

CONTENT

Subject	Page No.
1. Introduction	1
2. Literature Review	5
3. Materials and Methods	
3.1.Fungal culture	26
3.2.Histopathological characterization of <i>Pleurotus</i> sp.	27
3.3.Preparation of Spawn	27
3.4.Cultivation of Oyster mushroom	28
3.4.1. Preparation of substrates	28
3.4.2. Spawning	28
3.4.3. Initiation of fruiting body	28
3.5.Biochemical analysis	29
3.5.1. Determination of moisture content	29
3.5.2. Extraction and estimation of carbohydrates	29
3.5.2.1.Estimation of total sugar	30
3.5.2.2.Estimation of reducing sugar	30
3.5.3. Extraction and estimation of soluble proteins	30
3.5.3.1.Mycelia	30
3.5.3.2.Leaf	30
3.5.3.3.Estimation of protein content	31
3.5.3.4.SDS-PAGE analysis of soluble proteins	31
3.5.3.4.1. Preparation of stock solution	31
3.5.3.4.2. Preparation of gel	32
3.5.3.4.3. Sample preparation	33
3.5.3.4.4. Electrophoresis	33
3.5.3.4.5. Fixing and staining	33
3.5.4. Determination of total lipid content	34
3.5.5. Determination of dietary fiber	34
3.6.Application of spent mushroom substrate crop Plants	34
3.6.1. Experimental Design	34
3.6.2. Evaluation of growth promotion of plant	36
3.6.3. Extraction and quantification of phosphate from soil, roots and leaves	36
3.6.4. Extraction and estimation of chlorophyll content	36
3.6.5. Extraction and estimation of carotenoid	36
3.7.Molecular identification of <i>Pleurotus</i> species	37
3.7.1. Isolation of genomic DNA from fungi	37
3.7.1.1.DNA isolation technique	37
3.7.1.2.Purification of genomic DNA	37
3.7.2. Quantification of isolated DNA	37
3.7.3. Agarose gel electrophoresis	38
3.7.3.1.Preparation of agarose gel	38
3.7.3.2.Gel electrophoresis of DNA sample	38
3.7.4. PCR Amplification	38
3.7.4.1.Reagents and the optimal PCR reaction mixture	38
3.7.4.2.ITS PCR analysis	39
3.7.4.3.Amplification conditions	39
3.7.4.4.Sequencing of rDNA gene	39

3.7.5. Sequence analysis	39
3.7.5.1. Chromatogram of sequence	40
3.7.5.2. Multiple sequence alignment of sequence data	40
3.7.5.3. BLAST analysis of the sequences	40
3.7.5.4. Submission of rDNA gene to NCBI Genbank	40
3.8. Antioxidant activity of oyster mushroom	40
3.8.1. Preparation of ethanolic extract of oyster mushroom	40
3.8.2. DPPH Scavenging activity	40
3.8.3. Ferric Reducing Antioxidant Power Assay	41
3.8.4. Extraction and estimation of flavonoid content	41
3.9. Antidiabetic activity of oyster mushroom	41
3.9.1. Induction of diabetes	41
3.9.1.1. Chemicals used	42
3.9.2. Experimental design	42
3.9.3. Determination of body weight of experimental rats	42
3.9.4. Determination of blood sugar	43
3.9.5. Estimation of blood creatinine	43
3.9.6. Estimation of blood urea	43
3.9.7. Estimation of triglyceride	43
3.9.8. Estimation of cholesterol	43
3.9.9. Estimation of serum glutathione pyruvate transaminase (SGPT) activity	44
3.9.10. Estimation of serum glutathione oxaloacetate transaminase (SGOT) activity	44
3.10. Post-harvest processing of oyster mushroom	45
3.10.1. Long term processing	45
3.10.1.1. Drying process	45
3.10.1.2. Preparation of Mushroom powder	45
3.10.1.3. Preparation of Mushroom biscuits	46
3.10.2. Short term processing	46
3.10.2.1. Mushroom soup	46
3.10.2.2. Mushroom pakora	47
3.10.2.3. Mushroom curry	47
3.11. Promotion and marketing of oyster mushroom	48
3.12. Determination of cost Benefit ratio	48
4. Results	
4.1. Study on mycelial growth pattern of oyster mushroom	50
4.2. Morphological and histopathological study of oyster mushroom	54
4.3. Molecular Characterization of <i>Pleurotus ostreatus</i>	59
4.3.1. 18S rDNA sequence and phylogenetic analysis of <i>P</i> <i>ostreatus</i>	59
4.3.2. Chromatogram	59
4.3.3. Multiple sequence alignment	59
4.3.4. Phylogenetic analysis of <i>P ostreatus</i>	62
4.4. Molecular characterization of <i>Pleurotus sajor-caju</i>	63
4.4.1. 18S rDNA sequence and phylogenetic analysis of <i>P.</i> <i>sajor-caju</i>	63
4.4.2. Chromatogram	63

