## 9 APPENDICES

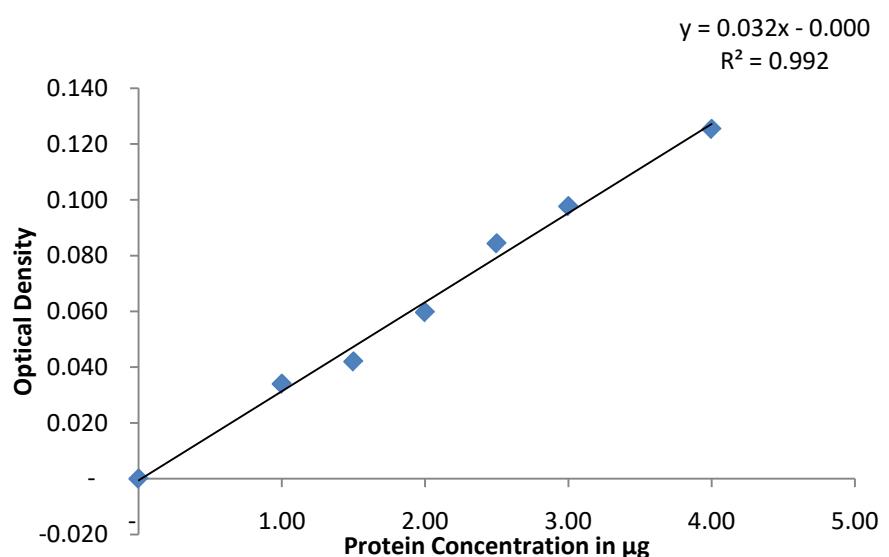

### Appendix-A

#### LIST OF SAMPLING SITES

---

| <b>Sl.<br/>No.</b> | <b>Tea Gardens</b>      | <b>Latitude</b> | <b>Longitude</b> | <b>Block</b> | <b>District</b> |
|--------------------|-------------------------|-----------------|------------------|--------------|-----------------|
| 1                  | Atal Satbhaiya          | 26.6739490      | 88.2117552       | Naxalbari    | Darjeeling      |
| 2                  | Bagrakote               | 26.8751372      | 88.5652404       | Mal          | Jalpaiguri      |
| 3                  | Binnaguri               | 26.7576674      | 89.0504551       | Jalpaiguri   | Jalpaiguri      |
| 4                  | Dalmore                 | 26.7517723      | 89.1301554       | Madarihat    | Jalpaiguri      |
| 5                  | Kalchini                | 26.6980273      | 89.4218054       | Kalchini     | Jalpaiguri      |
| 6                  | Kamalpur                | 26.7112429      | 88.3057880       | Naxalbari    | Darjeeling      |
| 7                  | Kumai                   | 26.9954472      | 88.8111153       | Gorubathan   | Darjeeling      |
| 8                  | Kumargram               | 26.6678478      | 89.8274703       | Kumargram    | Jalpaiguri      |
| 9                  | Lankapara               | 26.7940624      | 89.1862203       | Madarihat    | Jalpaiguri      |
| 10                 | Laxmipara               | 26.8158772      | 88.9981454       | Dhupguri     | Jalpaiguri      |
| 11                 | Longview                | 26.8192146      | 88.2499914       | Kurseong     | Darjeeling      |
| 12                 | Maruti                  | 26.6984098      | 88.3092963       | Naxalbari    | Darjeeling      |
| 13                 | Matigara                | 26.7077459      | 88.3745847       | Matigara     | Darjeeling      |
| 14                 | Nagrakata               | 26.9135666      | 88.8921475       | Nagrakata    | Jalpaiguri      |
| 15                 | North Bengal University | 26.7123224      | 88.3512609       | Naxalbari    | Darjeeling      |
| 16                 | Patharjhora             | 26.9488658      | 88.6517448       | Mal          | Jalpaiguri      |
| 17                 | Samsing                 | 26.9866576      | 88.8064770       | Matiiali     | Jalpaiguri      |
| 18                 | Simulbari               | 26.7920583      | 88.3048597       | Kurseong     | Darjeeling      |
| 19                 | Trihana                 | 26.7617488      | 88.2624352       | Naxalbari    | Darjeeling      |

## **Appendix-B**

**Figure:** BSA standard curve for determination of protein concentration

## Appendix-C

### **DATA MATRIX FOR PROBIT ANALYSIS TO DETERMINE HALF THE MAXIMUM INHIBITORY CONCENTRATION (IC<sub>50</sub>)**

---

- 1) *In vitro* inhibition of GE by DEF \*n=34 for each concentration

| GE Inhibition |            |              |                          |
|---------------|------------|--------------|--------------------------|
| Conc. (mM)*   | X=Log Dose | % Inhibition | Y=Probit of % Inhibition |
| 0.0794        | -1.10      | 7.50         | 4.05                     |
| 0.1658        | -0.78      | 12.88        | 3.82                     |
| 0.2500        | -0.60      | 18.03        | 4.08                     |
| 0.3330        | -0.48      | 29.00        | 4.45                     |
| 0.4762        | -0.32      | 46.52        | 4.92                     |
| 0.6349        | -0.20      | 60.88        | 5.28                     |
| 0.9995        | 0.00       | 75.35        | 5.67                     |
| 1.3333        | 0.12       | 82.25        | 5.92                     |

