	Page No.
CHAPTER I	
1. Introduction	1-7
1.1 History of Sericulture	1
1.2 Present state of Indian Sericulture	2
1.3 Muga culture in focus	3
CHAPTER II	
2. Review of Literature	8-26
2.1 Embryonic development in Muga Silkworm, <i>A. assama</i> under normal condition	8
2.2 Embryonic development in Muga Silkworm, <i>A. assama</i> in cold stressed condition	16
2.3 Low temperature stress on eggs for cold preservation of Muga silk Worm <i>A.assama</i>	16
2.4 Low temperature stress for improved schedule of cold preservation technique in Muga culture	17
2.5 Biochemistry of embryonic development of Muga silk worm <i>A.assama</i>	18
CHAPTER III	
3. Materials and Method	27-37
3.1 Embryonic development of Muga silk worm	27
3.2 Effect of temperature stress on different embryonic stages	28
3.3 Effect of different low temperature stress in identified low temperature resistant embryonic stages	28
3.4 Effect of preservation period after low temperature stress to the identified embryonic stages	29
3.5 Biochemistry of embryonic development of Muga silk worm <i>A.assama</i>	29

CHAPTER IV

4. Results	38-93
4.1 Embryonic development of Muga silk worm	38
4.2 Effect of temperature stress on different embryonic stages	45
4.3 Effect of different low temperature stress in identified low temperature resistant embryonic stages	54
4.4 Effect of preservation period after low temperature stress to the identified embryonic stages	63
4.5 Biochemical changes in embryonic developmental events of <i>A. assama</i>	72

CHAPTER V

5. Discussion	94-115
5.1 Embryonic development of Muga silk worm	94
5.2 Effect of temperature stress on different embryonic stages	99
5.3 Effect of different low temperature stress in identified low temperature resistant embryonic stages	101
5.4 Effect of preservation period after low temperature stress to the identified embryonic stages	103
5.5 Biochemical changes in embryonic developmental events of <i>A. assama</i>	105

CHAPTER VI

6. Summary & Conclusion	116-131
Plate	132-147

CHAPTER VII

7. References	148-173