4.4.3. Multiple sequence alignment	63
4.4.4. Phylogenetic analysis of <i>P. sajor-caju</i>	64
4.5. Molecular Characterization of <i>Pleurotus djamor</i>	66
4.5.1. 18S rDNA sequence and phylogenetic analysis of <i>P. djamor</i>	67
4.5.2. Chromatogram	67
4.5.3. Multiple sequence alignment	67
4.5.4. Phylogenetic analysis of <i>P. djamor</i>	70
4.6. Molecular Characterization of <i>Pleurotus florida</i>	71
4.6.1. 18S rDNA sequence and Phylogenetic analysis of <i>P. florida</i>	71
4.6.2. Chromatogram	71
4.6.3. Multiple sequence alignment	72
4.6.4. Phylogenetic analysis of <i>P. florida</i>	74
4.7. Cultivation of <i>Pleurotus ostreatus</i>	77
4.7.1. Growth in different substrates	77
4.7.2. Growth in different containers	80
4.8. Cultivation of <i>Pleurotus sajor-caju</i>	82
4.8.1. Growth in different substrates	82
4.8.2. Growth in different containers	85
4.9. Cultivation of <i>Pleurotus djamor</i>	87
4.9.1. Growth in different substrates	87
4.9.2. Growth in different containers	90
4.10. Cultivation of <i>Pleurotus florida</i>	92
4.10.1. Growth in different substrates	92
4.10.2. Growth in different containers	95
4.11. Determination of moisture content of cultivated species of oyster mushroom (<i>P. ostreatus</i> , <i>P. sajor-caju</i> , <i>P. djamor</i> and <i>P. florida</i>)	97
4.12. Estimation of protein, sugar and lipid content of oyster mushroom grown on different substrates	98
4.12.1. <i>Pleurotus ostreatus</i>	98
4.12.2. <i>Pleurotus sajor-caju</i>	101
4.12.3. <i>Pleurotus djamor</i>	104
4.12.4. <i>Pleurotus florida</i>	107
4.13. Utilization of dry tea leaves following pruning practice in tea estates in North Bengal as alternative substrate for cultivation of <i>P. ostreatus</i> and <i>P. sajor-caju</i>	110
4.14. Biochemical Characterization of fruiting body cultivated on tea waste	114
4.15. Antioxidant activity of different species of oyster mushroom	116
4.16. Antidiabetic activity of different species of oyster mushroom	118
4.16.1. Effect of <i>Pleurotus</i> species on kidney function of STZ induced diabetic rats	121
4.16.2. Effect of <i>Pleurotus</i> species on liver enzymes of STZ induced diabetic rats	123
4.16.3. Effect of <i>Pleurotus</i> species on serum cholesterol level	124

	of STZ induced diabetic rats	
4.17.	Effect of spent mushroom substrate on plant growth and yield	125
4.17.1.	<i>Capsicum chinense</i>	125
4.17.2.	<i>Capsicum annuum</i>	127
4.17.3.	<i>Solanum lycopersicum</i> and <i>Amaranthus</i> sp	129
4.18.	Effect of spent mushroom substrate on biochemical constituents	131
4.18.1.	<i>Capsicum chinense</i>	131
4.18.2.	<i>Capsicum annuum</i>	132
4.18.3.	<i>Solanum lycopersicum</i> and <i>Amaranthus</i> sp	135
4.19.	Post-harvest processing of oyster mushroom	136
4.19.1.	Short term processing	137
4.19.2.	Long term Processing	139
4.19.3.	Biochemical characterization of Powdered fruiting body of <i>Pleurotus</i> species	141
4.20.	Management of Contaminants of oyster mushroom	144
4.20.1.	Ink Cap Disease	144
4.20.2.	Cob Web Disease	145
4.20.3.	Green Mould Disease	146
4.20.4.	Yellow Mould Disease	147
4.20.5.	Bacterial Blotch of oyster mushroom	148
4.20.6.	Pest Disease of Oyster Mushroom	148
4.20.6.1.	Sciarid fly	148
4.20.6.2.	Phorid Fly	149
4.20.6.3.	Beetle fly	150
4.21.	Promotion of mushroom cultivation to the rural people of North Bengal	152
4.22.	Cost benefit ratio of mushroom production in Darjeeling and Jalpaiguri Districts	157
5.	Discussion	161
6.	Conclusion	175
7.	Bibliography	179
