TOPIC	PAGE NO.
Declaration	vi
Certificate	vii-viii
Acknowledgement	ix
Abstract	x-xiv
Preface	xv
List of Tables	xvi-xviii
List of Figures	xix-xxiv
List of appendices	xxv
Abbreviations	xxvi-xxvii
<hr/>	
1. Introduction	1-8
2. Literature review	9-36
2.1. Diseases of bottle gourd	10
2.1.1. Diseases caused by fungi	11
2.1.2. Diseases caused by bacteria, viruses and other agents	16
2.2. Identification of fungal pathogens	18
2.3. <i>Colletotrichum gloeosporioides</i> , the fruit and vegetable pathogen	19
2.4. <i>Fusarium incarnatum</i> , the soil borne pathogen	24
2.5. Induction of systemic resistance	28
2.6. Inhibition of pathogenic microorganisms by biocontrol agents and botanical extracts	34
3. Materials and methods	37-63
3.1. Plant materials	38
3.1.1. Host plants	38
3.1.1.1. Collection and selection of bottle gourd plants	38
3.1.1.2. Maintenance of bottle gourd plants	38

3.1.2. Collection of plants for extraction of Botanicals	39
3.2. Microorganisms	40
3.2.1. Pathogenic fungi	40
3.2.2. Isolation of fungi	40
3.2.1.1. Collection of disease samples	40
3.2.1.2. Isolation of fungi	40
3.2.1.3. Maintenance of stock cultures	43
3.2.3. Antagonistic bacteria	44
3.3. Pathogenicity test of isolated fungi	44
3.3.1. Inoculum preparation	44
3.3.2. Disease induction	45
3.3.2.1. Disease induction in fruits	45
3.3.2.2. Disease induction in leaves of whole plant	45
3.3.3. Disease assessment	46
3.3.3.1. Assessment in Fruits	46
3.3.3.2. Assessment in leaves of whole plants	46
3.3.4. Verification of Koch's postulations	47
3.4. Identification of isolated fungal pathogens	48
3.4.1. Studies on phenotype	48
3.4.1.1. Colony characteristics	48
3.4.1.2. Microscopy	48
3.4.2. Studies on ribosomal RNA genes	49
3.4.2.1. Isolation of fungal genomic DNA	49
3.4.2.2. RNase treatment	50
3.4.2.3. Quantification of DNA	50
3.4.2.4. Gel electrophoresis	50
3.4.2.5. PCR Amplification	51
3.4.2.6. Detection of PCR amplicons in agarose gel	51

3.4.2.7. Purification and sequencing of PCR products	51
3.4.2.8. Phylogenetic analysis	52
3.5. Studies on growth and physiology of the fungal pathogens	52
3.5.1. Influence of different culture media on growth and sporulation	52
3.5.2. Influence of pH on growth and sporulation	53
3.5.3. Influence of temperature on growth of fungi	54
3.6. Preparation and application of inducer chemicals on bottle gourd plants	54
3.7. Extraction and estimation of defense related enzymes	55
3.7.1. Peroxidase (POX, EC 1.11.1.7)	55
3.7.2. β -1, 3-glucanase (EC 3.2.1.6)	55
3.7.3. Phenylalanine ammonialyase (PAL, EC 4.3.1.5)	56
3.7.4. Chitinase (CHI, EC 3.2.1.14)	56
3.8. Estimation of protein	57
3.9. Polyacrylamide gel electrophoresis	58
3.9.1. Polyacrylamide gel electrophoresis (PAGE) and in-gel enzyme assay	58
3.9.2. Polyacrylamide gel electrophoresis (PAGE)	58
3.10. In-gel activity staining for isozyme studies	59
3.10.1. Peroxidase	59
3.10.2. β -1,3-glucanase	60
3.11. Detection and quantification of transcripts of PAL from bottle gourd plants by semiquantitative RT-PCR	60
3.11.1. Extraction of total RNA	60
3.11.2. Agarose gel electrophoresis of total RNA	61
3.11.3. RT- PCR	61
3.12. Evaluation of biocontrol agents for inhibition of pathogen growth by dual culture test	62
3.13. Evaluation of botanicals for inhibition of pathogen growth	63

3.13.1. Extraction of botanicals	63
3.13.2. Bioassay by poisoned food technique	63
3.14. Statistical analysis	63
4. Results	64-133
4.1. Disease occurrence in leaves and fruits in <i>L. siceraria</i>	65
4.2. Isolation of fungi and pathogenicity test	69
4.2.1. Pathogenicity test on bottle gourd fruits	70
4.2.2. Pathogenicity test on leaves of bottle gourd	74
4.3. Morphological and Physiological characterizations of the two fungal isolates.	78
4.3.1. Studies on morphology of the pathogens	78
4.3.2. Culture conditions affecting growth and sporulation of the pathogens	81
4.3.2.1. Mycelial growth and sporulation of pathogens in different solid media	81
4.3.2.2. Effect of different pH on mycelia growth of the pathogens	84
4.3.2.3. Effect of different incubation temperatures on mycelia growth of the pathogens	84
4.4. Molecular Identification of the two isolates and their phylogenetic analysis	89
4.4.1. Molecular identification of two fungal pathogens (isolates)	89
4.4.2. Phylogenetic analysis of the two fungal isolates	89
4.5. Induction of defense in susceptible bottle gourd plants (Gadda 1) by abiotic inducers and disease assessment against <i>Fusarium incarnatum</i> and <i>Colletotrichum gloeosporioides</i>	99
4.6. Induction of defense-related enzymes in susceptible variety of <i>Lagenaria siceraria</i> by abiotic inducers and studies on some defense related enzymes	102
4.6.1. Activity of peroxidase (POX)	102
4.6.2. Activity of β -1,3-glucanase	108
4.6.3. Activity of chitinase	114

4.6.4. Estimation of PAL activity in bottle gourd with abiotic inducers	118
4.7. Estimation of PAL gene transcripts from <i>Lagenaria siceraria</i> after induction with abiotic inducers using semi-quantitative RT-PCR	123
4.8. <i>In vitro</i> control of pathogenic fungal isolates <i>C. gloeosporioides</i> and <i>F. incarnatum</i>	126
4.8.1. Evaluation of some biocontrol agents for antagonistic activity	126
4.8.2. Screening of potential antifungal phytoextracts against <i>Colletotrichum gloeosporioides</i> and <i>Fusarium incarnatum</i>	130
5. Discussion	134-148
6. Bibliography	149-182
<hr/>	
7. Appendix-I: Chemicals and reagents	183
8. Appendix-II: Buffers and solutions	187
9. Appendix -III: Growth media	192
10. Appendix-IV: Nucleotide sequences	195
11. Appendix-V: List of publications	196