- 2) *In vitro* inhibition of CYP450 by PBO \*n=34 for each concentration

| CYP450 Inhibition |          |              |                        |
|-------------------|----------|--------------|------------------------|
| Conc. (mM)*       | Log Dose | % Inhibition | Probit of % Inhibition |
| 0.167             | -0.78    | 7.267        | 3.52                   |
| 0.333             | -0.48    | 13.787       | 3.92                   |
| 0.500             | -0.30    | 25.649       | 4.36                   |
| 0.667             | -0.18    | 40.611       | 4.77                   |
| 1.000             | 0.00     | 61.986       | 5.31                   |
| 1.333             | 0.12     | 66.261       | 5.41                   |
| 2.000             | 0.30     | 72.673       | 5.61                   |
| 2.667             | 0.43     | 86.566       | 6.13                   |

## Appendix-D

### LIST OF PUBLICATIONS

---

1. **Kumar Basnet**, Min Bahadur & Ananda Mukhopadhyay, 2017. Change in activity of detoxifying enzymes in directionally selected population of tea mosquito bug (*Helopeltis theivora*) (Heteroptera: Miridae) by an organophosphate insecticide. *Phytoparasitica* Springer Journal. (Accepted for publication)
2. Ananda Mukhopadhyay, Somnath Roy, Soma Das & **Kumar Basnet**, 2016. Pesticide Resistance in Insect and Mite Pests of Tea in Sub-Himalayan Terai–Dooars Plantations: Status, Detection and Possible Management. In: Tea: Technological Initiatives (ed. by N Bag, A Bag & LMS Palni) New India Publishing Agency, New Delhi, India, p. 346.
3. **Kumar Basnet** and Ananda Mukhopadhyay, 2015. Life history of the spider, *Oxyopes javanus* (Araneae: Oxyopidae), an active predator of tea mosquito bug *Helopeltis theivora* (Heteroptera: Miridae) in Terai-Dooars tea plantations. *NBU Journal of Animal Sciences*, 9: 1-8.
4. **Kumar Basnet** and Ananda Mukhopadhyay, 2014. Biocontrol potential of lynx spider *Oxyopes javanus* (Araneae: Oxyopidae) against the tea mosquito bug, *Helopeltis theivora* (Heteroptera : Miridae). *International Journal of Tropical Insect Science*. Cambridge Journals, Cambridge University Press, 34: 232-238.
5. **Kumar Basnet**, Dhiraj Saha and Ananda Mukhopadhyay, 2015. Enhancement of Resistance vis-à-vis Defence-Enzyme Activity in Tea Mosquito Bug, *Helopeltis theivora* Waterhouse (Hemiptera:Miridae) Selected Through Exposure to Sub-lethal Doses of Monochrotophos. *Proceedings of Zoological Society*, Springer Journal. 68: 184-188.

## PAPER PRESENTED AT SYMPOSIA AND SEMINARS

---

1. **Kumar Basnet** and Ananda Mukhopadhyay, 2015. Defence enzyme based technique for determining insecticide-tolerance level in Tea mosquito bug, *Helopeltis theivora* Waterhouse. National Seminar on ‘Plant Protection in Tea: Recent Advances’ organized by TRA, Tocklai Tea Research Institute, Jorhat, Assam, India.
2. **Kumar Basnet** and Ananda Mukhopadhyay, 2015. Climate change and its impact on the incidence of Tea mosquito bug, *Helopeltis theivora* Waterhouse in the tea plantations of North Bengal and their possible management. National Seminar on ‘Global climate change and its impact on Flora, Fauna and Microbial biodiversity held at St. Joseph’s College, Darjeeling, India.
3. **Kumar Basnet** and Ananda Mukhopadhyay. 2014. Study on biological control potential of Lynx spider, *Oxyopes shweta* (Araenea: Oxyopidae) against tea mosquito bug, *Helopeltis theivora* (Heteroptera: Miridae). AZRA Silver Jubilee International Conference, organised by Applied Zoologists’ Research Association (AZRA) held at Cuttack, Odisha, India.
4. **Kumar Basnet** and Ananda Mukhopadhyay. 2012. A new technique for determining the tolerance level of tea pests against pesticides. Plantation Crop Symposium XX, held at Coimbatore, Tamil Nadu, India.
