

## *ACKNOWLEDGEMENT*

*I am grateful to numerous local and global “peers” who have contributed to give a complete shape of this dissertation. Although it is just my name on the cover, many people have contributed to the research in their own particular way and for that only a few words will not be enough to pay thanks at all. First and foremost I want to thank my advisor Prof. Mahendra Nath Roy, the Honorable Head of the Department of Chemistry, University of North Bengal. It has always been an honor to be his Ph.D. students. He has taught me, both consciously and unconsciously, how good experimental works could reach towards perfection and goals could be achieved. I appreciate all of his contributions of time, ideas, and funding to make my research experience productive and stimulating. His observations and comments helped me establish the overall direction of the research. As my supervisor, he has constantly encouraged me to move forward with investigations in depth to find a new horizon. I thank him for providing me healthy atmosphere for pursuing my work with a talented team of researchers. It would have never been possible for me to travel so far without his guidance and flexibility as an academic advisor. I am thankful to him for never giving up hopes, in spite of my repeated failures during my research period.*

*I express my sincere gratitude to the faculties of our department, Prof. S.K. Saha, Prof. Basudeb Basu, Prof. Pranab Ghosh, Prof. Anirban*

*Mishra, Dr. Pinaki Bandyopadhyay, Dr.A.K.Nanda, Dr. Biswajit Singha, & Dr. Sajal Das for providing necessary facilities and their valuable suggestions to carry out my research work. I would also like to thank all academic staff of our department and University of North Bengal for extending their hands of cooperation whenever needed.*

*I would also like to thank all past and present members of our lab whom I worked with. In particular Kanak Roy, Dr. Deepak Ekka, Ananya Yasmin, Biplab Rajbanshi, Dr. Milan Chandra Roy, Siti Barman, Raja Ghosh, Biswajit Dutta, Subhadeep Saha, Mitali Kundu, Aditi Roy and Koyeli Das for their immense contribution to my personal and professional time at University of North Bengal. I feel delighted to have company like them in my life.*

*I take this opportunity to sincerely acknowledge the University of North Bengal for providing a second home away from home. I am grateful to the University Grants Commission, New Delhi, for Rajiv Gandhi National Fellowship (No.F117.1/201617/RGNF201517SCWES1846) and one-time grant under the Basic Scientific Research awarded to Prof. M. N. Roy (the Grant-in-Aid no. F4-10/2010, BSR), which fulfilled financial and instrumental requirement to complete my research work. I would like to convey my special gratitude to SAIIF, North Eastern Hill University and IIT madras for NMR spectroscopic and Mass spectrometric analysis.*

*I am thankful to the honorable Head Master, all the teaching and academic staff and all the members of Managing Committee of*

Patlakhawa High School (H.S.), Cooch Behar, for their sincere cooperation and encouragement with a friendly environment.

Finally, my parents Sri Binod Chandra Barman and Smt. Binodini Barman, who raised me with a love of science and supported me in all my pursuits, deserve a special mention. Lastly, I would like to thank my elder brother Sri Bikash Barman, my elder sisters Mrs. Swapna Barman, Mrs. Sandhya Barman and Miss. Ratna Barman for their unconditional love and encouragement to pursue my interest. Thanks for the patience they have shown towards my 'relentless pursuit of study'. Without their support and understanding, I would not have been able to find the space and time to concentrate on my academic career.

Last, but not least, I would like to dedicate this thesis to my grandmother Mrs. Anantabala Barman, for her love, patience, care and understanding.
