

# INDEX

---

## 7 INDEX

3

3, 3', 5, 5'-tetramethylbenzidine ..... 51

### A

$\alpha$ -naphthyl acetate ..... 51, 58  
Abdominal hairs ..... 126  
Absorption maxima ..... 54  
Acaricides ..... 27  
Acephate ..... 20  
Acetylcholine receptor ..... 24  
Acetylcholinesterase ..... 24, 26  
Active period ..... 133, 135  
Active sites ..... 111, 115  
Activity ratio ..... iv, xxii, 84, 85, 87, 138, 139  
Aggregative response ..... 131  
Agricultural fields ..... 33  
Agro-ecosystem ..... 6, 17  
Allopatric populations ..... 73  
Amplification ..... 26, 30  
Analytical tool ..... 108  
Anthropogenic disturbances ..... 17, 32  
Aqueous solution ..... 54  
Arrhenotokous ..... 31  
Artificial selection ..... xx, 48, 81, 139  
Asia-pacific ..... 15  
Asymptote ..... 111, 114, 131  
Augmentation ..... 16, 135  
Augmentative release ..... vii, 16, 33, 105  
Autosomal ..... 31  
Axonal transmission ..... 105

### B

Ballooning ..... 32  
Barrier tissues ..... 26  
Baseline information ..... 36  
Behavioral resistance ..... 26  
Bioassay ..... xx, 48, 75, 118

Biochemical assay .....	29
Biological control .....	ix, 16, 18, 32, 36, 129, 131, 179
Bio-organic .....	81
Bio-organically .....	iv, 28, 75, 81, 85, 86, 88, 135, 138, 139
Biotransformation.....	28, 90
Biotypes.....	30, 105
<i>Biston (=buzura) suppresseria</i> .....	9
Bivariate correlation analysis .....	85
Blanket spray.....	79, 140
Bollworm.....	89, 90, 92
Bottleneck effect .....	xx, 98, 105
Bryocorines .....	70

## C

<i>Camellia sinensis</i> .....	2, 3, 73
Cannibalism.....	vi, 63, 123, 133, 140
Canopy .....	3, 123, 133
Carbamate .....	81, 85, 115
Caterpillars .....	iv, 6, 29
Chewing pests .....	33
Chlorpyrifos.....	20
Chorionic processes.....	67
CIB .....	xxii, 77
Cocktail of pesticides .....	98
Cocoon .....	vi, xx, 123, 126, 129, 140
Competition.....	131
Conjugate .....	54
Conspecific.....	123
Consumption time .....	64, 133
Conventional .....	29, 81, 84, 85, 86, 87, 98, 118, 135, 138
Conventionally managed.....	iv, 17, 20, 77, 81, 85, 138
Correlation.....	xxiii, 20, 29, 84, 85, 87, 89, 108, 114, 138, 139
Cosmopolitan .....	6, 77
Courtship .....	vi, ix, xx, 33, 120, 123, 140
Courtship dance.....	120
Crop damage .....	vi, 31, 32
Cross resistance .....	25
Cyclodienes .....	26, 79
Cypermethrin.....	20, 27, 48, 75, 138

Cytochrome C .....	54, 65, 88, 91
Cytochrome P450 monooxygenases.....	iv, 27, 59, 85

## D

Darjeeling hills .....	6, 7, 8, 16
Darjeeling tea .....	38
Darwinian evolution.....	29
DDT .....	25, 26
DEF .....	xxii, 59, 108, 110, 111, 177
Defence enzymes.....	xvii, xx, 27, 28, 35, 51, 55, 56, 58, 59, 65, 81, 86, 89, 90, 92, 105, 109, 110
Defoliant.....	111
Defoliators.....	6
Deltamethrin.....	20, 27, 28
Densitometric analysis .....	59, 94, 103
Density .....	vi, xix, xxiii, 12, 32, 33, 51, 54, 131, 133, 134, 135, 140
Detoxification.....	v, 27, 28, 30, 89, 90, 94, 103, 108, 115, 139
Detoxifying enzymes.....	viii, 26, 27, 29, 30, 59, 63, 90, 94, 105
Development of resistance .....	viii, 25, 27, 30, 35, 77, 79, 98, 105, 138
Developmental period .....	ix, 35, 73, 74, 129, 138
Diamondback moth .....	87
Dieback .....	12
Directional selection.....	105
Diurnal lynx spider.....	32
Diversity .....	6, 17, 33, 135
Dooars .....	iv, vii, xvi, 6, 7, 8, 9, 16, 17, 20, 27, 28, 35, 38, 42, 67, 81, 135, 141, 178
Dose-dependent.....	108
Dose-response curve .....	59, 75, 111, 114
Doses .....	178
Drumming .....	120

