

LIST OF TABLES

Table No.	Title	Page No
4.1	Happiness Degree/Level and Interpretation	74
4.2	Frequencies and Percentage of Levels of Happiness of Doctors	75
4.3	One-Sample Statistics	76
4.4	One-Sample t Test	76
4.5	Summary of Demographic Data	77
4.6	Workplace Happiness Profiles of Doctors with Respect to Gender	81
4.7	Mean of Workplace Happiness of Medical Doctors Based on Gender	81
4.8	ANOVA Analysis Based on Gender Variation	82
4.9	Workplace Happiness Profiles of Doctors with Respect to Age	83
4.10	Mean of Workplace Happiness of Medical Doctors Based on Age	83
4.11	ANOVA Analysis Based on Age	84
4.12	Workplace Happiness Profiles of Doctors with Respect to Educational Degree	85
4.13	Mean of happiness of Medical Doctors Based on Education Standard	86
4.14	ANOVA Analysis Based on Education Standard Variation	87
4.15	Workplace Happiness Profiles of Doctors with Respect to Experience	87
4.16	Mean of happiness of Medical Doctors Based on Experience in Service	88
4.17	ANOVA Analysis Based on Experience in Service Variation	89
4.18	the work attributes by importance	90
4.19	Most Satisfied to Dissatisfied Work Attributes	91
4.20	Pearson Correlation between Happiness and Work Attributes.	92

4.21	Summary of Regression Coefficient	92
4.22	Summary of Regression Coefficient	93
5.1	Comparison of Each Individual Letter in the Four Dimensions	99
5.2	Myers-Briggs Preferences of Medical Doctors	99
5.3	Personality and Happiness	101
5.4	Level of MI and Interpretation	103
5.5	Pearson correlation among Multiple Intelligence Abilities	104
5.6	Advancement levels of the doctors' multiple intelligence domains	104
5.7	Descriptive Statistics of Multiple Intelligence Domains of the Medical Doctors	105
5.8	Summary of One Sample T Test	105
5.9	Summary of Regression Coefficient	106
5.10	Summary of Independent t- test & ANOVAs	107
5.11	Doctors' Multiple Intelligence Domains and Happiness According to Highly Advance Level.	108
5.12	Parsons' Correlation between Workplace Happiness and Multiple Intelligences	108
5.13	Personality Type and MI of Very Unhappy and Very Happy Doctors	111
6.1	Frequency and Percentage Analysis of Loc of Doctors	117
6.2	Descriptive Statistic of Loc (Internal & External)	117
6.3	Frequency and Percentage Analysis of Locus of control of Doctors Based on Demographic Variables	118
6.4	Mean of Internal Loc Based on Demographic Variables	119
6.5	One-Way ANOVA Showing Relationship between Demographic	120

	Variables and Internal Locus of control	
6.6	Mean of External Loc Based on Demographic Variables	122
6.7	One-Way ANOVA showing relationship between Demographic Variables and External Locus of control	123
6.8	Mean of Happiness of Doctors Based on Loc Type (Internal and External)	125
6.9	ANOVA Analysis Based on Loc Type Variation	126
6.10	Summary of Regression Analysis	126
6.11	Correlation between Happiness and the Type of Loc (i.e. Internal or External)	127
6.12	Loc Type (i.e. Internal or External) Profiles of Very happy and Very Unhappy Doctors	128
6.13	Level of EI and Interpretation	129
6.14	Levels of EI of Doctors	130
6.15	Descriptive statistics of EI and Its Components	131
6.16	One-Sample Statistics	131
6.17	One-Sample Test of EI	132
6.18	Frequency and Percentage Analysis of EI of Doctors Based on Demographic Variables	133
6.19	Mean of EI of Doctors Based on Gender	134
6.20	ANOVA Analysis Based on Gender Variation	134
6.21	Mean of EI of Doctors Based on Age	135
6.22	ANOVA Analysis Based on Age Variation	135
6.23	Mean of EI of Doctors Based on Education Standard	136
6.24	ANOVA Analysis Based on Education Standard Variation	137
6.25	Mean of EI of Doctors Based on Experience in Service	137
6.26	ANOVA Analysis Based on Experience in Service Variation	138
6.27	Happiness Profiles of Doctors on the Basis of EI	139

6.28	Mean of Happiness of Doctors Based on EI	140
6.29	ANOVAs Analysis Based on EI of Doctors	141
6.30	Correlation between Workplace Happiness, EI and Its components	141
6.31	Summary of Regression Analysis (Emotion)	142
6.32	Summary of Regression Analysis (Self -Awareness)	143
6.33	Summary of Regression Analysis (Self - Regulation)	144
6.34	Summary of Regression Analysis (Self -Motivation)	145
6.35	Summary of Regression Analysis (Social -Awareness)	146
6.36	Summary of Regression Analysis (Social -skill)	147
6.37	Summary of Regression Coefficient	148
6.38	EI Profiles of Doctors Based on Loc Type (Internal & External)	150
6.39	Mean of EI of Doctors Based on Loc Type	150
6.40	Independent t test	151
6.41	Correlations between EI and Its Components with Internal Loc	151
6.42	Correlations between EI and Its Components with External Loc	152
6.43	EI and Loc Profile of Very Happy and Very Unhappy Doctors	153
6.44	Summary of Regression analysis (EI and Internal Loc)	153
6.45	Summary of Regression analysis (EI and external Loc)	154
7.1	Level of OS and Interpretation	159
7.2	Frequency and percentage of Level of OS of Doctors	159
7.3	One-Sample Statistics	160
7.4	One-Sample Test	160

7.5	Frequency and Percentage Analysis of Stress of Doctors Based on Demographic Variables	161
7.6	Mean of Stress of Doctors Based on Gender	162
7.7	ANOVA Analysis Based on Gender Variation	162
7.8	Mean of OS of Doctors Based on Age	163
7.9	ANOVA Analysis Based on Age Variation	164
7.10	Mean of OS of Doctors Based on Education	164
7.11	ANOVA Analysis Based on Education Variation	164
7.12	Mean of Stress of Doctors Based on Experience	165
7.13	ANOVA Analysis Based on Experience Variation	165
7.14	Workplace Happiness Profiles of Doctors on the Basis of OS	166
7.15	Mean of Workplace Happiness of Doctors Based on OS	166
7.16	ANOVA Analysis Based on stress of Doctors	167
7.17	Summary of Regression Analysis	168
7.18	Descriptive Statistics of Stressors	169
7.19	Correlation coefficients between doctors' workplace happiness and stressors	170
7.20	Mean of Stress of Doctors Based on EI	173
7.21	ANOVAs Analysis Based on EI of Doctors	174
7.22	Summary of Regression Analysis (Emotion)	175
7.23	Summary of Regression Analysis of (Self Awareness)	176
7.24	Summary of Regression Analysis of (Self Awareness)	177
7.25	Summary of Regression Analysis (Self Motivation)	177

7.26	Summary of Regression Analysis of (Social- Awareness)	178
7.27	Summary of Regression Analysis (Social -Skills)	179
7.28	Coefficient of Multiple Regressions	180
7.29	The Results of Hierarchical Regression Analysis for the Moderating Effect of EI on the Relationship between Occupational stress and workplace happiness	181
7.30	OS Profiles of Doctors Based on Loc Type (Internal & External)	184
7.31	Mean of OS of Doctors Based on Loc Type	184
7.32	ANOVA Analysis Based on Loc Type Variation	185
7.33	Correlations between OS and Loc Type	186
7.34	The Results of Hierarchical Regression Analysis for the Moderating Effect of Internal Loc on the Relationship between Occupational stress and workplace happiness	187
