

List of figures

Figures No.	Title	Page
Fig. 1.1 a and b;1.2	Baidya Fish Farm,Tankisinwari, Morang (Site1)	6
Fig.1.3,1.4a and b	Babiya Birta Fish Farm, Morang (Site 2)	7
Fig.1.5 a and b; 1.6	Tarahara Fish Farm, Sunsari (Site 3)	8
Fig. 1.7 a and b;1.8	Betana Wetland, Belbari, Morang (Site 4)	9
Fig. 1.9 a and b	Singhia River (Near Hatkhola bridge) Morang (Site 5)	10
Fig. 1.10a and b	Budhi River (Near Duhabi bridge) (Site 6)	10
Fig. 1.11	Map of Sunsari and Morang Districts showing sampling sites (Source: OCHA, UN, Nepal)	11
Fig. 3.1	EUS affected countries across the Asia-Pacific regions (Lilley <i>et al.</i> , 1998).	27
Fig. 3.2	Original endemic areas of EUS (Mudenda, 2012)	27
Fig. 3.3	Spread of EUS in Nepal (Source: Nepal vista.com).	28
Fig. 3.4	EUS affected areas in Southern Africa (Mudenda, 2012).	28
Fig. 4.1	Intramuscular injection of isolated saline suspension of bacteria given to the healthy <i>Heteropneustes fossilis</i> .	65
Fig. 4.2	Intramuscular injection of isolated fungus zoospores saline solution given to the healthy <i>Heteropneustes fossilis</i> .	71
Fig. 5.1	Monthly variations in air temperature at Site 1 during the first and second year study periods (Nov. 2008- Oct. 2010).	79
Fig. 5.2	Monthly variations in water temperature at Site 1 during the first and second year study periods (Nov. 2008- Oct. 2010).	79
Fig. 5.3	Monthly variations in pH at Site1 during the first and second	79

year study periods (Nov. 2008- Oct. 2010).

Fig. 5.4	Monthly variations in free CO ₂ at Site 1 during the first and second year study periods (Nov. 2008- Oct.2010).	80
Fig. 5.5	Monthly variations in DO at Site 1 during the first and second year study periods (Nov.2008- Oct.2010).	80
Fig. 5.6	Monthly variations in BOD at Site 1 during the first and second year study periods (Nov.2008- Oct.2010).	80
Fig. 5.7	Monthly variations in chloride at Site 1 during the first and second year study periods (Nov. 2008- Oct. 2010).	81
Fig. 5.8	Monthly variations in total alkalinity at Site 1 during the first and second year study periods (Nov. 2008- Oct. 2010).	81
Fig. 5.9	Monthly variations in total hardness at Site 1 during the first and second year study periods (Nov. 2008- Oct. 2010).	81
Fig. 5.10	Line graph of monthly variations in air temperature at Site1 during the first and second year study periods (Nov. 2008 - Oct.2010).	82
Fig. 5.11	Line graph of monthly variations in water temperature at Site1 during the first and second year study periods (Nov. 2008 - Oct.2010).	82
Fig. 5.12	Line graph of monthly variations in Total alkalinity at Site1 during the first and second year study periods (Nov. 2008 - Oct.2010).	82
Fig. 5.13	Line graph of monthly variations in Total Hardness at Site1 during the first and second year study periods (Nov. 2008 - Oct.2010).	83
Fig. 5.14	Monthly variations in air temperature at Site 2 during the first and second year study periods (Nov. 2008- Oct. 2010).	90
Fig. 5.15	Monthly variations in water temperature at Site 2 during the first and second year study periods (Nov. 2008- Oct. 2010).	90
Fig. 5.16	Monthly variations in pH at Site 2 during the first and second	90

year study periods (Nov.2008- Oct.2010).