## E

Ecosystem .....	16, 17, 31, 33
Edaphic factors .....	3, 21
Efficacy .....	v, 17, 24, 35, 36, 77, 105, 111, 115, 134, 139
Egg parasitism .....	67
Egg sac .....	33, 123, 130
Electrophoregram .....	101
Electrophoresis .....	55, 92, 98
Embryonic period.....	129

Emergence.....	73, 118, 123
Endemic population.....	105
Endophytic .....	67
Endosulfan.....	27, 79
Endpoint .....	51
Enhanced activities.....	111
Environmental contamination .....	21, 120
Enzymatic digestion .....	126
Ester.....	89, 111
Evergreen .....	3
Evolution of pesticide resistance .....	29
Evolutionary processes.....	29
Exchequer.....	3, 20
Experimental arena.....	64, 129

## F

Farming technique.....	20
Fecundity.....	ix, 35, 63, 73, 123
Field level.....	35, 120
Field recommended dose.....	48
Foggy burning disease.....	12
Foothills.....	2, 3, 16, 38, 42, 135
Foraging ability .....	33
Functional group .....	24, 84, 105
Functional response.....	129
Fungicides .....	20

## G

Gamma-aminobutyric acid.....	24
GE .....	xxii, 58, 108
Gene duplication .....	30, 89
General esterases .....	51, 81, 89, 92, 94
Generalist predator .....	vi, 31, 135, 140
Generation .....	v, 48, 51, 58, 65, 89, 90, 92, 94, 98, 101, 103, 139
Genes.....	28, 30, 98
Genetic plasticity.....	30
Glutathione <i>S</i> -transferases.....	27
Gossamer threads .....	32

## H

Half life .....	115
Half the maximum inhibitory concentration .....	177
Hatchability .....	123
HCH .....	26
<i>Helopeltis theivora</i> .....	xvi, xvii, 42, 43, 45, 48, 49, 51, 59, 85, 100, 104, 138, 178, 179
Herbicides .....	20
Heterogeneity .....	84
Himalayas.....	2, 38
Holling's disc equation.....	65
Homogenate .....	xviii, 51, 54, 55, 59, 81, 92, 94, 108, 111, 114
<i>Homona coffearia</i> .....	7, 16
Horticulture .....	20, 115
Hurricane lamp chimneys.....	42
Hydrolysis .....	27, 90
Hydrolytic enzymes.....	111
<i>Hyposidra talaca</i> .....	6, 7, 27, 29

## I

IC <sub>50</sub> .....	xxiii, 59, 111, 115, 177
Imagoes .....	129
Incomplete dominance .....	31
Incubation.....	vi, 42, 59, 63, 123, 126, 133, 140
Incubation period.....	123
Indian union .....	xviii, 39
Indiscriminate application .....	viii, 77, 79
Induction .....	v, 94, 103, 139
Inheritance.....	31
Inhibition .....	v
Insect growth regulator.....	31
Insect rearing cages .....	42
Instar.....	70, 73, 75, 138
Integrated Pest Management .....	xxiii, 17, 24, 36, 67
Integument.....	26
Intra-cohort.....	133
Intra-guild predation.....	133
IPM.....	vii, ix, xxiii, 15, 17, 18, 24, 67, 70, 135
Isozyme profile.....	xvi, xviii, 55, 100, 103, 104

Isozymes.....	v, 58, 94, 98, 101, 103, 111, 115, 139
Iteroparous.....	73

## J

Jalpaiguri.....	xviii, 38, 39, 175
Juveniles.....	67, 129

## K

Kiting.....	32
-------------	----

## L

Labium.....	9
Laboratory culture.....	48
LC <sub>50</sub> .....	xvi, xvii, xviii, 48, 58, 59, 60, 65, 75, 77, 78, 79, 80, 84, 85, 89, 118, 119
LC <sub>80</sub> .....	v, xvi, 48, 79, 80, 89, 90, 139
Leaf dip technique.....	48
Lethal concentration.....	xxiii, 35, 36, 42, 48, 58, 65, 75
Life cycle.....	xvi, xvii, 67, 70, 74, 120, 130
Limiting factors.....	133
Linear relationship.....	84
Lipid content.....	26
Lipophilicity.....	28
Loci.....	31
Longevity.....	ix, 73, 74, 129, 130
Lynx spider.....	vi, 33, 63, 105, 140, 178

