

UNIFICATION OF IDEAS OF CREATION AND EVOLUTION OF THE UNIVERSE  
IN WESTERN SCIENTIFIC VIEW AND INDIAN PHILOSOPHICAL LITERATURE.

A rational study of the subject as mentioned in the title will be undertaken on the basis of the following scheme :-

Outline of the content.

CHAPTER - I.

- (a) Basic notions of creation and evolution of the Universe in the view of Western Science.
- (b) Basic notions of creation and evolution of the Universe in the light of the Indian Philosophical Literature.
- (c) A study of the historical evolution of these two ideas will be undertaken.

CHAPTER - II.

Comparison and contrast of the two ; their definition ; methods ; impact on men and society etc. will be undertaken.

CHAPTER - III

Most modern theories of natural Science will be explained in the perspective of Indian Philosophical Literature.

It is expected that this research work undertaken will be helpful in explaining and establishing the validity of the ideas of ancient India in the perspective of the modern scientific thoughts of the West.

Disparities between these two will be undertaken. These may be considered as the speciality of conceptions of ancient India. This thesis may be considered as an attempt to enable the modern civilized world to realize the sophistication of the Indian thoughts about the ideas of creation and evolution of the Universe.
