

CONTENTS

	<i>Page No</i>
1. Introduction	1-6
2. Review of literature	7-44
2.1. Phytochemical screening of plants	7
2.2. Antioxidant activity of the plants	11
2.3. Antimicrobial activity of the plants	17
2.4. Hypoglycemic activity of the plants	25
2.5. Phytochemicals of ferns	32
2.6. Biological efficacy of pteridophytes	35
3. Materials and Methods	45-76
3.1. Plant materials	45
3.1.1. Collection	45
3.1.2. Identification	45
3.2. Preparation of plant extracts	45
3.2.1. Preparation of dried powder	45
3.2.2. Preparation of hot water extracts	45
3.2.3. Preparation of methanol and ethanol extracts	47-48
3.3. Phytochemical screening	50
3.3.1. Test for phenol	50
3.3.2. Test for flavonoid	50
3.3.3. Test for tannin	52
3.3.4. Test for alkaloid	52
3.3.5. Test for cardiac glycosides	52
3.3.6. Test for carbohydrates	53
3.3.7. Test for reducing sugar	53
3.3.8. Test for protein	53
3.3.9. Test for saponin	54
3.3.10. Test for terpenoid	54
3.3.11. Test for steroid	54
3.3.12. Test for anthraquinone	54
3.4. Quantification of biochemical components	54
3.4.1. Extraction and estimation of total phenols	54
3.4.1.1. Extraction of total phenols	54
3.4.1.2. Estimation of total phenols	55
3.4.2. Quantification of protein content	55
3.4.2.1. Extraction	55
3.4.2.2. Estimation	55
3.4.3. Extraction and quantification of flavonoid	56
3.4.3.1. Extraction of flavonoid	56
3.4.3.2. Quantification of flavonoid	56
3.4.4. Extraction and estimation of tannin	56
3.4.4.1. Extraction	56
3.4.4.2. Estimation	56
3.4.5. Extraction and estimation of carbohydrates	57
3.4.5.1. Extraction of total soluble sugar and reducing sugar	57
3.4.5.2. Estimation of total soluble sugar	57
3.4.5.3. Estimation of reducing sugar	57

3.4.6. Extraction and estimation of chlorophylls (total, chl a and chl b)	58
3.4.6.1. Extraction	58
3.4.6.2. Estimation	58
3.4.7. Extraction and estimation of total lipid	58
3.4.8. Quantification of carotenoid content	58
3.4.8.1. Extraction	58
3.4.8.2. Estimation	59
3.4.9. Quantification of vitamin C (ascorbate) content	59
3.4.9.1. Extraction	59
3.4.9.2. Estimation	59
3.4.10. Estimation and extraction of Vitamin E (α -tocopherol)	59
3.4.10.1. Extraction of vitamin E	59
3.4.10.2. Estimation of vitamin E	60
3.5. Determination of antioxidant activities of extracts	60
3.5.1. DPPH radical scavenging activity	60
3.5.2. Hydrogen peroxide scavenging activity	60
3.5.3. Nitric oxide radical scavenging activity	61
3.5.4. Superoxide radical scavenging activity	61
3.5.5. Ferric reducing antioxidant power assay (FRAP)	62
3.6. Principal Component Analysis (PCA) of antioxidant parameters	62
3.7. HPLC analysis of phenolics	63
3.7.1. Sample preparation	63
3.7.2. Analysis of total phenolics	63
3.8. Testing of antimicrobial activities	63
3.8.1. Sample preparation	63
3.8.2. Preparation of media	64
3.8.2.1. Potato Dextrose Agar	64
3.8.2.2. Nutrient broth and agar	64
3.8.3. Antibacterial activities	64
3.8.3.1. Disc diffusion method	64
3.8.4. Antifungal activities	65
3.8.4.1. Spore germination bioassay	65
3.8.4.2. Radial growth bioassay	65
3.9. Testing of hypoglycaemic activities	66
3.9.1. Extraction	66
3.9.2. <i>In vitro</i> α -amylase inhibition activity	66
3.9.3. <i>In vivo</i> test	67
3.9.3.1. Animals	67
3.9.3.2. Acute toxicity study	67
3.9.3.2.1. Permission	67
3.9.3.3. Induction of experimental diabetes in test animals	67
3.9.3.4. Treatment of diabetic animals	67
3.9.3.5. Analytical procedure	69
3.9.3.5.1. Measurement of body weight	69
3.9.3.5.2. Estimation of blood sugar level	69
3.9.3.5.3. Collection of serum	69
3.9.3.5.4. Study of serum biochemical parameters	69
3.9.3.5.4.1. Lipid profile analysis	69
3.9.3.5.4.2. Liver function test	71
3.9.3.5.4.3. Kidney function test	72
3.10. Characterization of active compounds	73
3.10.1. Column chromatography	74

3.10.2. Gas Chromatography- Mass Spectrometry (GC-MS)	74
3.11. <i>In silico</i> molecular docking studies	74
3.11.1. Preparation of protein and ligand structure	75
3.11.2. Docking studies	75
3.12. Statistical analysis	76
4. Results	77-253
4.1. Description of selected ferns from North Bengal region	77
4.2. Qualitative analysis of phytochemical compounds of the selected ferns	82
4.3. Comparison of various biochemical components present in different ferns	83
4.3.1. Total phenol and protein content	83
4.3.2. Total flavonoid and tannin content	83
4.3.3. Total sugar and reducing sugar content	83
4.3.4. Total chlorophyll, chlorophyll-a and b content	85
4.3.5. Total lipid and carotenoid content	86
4.3.6. Vitamin C and E content	89
4.4. Effect of solvent on extraction yield of different ferns	90
4.5. Comparison of antioxidative activities in different extracts	90
4.5.1. DPPH radical scavenging activity	90
4.5.2. Hydrogen peroxide scavenging activity	95
4.5.3. Nitric oxide radical scavenging activity	96
4.5.4. Superoxide radical scavenging activity	104
4.5.5. Ferric reducing antioxidant power assay (FRAP)	108
4.6. Principal Component Analysis (PCA) of antioxidant parameters	111
4.7. Identification of phenolics from the extracts by HPLC	125
4.8. Antimicrobial activities in the extracts of ferns	142
4.8.1. Effects of crude plant extracts against different bacterial strains	142
4.8.2. Effect of crude plant extracts on fungi	149
4.8.2.1. Spore germination	149
4.8.2.2. Radial growth	150
4.9. Studies on anti-diabetic activities of selected fern extracts	154
4.9.1. α -amylase inhibitory activity of the extracts	154
4.9.2. Acute toxicity study	156
4.9.3. Effect of extracts on induced hypoglycemia in rats	156
4.9.3.1. Body weight changes	156
4.9.3.2. Blood sugar levels	159
4.9.3.3. Lipid profiles	161
4.9.3.4. Liver enzymes (SGPT and SGOT level)	161
4.9.3.5. Kidney functions (serum urea and creatinine level)	161
4.10. Partial purification of extracts by column chromatography and testing of biological activities	163
4.11. Partial characterization of the fractions by Gas Chromatography-Mass Spectrophotometry	170
4.12. <i>In silico</i> molecular docking studies	232
5. Discussion	254-274
6. Conclusion	275-278
7. Bibliography	279-319
Appendices	A-F