## M

<i>Macrocentrus harmonae</i> .....	16
Major pest.....	9, 15, 35, 138
Male palp.....	126
Management.....	v, ix, 6, 15, 17, 18, 20, 21, 24, 30, 31, 32, 33, 35, 120, 135, 138, 139, 140, 179
Mass cultured.....	42
Maximum residue limit.....	ix
Metabolic resistance.....	28, 29, 89, 90, 108
Microcentrifuge.....	51
Microhabitat.....	3
Microplate.....	v, 51, 54, 140
Microplate reader.....	52
Minor pest.....	9, 16

Mirid bug.....	67, 73
Mite pests .....	178
Mode of action .....	xxiii, 24, 79, 103, 105
Molar extinction coefficient .....	54, 55
Monitoring of tolerance level .....	vii, 79
Monocrotophos.....	v, xvi, 20, 48, 58, 75, 79, 80, 88, 89, 91, 105, 138, 139
Mono-factorial.....	31
Monoxygenases .....	35, 85, 89, 94, 103, 115
Morphological characters .....	129
Mortality.....	65, 130
MRLs.....	17
Multifactorial.....	31
Multiple resistance .....	25
Mutation .....	26

## N

Native polyacrylamide gel electrophoreses.....	55
Natural enemies.....	15, 16, 17, 31, 33, 36, 105, 135
NE .....	xxiii, 6, 9, 17, 36, 73, 81, 135
Neonates.....	123
Nerve impulses.....	105
Neurosensory.....	31
Niche .....	135
Nocturnal lynx spiders.....	32
Nonlethal .....	33
Nonparametric .....	108
Nymphal stage.....	126

## O

Obligatory predators.....	v, 31
<i>Oligonychus coffeae</i> .....	8, 9, 27, 29
One way analysis of variance.....	65
Ontogeny .....	129
Optical density.....	51
Organophosphate... iv, xvi, xviii, 35, 48, 58, 63, 75, 77, 79, 81, 90, 92, 98, 100, 103, 104, 111, 118, 138	
Organosynthetic .....	20
Orthologous.....	30
Oviposition site .....	31
Oxidation.....	27, 90

<i>Oxyopes javanus</i> .....	vi, ix, xvii, xix, xx, xxi, 17, 33, 63, 64, 120, 121, 126, 127, 129, 130, 134, 140, 178
<i>Oxyopes salticus</i> .....	32, 33
<i>Oxyopes sweta</i> .....	17

## P

Parametric .....	65
Parasitoids .....	v, 16, 17
Parathion .....	89
Parental care .....	vi, 126, 140
Pearson's correlation coefficient .....	84, 85, 87, 89, 108, 114
Pedipalps .....	120
Per capita predation .....	129, 131
Percent inhibition .....	xvi, xvii, 108, 109, 111, 114
Perennial.....	6
Peroxidase activity .....	58, 94
Perturbed agroecosystem.....	32
Pest control failures.....	21
Pest management.....	21, 36
Pest of national importance .....	iv, 9, 35
Pesticide .iv, v, vii, 17, 18, 20, 21, 24, 25, 36, 42, 48, 51, 55, 58, 59, 63, 92, 94, 103, 104, 138, 139, 140	
Pesticide application.....	17, 18, 86
Pesticide stress.....	17, 28
Pesticide tolerance.....	29, 75, 78, 87, 90, 114, 118
Pests ...viii, ix, xvi, 3, 16, 17, 18, 20, 21, 24, 25, 26, 27, 28, 29, 35, 36, 75, 77, 79, 81, 89, 105, 138, 179	
Phase I .....	27, 90
Phase II.....	27, 90
Pheromone signals.....	33
Phytophagous .....	33
Piperonyl butoxide .....	v, xvi, xix, xxiii, 28, 59, 90, 108, 109, 114, 116, 139
Pixel .....	100, 101, 104
Plant protection code.....	21
Plantation crop.....	179
Polyacrylamide gels .....	98
Polygamous .....	126
Polygenic.....	31
Polyphagous .....	9
Population density .....	12
Population genetics .....	29
Population growth models.....	70

