Abstract	v
Table of Contents	vi
List of Figures	xi
List of Tables	xvi
Chapter 1: Introduction to Counterfeit Coin Problem	1
1.1 Introduction.....	1
1.2 A Brief Background on Counterfeit Coin Problem	5
1.2.1 Eight Coins Problem.....	6
1.2.2 Twelve Coins Problem.....	6
1.2.3 n Coins Problem.....	6
1.3 Difficulty Levels of the Counterfeit Coin Problem	7
1.4 Motivations behind the Present Work.....	7
1.5 Objectives of the Present Work	9
1.6 Achievements out of the Work Done.....	10
1.7 Outline of the Thesis.....	11
Chapter 2: Existing Literature on Counterfeit Coin Problem: A Review	13
2.1 Overview.....	13
2.2 Nature of the Counterfeit Coin Problem.....	13
2.3 A Study on Different Existing Counterfeit Coin Problem Solving Techniques	19

2.3.1	Models behind Solving the Techniques	25
2.3.1.1	Search Processes and Tree Models	28
2.3.1.2	Search Processes and Code	30
2.3.1.3	Average Case Search Processes	30
2.3.1.4	Worst Case Search Processes.....	31
2.3.1.5	Alphabetic Search Processes.....	31
2.3.1.6	Binary Search Tree	32
2.3.1.7	Predetermined Algorithms	33
2.3.1.8	Binary Search Processes	34
2.3.2	General Sequential Algorithms.....	34
2.3.2.1	The Binary Tree Representation of a Sequential Algorithm	34
2.3.2.2	The Structure of Group Testing	35
2.3.2.3	Li's s-Stage Algorithms	36
2.3.2.4	Hawng's Generalized Binary Splitting Algorithm	38
2.3.2.5	The Nested Class.....	39
2.3.2.6	(d,n) Algorithm and Merging Algorithm	40
2.3.2.7	Number and Group Testing Algorithm.....	41
2.3.2.8	Two Disjoint Sets Each Containing Exactly One Defective	42
2.3.2.9	The Two Defective Cases	44
2.4	Summary	45
Chapter 3: Generalised Algorithms for solving n Coins problem.....		47
3.1	Overview	47
3.2	Introduction to Eight Coins Problem	48
3.2.1	Two New Solutions of Eight Coins Problem.....	49

3.2.1.1	The First New Solution of the Eight Coins Problem	50
3.2.1.2	The Second New Solution of the Eight Coins Problem.....	54
3.2.2	Relative Comparisons among the Solutions	57
3.3	Algorithms for Solving n Coins Problem	59
3.3.1	Extension of the Algorithm to Solve $n > 8$ (Powers of 2) Coins Problem.....	60
3.3.2	Procedure <i>n-coin_problem</i>	61
3.3.3	Procedure <i>less_than_function</i>	62
3.3.4	Procedure <i>greater_than_function</i>	63
3.3.5	Procedure <i>4-coin_problem</i>	64
3.3.6	Procedure <i>2-coin_problem</i>	64
3.3.7	Procedure <i>check_function</i>	64
3.4	Extension of the Algorithm to Solve $n \geq 6$ (Even) Coins Problem	65
3.5	Extension of the Algorithm to Solve $n \geq 7$ (Odd) Coins Problem.....	66
3.6	Applications of the Problem	67
3.7	Experimental Results of the Algorithm	67
3.8	Summary	67
Chapter 4: Algorithms for Two Counterfeit Coins Problem.....		69
4.1	Overview	69
4.2	A Brief Study on Two Counterfeit Coins Problem.....	69
4.2.1	Formulation of the Problem	70
4.2.2	Variation of the Problem.....	71
4.3	A General Algorithm for Differentiating Two Counterfeit Coins Problem	73
4.4	Algorithms for Both the Counterfeit Coins are Equally Heavier and Equally Lighter	74

4.5	Algorithms for Both the Counterfeit Coins are Unequally Heavier and Unequally Lighter	78
4.6	Computational Complexity of the Algorithms	85
4.7	Experimental Results	85
4.8	Summary	89
Chapter 5: Algorithms for $\Delta(\omega(H)) > \Delta(\omega(L))$ and $\Delta(\omega(H)) < \Delta(\omega(L))$.....		90
5.1	Overview.....	90
5.2	$\Delta(\omega(H)) > \Delta(\omega(L))$ [one heavier and the other are lighter but difference between the heavier and the original coin is greater than the difference between the lighter and the original coin]	90
5.3	$\Delta(\omega(H)) < \Delta(\omega(L))$ [one heavier and the other is lighter but difference between the heavier and the original Coin is less than the difference between the lighter and the original coin].....	94
5.4	Computational Complexity of the Algorithms	96
5.5	Experimental Results	97
5.6	Summary	101
Chapter 6: An Algorithm for Solving Two Coins Counterfeiting with $\Delta\omega(H) = \Delta\omega(L)$		102
.....		
6.1	Overview.....	102
6.2	Formulation of the Problem.....	102
6.3	Algorithm for $\Delta\omega(H) = \Delta\omega(L)$ (Difference between the Heavier and the Original Coin is Equal to the Difference between the True and the Lighter Coin)	103
6.4	Computational Complexity of the Algorithms	107
6.5	Experimental Results	112
6.6	Summary.....	113

Chapter 7: Conclusion	114
7.1 Application Perspectives.....	114
7.1.1 Hidden Graph Learning and Counterfeit Coins	114
7.1.2 Electrical Circuit Analysis and Counterfeit Coins.....	116
7.1.3 Consumer Products	116
7.1.4 Drug Check	117
7.1.5 Bill Detection	118
7.1.6 Quantum Query Detection	118
7.2 Contributions.....	119
7.3 Future Directions	120
References	122
Appendix A: List of Publications	129
