

TABLE OF THE CONTENTS.

	Page.
1. Preface.	xiv - xvii
2. Introduction	1 - 37.
3. Outline of the content.	38 - 72.
CHAPTER I.	
A. Ancient era.	
Ionian philosophers: Thales: Anaxmander: The Pythagorians: Milesian School: Heraclitus. The Eleatic School: Permenides: Zeno: The Pluralists: Anaxagoras; Empedocles: The Atomist: Democretus: The Atomists to Aristotle: Science in Alexandria: Uclid: The Roman Age	74 - 88.
B. Middle Ages.	
The Thirteenth century Schlasticism. Thomas Aquinas: The decay of Scholasticism: The Renaissance: Background: The significance of Renaissance: Niccolous Copernicus: Astronomy: Giordano Bruno	89 - 100
C. Birth of Modern Age.	
(a). Seventeenth century:	
Jhon Kepler: Kepler's Planetary motion and the Law of Gravitation: Galileo Galilei: Observational-Early Telescopic Astronomy. Rene Descartes	101 - 111.
(b). The Newtonian Epoc.	
The state of science in 1600 A.D. Issac Newton: Universal Gravitation: Newton's 'classical' Mechanics: Newton's "Three Laws of Motion": Kinemetric equation of rectilinear motion: Improvement of Mathematics: force, energy	

work: space and time in Newtonian mechanics: causal  
and determinate theory of the Cosmos: 112 - 127.

(c). Ninteeth century Physics:

Field Physics. electromagnetic effect theory of  
light: heat and the conservation of energy: 128 - 137.

(d). The spirit of enquiry and the modern scientific dis-  
cipline of occident in tweenth century. 138 - 147.

(e). Modern Age:

The Theory of RRelativity: formation of the notions  
of Relativity and the Univrse: Aristotle:Nicolaus  
Copernicus: Giordane Bruno: Galilei: Issac Newton:  
classical mechanics; Newtonian Relativity: the Galle-  
lian transformation: The special theory of relativity  
the equation of special theory of relativity: impor-  
tant conclusions of the special theory of relativity:  
futality of ether: variation of mass with velocity:  
mass-energy relation: intrinsic quantum nature of  
radiation: Minkowski's four dimensional space-time  
continuum: the General theory of relativity: Gravita-  
tion- the general theory of Gravitation: effect of  
gravitational field on a ray of light: g<sup>6</sup>gravitational  
Redshift. 144 - 167.

(D). Western Atomism.

Ancient atomism: posulations of Dalton's atomic theory  
modification of Dalton's theory: triumph of Dalton's  
theory. 168. - 174.

- (a). Modern atom.  
 Subatomic particles or elementary particles: massless  
 Bosons: Leptons (Fermions): Hadrons 175 - 178.
- (b). Quantum mechanics or Wave mechanics  
 Waves and Particles: de Broglie's concept of matter  
 waves: de Broglie's hypothesis: Heisenberg Uncertainty  
 principle: Schrödinger wave equation: the implication  
 of the uncertainty principle. 179 - 182.
- (c). Source of stellar energy. 183 - 189.  
 the p-p chain and the CNO cycle.
- (E). Vacuum - emptiness and form.  
 The fifth "element" - 'Ether'(Aether): the living vac-  
 uum 190 - 196.
- (F) Unified Field Theory. 190 - 196.  
 A Einstein: superforce: The unfolding Universe. 197 - 210.
- (G). Theories of the Universe.  
 (a). Newtonian cosmology. mathematical formulation of  
 Newtonian cosmology: Einstein's Universe: the expanding  
 universe: the recession of galaxies: the Doppler  
 effect: Stephen Hawking's universe: singularity. 215 - 234
- (H). Idea of GOD - Occident.  
 (a). God and the absolute: proofs for the existence of  
 God: scientific proofs for the existence of God: 235 - 240
- (b). Evolution of the idea of the God. God- Plato: P  
 God- Aristotle: the Judaic and Christian conception  
 of God: attributes of God: idea of God- Newton: God  
 René Descartes: Einstein's conception of God. exis-

tence of God - modern new science: God as an explanatory principle of science. 241 -257.

(h). An underlying unity behind the universe.

Super-determinism: S-Matrix and Bootstrap. 257 - 289.

(I). Higher multidimensional reality.

Prelogue: the new science and holonomy: holographic photo; primary reality may be frequency realm. 270 - 281.

(J). Evolution.

(a). Snapshot of the early universe: origin of the World: theory of absolute creation: theory of dependent creation: theory of Evolution: theory of mechanical evolution- Herbert Spencer: Cosmic evolution - John Elop Booden. 282 - 290.

(b) Biological or organic evolution

(b). Biological or organic evolution: Herbert Spencer. origin of life in the universe: philosophical definition of life. materialistic definition of life: biological definition of life: the capacity for synthesis. the capacity for self-regulation: reproduction: environments for living beings and evolution of life (earth and universe): the mechanistic view; the vitalistic view; Star as 'organism".

