

## LIST OF TABLES

- Table 1:** Present status of world production of mushroom
- Table 2:** Mushroom production in India
- Table 3:** Major medicinal compounds extracted from different medicinal mushrooms
- Table 4:** Antimicrobial activity of *Pleurotus* sp.
- Table 5:** Different species of mushroom showing hyperglycaemic activity against different animal models
- Table 6:** Composition of resolving and stacking gel for SDS-PAGE
- Table 7:** PCR primers of ITS 4 and ITS6 used for sequencing
- Table 8:** Mycelial growth pattern of *Pleurotus* species in different media
- Table 9:** Morphological Characteristics of different species of oyster mushroom
- Table 10:** Genbank accession numbers of the Ex-Type strains of *Pleurotus ostreatus* that showed the homology with the isolate.
- Table 11:** Genbank accession numbers of the Ex-Type strains of *Pleurotus sajor-caju* that showed the homology with the isolate.
- Table 12:** Genbank accession numbers of the Ex-Type strains of *P. djamor* that showed the homology with the isolate.
- Table 13:** Genbank accession numbers of the Ex-Type strains of *P. florida* that showed the homology with the isolate.
- Table 14:** Cultivation of *P. ostreatus* in different types of containers in compare polypropylene bags
- Table 15:** Cultivation of *P. sajor-caju* in different types of containers in compare polypropylene bags
- Table 16:** Cultivation of *Pleurotus djamor* in different types of containers in compare polypropylene bags
- Table 17:** Cultivation of *P. florida* in different types of containers in compare polypropylene bags
- Table 18:** Study of band profile of SDS PAGE analysis of *P. ostreatus*
- Table 19:** Study of band profile of SDS PAGE analysis of *P. sajor-caju*

- Table 20:** Study of band profile of SDS PAGE analysis of *P. djamor*
- Table 21:** Study of band profile of SDS PAGE analysis of *P. florida*
- Table 22:** Cultivation of *P. ostreatus* and *P. sajor-caju* using pruned tea leaves along with paddy straw
- Table 23:** Effect of oral treatment of *Pleurotus* species on cholesterol and triglyceride levels of diabetic rats
- Table 24:** Comparison of growth of *C. chinense* grown in spent substrate of *P. ostreatus* and in untreated soil.
- Table 25:** Effect of spent mushroom substrate on growth of *C. annum*
- Table 26:** Effect of spent mushroom substrate on number of branches *C. annum*
- Table 27:** Effect of spent mushroom substrate on height of *Solanum lycopersicum* and *Amaranthus* in different intervals
- Table 28:** Effect of spent mushroom substrate on number of branches of *Solanum lycopersicum* and *Amaranthus* in different intervals
- Table 29:** Effect of spent mushroom substrate on total phosphate content of soil, root and leaf of *C. chinense* after 15 days of seedling transfer.
- Table 30:** Effect on phosphate content of soil, root and leaf after 15days of seedling transfer
- Table 31:** Effect of spent mushroom substrate on chlorophyll content of *C. annum*
- Table 32:** Effect of Spent mushroom substrate on chlorophyll content of *Solanum lycopersicum* and *Amaranthus* sp.
- Table 33:** List of trained mushroom growers successfully cultivating *P. ostreatus*, *P. sajor-caju* and *P. florida* in different part of Darjeeling and Jalpaiguri district.
- Table 34:** Different types of mushroom selling pattern of mushroom in Darjeeling and Jalpaiguri district
- Table 35:** Cost and returns of mushrooms in different categories of Darjeeling district
