

Contents

Preface	i - ii
Notations	iii - iv
CHAPTER - I	Bibliography	1 - 5
CHAPTER - II	Nonlinear theory of Elasticity	6 - 24
CHAPTER - III	1) A General Discussion	25 - 26
	2) Some preliminary remarks about "Constant Deflection Contour" method and different boundary Conditions	27 - 38
CHAPTER - IV	1) A simplified method for solving nonlinear problems using "Constant Deflection Contour" method	39
	2) Nonlinear vibrations of Elliptic Plates with uniform thickness	39 - 48
	3) Nonlinear vibrations of plates on elastic foundation	49 - 60
	4) Some points on Berger's Method	61 - 62
	5) Nonlinear Damped Oscillations of moderately thick Plate of arbitrary shape	62 - 75
	6) Nonlinear vibration of elastic plates with varying flexural rigidity	76 - 91

CHAPTER - V	1)	A modified method for solving Nonlinear problems using "Constant Deflection Contour method"	92
	2)	Nonlinear vibration of a clamped circular plate	92 - 94
	3)	Nonlinear vibration of Annular plates	94 - 96
	4)	Nonlinear vibration of an Annular plate with outer boundary clamped and inner boundary free	96 - 97
	5)	Nonlinear vibration of Annular plates with outer boundary simply supported and inner boundary free	98 - 102
	6)	Nonlinear vibration of an elliptic plate clamped along its boundary	103-109
CHAPTER - VI	1)	Nonlinear vibration analysis of elastic shells	110 -121
CHAPTER - VII	1)	Elastic-Plastic analysis of shallow Shell of arbitrary shape	122 - 128
CHAPTER - VIII		Concluding Remarks	129 - 132
REFERENCES		133 - 140
