir Kumar Samanta from Bidhan Chandra Krishi Viswavidyalaya for the immense help they rendered to me.

I am thankful to all the concerned Horticulture Department, the field staff, the District Horticulture Officers and the flower growers of Jaintia Hills, West Khasi Hills and Dimapur districts for their cooperation and guidance that enabled me to effectively collect primary data.

I only have words of appreciation and sincere thanks for Ms. Watila Longkumer and Mr. Amitava Mukherjee's assistance and support who played an integral in the successful completion of my study.

I am extremely grateful to my better half Utpal Banerjee and my loving son Ayush Banerjee who stood by me at every step, constantly encouraging and offering unwavering support in every possible way.

I take this opportunity to thank each and every person who has in some way, directly or indirectly, helped me during this research work.