291 - 306.

- (ii). Basic notions of creation and evolution of the universe in the light of the Indian Philosophical literature.
- (A). Rg Vedic Philosophical foundation for explanation of creation of the universe.  
Origin of the Rg veda: Creation of the Universe:  
Rg Veda. 306 - 312.
- (B). Upaniṣdic view of creation of the universe. 312 - 315.
- (C). Creation.  
Śabda & Brahmanbāda: A Brahman - Yjñā. 316 - 317.
- (D). Creation: Pauranic view.  
Primary creation: Secondary creation (Pratīśarga).  
Genealogy of Gods: Cosmic cycles (Manvantara):  
accounts of the royl dynasties. 318 - 321.
- (E). Natarāja: the Cosmic dancer: Ardhanārīśvara. 321 - 323.
- (F). Cosmogony - Hindu. Cosmography. 323 - 329.
- (G). Kālpūrūsa.:  
The Cosmic Man: Kālachakra. 330 - 334.
- (H). Cosmography - Hindu.
- (I). Microcosmic or Universal planes- 335 - 336 - 3
- (J). Basic notions of the creation of the universe-
- (K). Cosmography. (K, i) *Indian Astronomy*. <sup>B BUDDISM.</sup> 337 - 339.  
340 - 346.
- (L). Natural science of the Hindu. -  
Matter-Patanjali's Mahābhāṣya: natural energy or power (Śaktī): Matter and energy in Vaiśeṣika philosophical literature: Matter and energy in Sāmkhya

Matter:-- Venkatanath Desika: Motion: Matter - Bud- 2  
dhism: Matter - Jainism. 348-365

(M). Indian atomism.

Origin of Indian atomism: atomism - Nyāya Vaiśeṣika:  
atomism - Sāmkhya: atomism - Buddhists: atomism -  
Jaina: the problem of atomic combination. 366 - 372

(N). God -- Indian Philosophical literature.

God -- the Creator of the universe: Gods of the Rg Veda:  
God in Upanīds: Advaita vedānta: non-dual Advitan: God  
in Vaiśeṣika philosophy: the Indian vision of God as mother  
mother: : 373 - 393

(P). The exposition of the Buddha. 394 - 396

(Q). The TATHATA philosophy of Asvaghosa. 396 - 398

(R). Śaktī.

Śaktī in the Vedas: Śaktī in the Vedānta: nondualis-  
tic Vedānta: Vistādvaitavādic Vedānta: Sāmkhy philo-  
sophy: Yoga philosophy: Mimānsā philosophy. Nāya p  
philosophy: Vaiśeṣika philosophy: 399 - 405

(S). Śaktī - The world as power

The world as power: sūnyatā (void): Time, space, in  
Indian philosophy literatures: existence of time in  
cosmology: viśvarūpa darśana Yoga: Superdetermini-  
sm -- Indian view. 406 - 429.

(T).

(U). Concept of origin of Prāna (Life). as depicted Indian literature.

Rg Veda: Upaniṣdic view: sad: chIt. cIt and acīt:Ānanda:  
430 - 435.

(V). Illustration of origin of Prāna (life) in different Īpaniṣds:

Chhāndogys upanīsd: mūndaka upanīsd; prasna upanīsd:

435 - 438

(W). Ādyā śakti

439

(X). cīt śakti and māyāśaktī.

439 - 442

## CHAPTER II. Historical evolution of the two notions.

(A). A comparative study-

Introduction: the dawn of Indian civilization; characteristics of Indian civilization. 445 - 453

(B). The European and Āryans.

453 - 471

Chronology: Greek astronomy Vs Indian Astronomy;

(C). The dynamic Universe

Eastern mysticism and Occidental scientific view: dance of Natarāja: matter and energy: viśvarūpa darśan yoga: structure of the universe; evolution of the methodology of study of science in east and west; string theory: superforce; scientific achieve of India and Occident: Indian atomism Vs. Western atomism; interpretation of the 'MAHABHĪJA', AUM' in reference to sound of 'GONG' of primordial-- the Big Bang:

472 - 509.

- Page
- (D). Idea of God in Indian philosophical literature and  
in Western view. 510 - 518

CHAPTER III EXPLANATION OF THE MOST MODERN THEORIES OF NATURAL SCIENCE IN THE PERSPECTIVE OF INDIAN PHILOSOPHICAL LITERATURE.

- (A). Introduction
- (B). The Holistic science of the living and the non-living:  
Indian and occident view.: Human response of metals and  
plants: The Bioplasmic body:
- (C). The holstic background of existence  
Indian and occident. reflections of the holographic  
paradigm.
- (D). The Field of life - Morphogenetic Field.
- (F). Superdeterminism - Occidental view Vs. Indian view. 519 - 537
