

## **ACKNOWLEDGEMENT**

*“Gratitude can transform common days into thanks giving, turn routine jobs into joy and change ordinary oppurtunities into blessings” – William Arthur Ward*

With this, I would like to express my sincere gratitude to all those who have helped me and supported me in overcoming the obstacles and achieving the goal I had set.

I feel myself really privileged to have the oppurtunity to work under the able guidance of my esteemed supervisor Dr. Shilpi Ghosh, Head, Department of Biotechnology, University of North Bengal, West Bengal. Words are actually not enough to describe the constant efforts and inspiration she has given me. Her perfection, vigilant supervision and constructive discussion are the factors which helped me to do hard work and accompolish the work. Iam really grateful to her for having faith on me which is an ignition for me everytime while achieving this scientific goal.

I solicit my obligation and express my heartfelt thanks to Dr. Ranadhir Chakraborty, Professor, Department of Biotechnology, University of North Bengal, West Bengal. He has been always a source of inspiration for me. I acknowledge my sincere thanks to Dr. Dipanwita Saha and Dr. Anoop Kumar, Assistant professors, Department of Biotechnology, University of North Bengal, West Bengal for their valuable suggestions and guidance.

I would like to express my gratitude to Vice Chancellor, Dean science and Registrar, University of North Bengal for permitting me to conduct the research work in the University.

I am also thankful to Dr. Arindam Bhattacharjee, Head, Department of Microbiology, for his constant support and valuable suggestions.

Thanks are also due to all the members of Non-teaching and technical staffs of the department for their help and support.

I express my special thanks to my labmates Ms. Khusboo Lepcha, Mr. Ayan Mahanty, Mrs. Vijeta Rai, Ms. Arijita Basak, Mr. Parmeshwar Vittal Govande and Mr. Vaskar Das for their non-stop contribution and selfless help extended to me.

It would be inappropriate if I do not mention the name of Mr. Sudipta Das for his extensive help and constant support.

No choice of words can add to adequately express my love and gratitude to my father Late. Alokanda Saha, who left me at a very early age but the lessons he imparted to me can never leave me till death.

I would like to express my thanks to my beloved wife cum labmate Mrs. Deepika Mazumdar for helping me in my works and supported me in my difficult times. She has

always given me a constant support and motivation for thinking innovatively while conducting the work.

I bow in gratitude to the Almighty God for my existence as *Homo sapiens* and the strength, knowledge, ability and opportunities, He has given to me to fulfill my dreams.

At last, I would like to dedicate this piece of work to my mother Smt. Chhaya Roy Saha who has always seen her dreams in me. God cannot always take care of us and so has send mothers who always do anything without hoping, in return. I would not have been what I am today. My mother is the one who never gave up in her hard times and fought for the existence of both of us. It is her genes in me which has lead me to achieve this aim.

Thanks to everyone,

*Shyama Prasad Saha*