Fig. 5.17	Monthly variations in CO ₂ at Site 2 during the first and second year study periods (Nov. 2008- Oct. 2010).	91
Fig. 5.18	Monthly variations in DO at Site 2 during the first and second year study periods (Nov. 2008- Oct. 2010).	91
Fig. 5.19	Monthly variations in BOD at Site 2 during the first and second year study periods (Nov.2008-Oct.2010).	91
Fig. 5.20	Monthly variations in chloride at Site 2 during the first and second year study periods (Nov. 2008- Oct. 2010).	92
Fig. 5.21	Monthly variations in total alkalinity at Site 2 during the first and second year study periods (Nov. 2008- Oct. 2010).	92
Fig. 5.22	Monthly variations in total hardness at Site 2 during the first and second year study periods (Nov. 2008- Oct. 2010).	92
Fig. 5.23	Line graph of monthly variations in air temperature at Site2 during the first and second year study periods (Nov. 2008 - Oct.2010).	93
Fig. 5.24	Line graph of monthly variations in water temperature at Site2 during the first and second year study periods (Nov. 2008 - Oct.2010).	93
Fig. 5.25	Line graph of monthly variations in total alkalinity at Site2 during the first and second year study periods (Nov. 2008 - Oct.2010).	93
Fig. 5.26	Line graph of monthly variations in total hardness at Site2 during the first and second year study periods (Nov. 2008 - Oct.2010).	94
Fig. 5.27	Monthly variations in air temperature at Site 3 during the first and second year study periods (Nov. 2008- Oct. 2010).	101
Fig. 5.28	Monthly variations in water temperature at Site 3 during the first and second year study periods (Nov. 2008- Oct. 2010).	101

Fig. 5.29	Monthly variations in pH at Site 3 during the first and second year study periods (Nov. 2008- Oct. 2010).	101
Fig. 5.30	Monthly variations in Free CO ₂ at Site 3 during the first and second year study periods (Nov. 2008- Oct. 2010).	102
Fig. 5.31	Monthly variations in DO at Site 3 during the first and second year study periods (Nov.2008- Oct.2010).	102
Fig. 5.32	Monthly variations in BOD at Site 3 during the first and second year study periods (Nov. 2008- Oct. 2010).	102
Fig. 5.33	Monthly variations in Chloride at Site 3 during the first and second year study periods (Nov. 2008- Oct. 2010).	103
Fig. 5.34	Monthly variations in TA at Site 3 during the first and second year study periods (Nov. 2008- Oct. 2010).	103
Fig. 5.35	Monthly variations in TH at Site 3 during the first and second year study periods (Nov.2008- Oct. 2010).	103
Fig. 5.36	Line graph of monthly variations in air temperature at Site3 during the first and second year study periods (Nov. 2008 - Oct.2010).	104
Fig. 5.37	Line graph of monthly variations in water temperature at Site3 during the first and second year study periods (Nov. 2008 - Oct.2010).	104
Fig. 5.38	Line graph of monthly variations in total alkalinity at Site3 during the first and second year study periods (Nov. 2008 - Oct.2010).	104
Fig. 5.39	Line graph of monthly variations in total hardness at Site3 during the first and second year study periods (Nov. 2008 - Oct.2010).	105
Fig. 5.40	Monthly variations in air temperature at Site 4 during the first and second year study periods (Nov. 2008- Oct. 2010).	112
Fig. 5.41	Monthly variations in water temperature at Site 4 during the first and second year study periods (Nov. 2008- Oct. 2010).	112

Fig. 5.42	Monthly variations in pH at Site 4 during the first and second year study periods (Nov. 2008- Oct. 2010).	112
Fig. 5.43	Monthly variations in CO ₂ at Site 4 during the first and second year study periods (Nov. 2008- Oct. 2010).	113
Fig. 5.44	Monthly variations in DO at Site 4 during the first and second year study periods (Nov. 2008- Oct. 2010).	113
Fig. 5.45	Monthly variations in BOD at Site 4 during the first and second year study periods (Nov. 2008- Oct. 2010).	113
Fig. 5.46	Monthly variations in chloride at Site 4 during the first and second year study periods (Nov. 2008- Oct. 2010).	114
Fig. 5.47	Monthly variations in total alkalinity at Site 4 during the first and second year study periods (Nov. 2008- Oct. 2010).	114
Fig. 5.48	Monthly variations in total hardness at Site 4 during the first and second year study periods (Nov. 2008- Oct. 2010).	114
Fig. 5.49	Line graph of monthly variations in air temperature at Site 4 during the first and second year study periods (Nov. 2008 - Oct.2010).	115
Fig. 5.50	Line graph of monthly variations in water temperature at Site 4 during the first and second year study periods (Nov. 2008 - Oct.2010).	115
Fig. 5.51	Line graph of monthly variations in total alkalinity at Site 4 during the first and second year study periods (Nov. 2008 - Oct.2010).	115
Fig. 5.52	Line graph of monthly variations in total hardness at Site 4 during the first and second year study periods (Nov. 2008 - Oct.2010).	116
Fig. 5.53	Monthly variations in air temperature at Site 5 during the first and second year study periods (Nov. 2008- Oct. 2010).	123
Fig. 5.54	Monthly variations in water temperature at Site 5 during the first and second year study periods (Nov. 2008- Oct. 2010).	123