Population size .....	33, 67, 98
Preadaptive .....	81
Predation potential .....	vi, ix, 36, 129
Predation rate .....	32, 129, 131
Predators .....	v, 16, 17, 32, 131, 133, 135
Prey density .....	131
Prey handling time .....	64, 65, 133
Prey-predator interaction .....	131
Primary pest .....	viii
Pronotum .....	70
Prophylactic measure .....	79
Prosoma .....	120
Pyrethroids .....	24, 26, 28, 115, 118

## Q

Qualitative .....	12
Quantitative .....	29
Quick assay technique .....	36
Quinalphos .....	20, 105

## R

Raw volume .....	100, 104
Rearing .....	xx, 16, 42, 63, 123
Rearing technique .....	xx
Recommended field dose .....	98
Red spider mite .....	iv, 9, 27, 29
Reduction .....	27, 81, 90, 98, 101, 131
Relative tolerance .....	29, 84, 85, 88, 91
Reproductive isolation .....	123
Resistance development .....	21, 26, 30, 31, 79
Resistance management .....	30
Resistance ratio .....	iv, v, xxiv, 79, 84, 85, 87, 90, 138, 139
Resistance status .....	120
Respiratory horns .....	67
<i>r</i> -selected .....	75

## S

S, S, S-tributylphosphorotrithioate .....	v
Safety standards .....	24

Sap-feeders .....	6
Scutellar horn .....	70
Scutellum .....	9
Searching efficiency .....	65
Secondary pest outbreaks .....	21
Selection .....	30, 48, 79, 89
Selection pressure.....	21, 30, 98, 138
Self-limiting .....	vi, 133, 140
Seminal receptacles .....	123
Sequesters.....	84
Sexual predation.....	120
Shaded regions .....	12, 70
Skiffing.....	12
Sodium dodecyl sulphate.....	xxiv, 51
Sodium ion .....	25, 26
Specialist predator .....	vi, 140
Sperm packets .....	120, 123
Spiderlings.....	vi, 123, 126, 140
Standard curve.....	xxv, 51, 54, 55, 176
Stress evading mechanism.....	21
Structural analogues .....	105
Sub-himalayan.....	2, 3, 9, 15, 98, 135
Sub-lethal .....	178
Supergene families .....	30, 31
Supernatant.....	51, 54, 55
Survivorship .....	75
Susceptibility .....	iv, 12, 15, 24, 28
Sustainable management .....	67
Synergist.....	v, 35, 59, 90, 105, 108, 111
Synthetic pyrethroid .....	60, 78, 119

## T

Target site insensitivity .....	26
Target site of action.....	24
Tea.....	xx, 2, 3, 7, 8, 9, 16, 20, 21, 27, 33, 38, 64, 77, 175, 178, 179
Tea bushes .....	42, 133
Tea mosquito bug.....	iv, xx, 6, 28, 36, 70, 133, 178, 179
Tea plantations .....	iv, v, vii, 9, 12, 15, 36, 38, 42, 63, 78, 81, 84, 85, 111, 115, 123, 140, 141, 178, 179
Terai .....	iv, v, vii, xvi, 6, 7, 8, 12, 16, 17, 20, 27, 28, 35, 36, , 87, 88, 133, 135, 138, 139, 141, 178

Tiptoe .....	32
Tmb .....	9, 12
Tolerance level .....	iv, v, vii, viii, 12, 24, 35, 42, 48, 75, 77, 79, 81, 105, 118, 119, 139, 140, 179
Topography .....	6
Toxic environment .....	30, 67, 105
Toxicity level.....	90
Transcript .....	28
Tri-trophic relation .....	17
Trophic level .....	133
True bugs.....	70

## U

Up-regulation .....	26
---------------------	----

## V

Vacuum sampler.....	xx, 42
Vegetative clones .....	6
Vibratory signals .....	123
Voltage-gated chloride channel.....	24

## W

West bengal.....	ii, iv, vii, viii, xvi, xviii, xx, 2, 3, 33, 35, 38, 39, 63, 73, , 85, 86, 88, 98, 135, 138, 141
Whole-body homogenate .....	51

## X

Xenobiotics .....	27, 28, 89, 90
-------------------	----------------

## Y

Yolk.....	126, 129
-----------	----------
