

Acknowledgements

I would like to thank my supervisor Dr. B. C. Paul, Professor & Head, Physics Department and Dean, Faculty of Science, University of North Bengal. I still remember the day, that was on 10th of May, 2010, when I met Prof. (Dr.) B.C.Paul to ask whether I can do research in Astrophysics. My daughter who was only two years at that time, I never thought that I shall be able to further my career in Physics. It was the dark cloud booming around. But, it was Paul Sir who pushed my morale to prepare for the entrance examination and gave me some research related papers. After that it was no looking back. My family and friends boost me to take it as a challenge. After a long struggling journey with lots of ups and down, today I am writing the acknowledgment of my Thesis. Writing or simply saying "Thanks" to my supervisor Prof. (Dr.) B. C.Paul is like belittling his contribution for my work. All words felt short to acknowledge his constant guidance, support and infinite patience to complete my thesis. So, I acknowledge my sincere gratitude towards him.

This work is carried out in the Department of Physics, University of North Bengal. I express my thank to all the faculty members and all the non-teaching staff of the Physics Department for their support and help. I am also thankful to Astrophysics Group at IUCAA Resource Centre (IRC), Physics Department, NBU, Dr. P. K. Chattopadhyay, Dr. Pragati Pradhan, Dr. Prasenjit Thakur and Dr. Souvik Ghose and Mr. Tamal Sarkar for their active support and collaboration. I was really fortunate to do work in collaboration with Prof. R. Tikekar, IUCAA, Pune. I am also thankful to the Inter-University Centre for Astronomy Astrophysics (IUCAA), Pune for supporting my visit for collecting research materials and providing me the Library facility to carry out my research work.

I express my in depth gratitude towards my parents **MA** and **BABA**, for their eternal love and sacrifice in every aspect of my life. Without their blessings it would not be possible to complete my work. I will remain forever grateful and thankful to them for their moral support and encouragement throughout my research work. I would like to express my heartfelt love and thanks to my beloved husband *Prof (Dr.) Utpal Deka* who was first to recognize my potential to carry out a research career in Physics and for providing me a peaceful and friendly environment at home and always being continuous inspiration and invaluable cooperation throughout my research work. Finally I would like to express my heartiest thanks and lots of love to my little and loving daughter **NIMISHA** who helped me by being always an obedient child and given lots of cooperation throughout my research journey. Her lively and beautiful smile always being an energy source to proceed towards the goal. This journey could not be fulfilled without many divine blessings.... and moral supports of my friends and family members.

Ms.Rumi Deb