Fig. 5.55	Monthly variations in pH at Site 5 during the first and second year study periods (Nov. 2008- Oct. 2010).	123
Fig. 5.56	Monthly variations in turbidity at Site 5 during the first and second year study periods (Nov. 2008- Oct. 2010).	124
Fig. 5.57	Monthly variations in CO ₂ at Site 5 during the first and second year study periods (Nov.2008- Oct.2010).	124
Fig. 5.58	Monthly variations in DO at Site 5 during the first and second year study periods (Nov. 2008- Oct. 2010).	124
Fig. 5.59	Monthly variations in BOD at Site 5 during the first and second year study periods (Nov. 2008- Oct. 2010).	125
Fig. 5.60	Monthly variations in chloride at Site 5 during the first and second year study periods (Nov. 2008- Oct. 2010).	125
Fig. 5.61	Monthly variations in total alkalinity at Site 5 during the first and second year study periods (Nov. 2008- Oct. 2010).	125
Fig. 5.62	Monthly variations in total hardness at Site 5 during the first and second year study periods (Nov. 2008- Oct. 2010).	126
Fig. 5.63	Line graph of monthly variations in air temperature at Site 5 during the first and second year study periods (Nov. 2008 - Oct.2010).	126
Fig. 5.64	Line graph of monthly variations in water temperature at Site 5 during the first and second year study periods (Nov. 2008 - Oct.2010).	126
Fig. 5.65	Line graph of monthly variations in total alkalinity at Site 5 during the first and second year study periods (Nov. 2008 - Oct.2010).	127
Fig. 5.66	Line graph of monthly variations in total hardness at Site 5 during the first and second year study periods (Nov. 2008 - Oct.2010).	127
Fig. 5.67	Monthly variations in air temperature at Site 6 during the	134

	first and second year study periods (Nov. 2008- Oct. 2010).	
Fig. 5.68	Monthly variations in water temperature at Site 6 during the first and second year study periods (Nov. 2008- Oct. 2010).	134
Fig. 5.69	Monthly variations in pH at Site 6 during the first and second year study periods (Nov.2008- Oct.2010).	134
Fig. 5.70	Monthly variations in turbidity at Site 6 during the first and second year study periods (Nov. 2008- Oct. 2010).	135
Fig. 5.71	Monthly variations in free carbon dioxide at Site 6 during the first and second year study periods (Nov. 2008- Oct. 2010).	135
Fig. 5.72	Monthly variations in dissolved oxygen at Site 6 during the first and second year study periods (Nov. 2008- Oct. 2010)	135
Fig. 5.73	Monthly variations in BOD at Site 6 during the first and second year study periods (Nov. 2008- Oct. 2010).	136
Fig. 5.74	Monthly variations in chloride at Site 6 during the first and second year study periods (Nov. 2008- Oct. 2010).	136
Fig. 5.75	Monthly variations in total alkalinity at Site 6 during the first and second year study periods (Nov. 2008- Oct. 2010).	136
Fig. 5.76	Monthly variations in total hardness at Site 6 during the first and second year study periods (Nov. 2008- Oct. 2010).	137
Fig. 5.77	Line graph of monthly variations in air temperature at Site 6 during the first and second year study periods (Nov. 2008 - Oct.2010).	137
Fig. 5.78	Line graph of monthly variations in water temperature at Site 6 during the first and second year study periods (Nov. 2008 - Oct.2010).	137
Fig. 5.79	Line graph of monthly variations in total alkalinity at Site 6 during the first and second year study periods (Nov. 2008 - Oct.2010).	138
Fig. 5.80	Line graph of monthly variations in total hardness at Site 6	138

during the first and second year study periods (Nov. 2008 - Oct.2010).

Fig. 5.81 a and b	Naturally EUS infected <i>Cirrhinus mrigala</i>	157
Fig. 5.82 a and b	Naturally EUS infected <i>Labeo rohita</i>	157
Fig. 5.83	Naturally EUS infected <i>Catla catla</i>	158
Fig. 5.84 a and b	Naturally EUS infected <i>Labeo bata</i>	158
Fig. 5.85 a and b	Naturally EUS infected <i>Channa striata</i>	158
Fig. 5.86 a and b	Naturally EUS infected <i>Puntius</i> sp.	159
Fig. 5.87 a and b	Naturally EUS infected <i>Mystus tengara</i>	159
Fig. 5.88 a and b	Naturally EUS infected <i>Clarias batrachus</i>	159
Fig. 5.89	Naturally infected <i>H. fossilis</i>	160
Fig. 5.90	Naturally infected <i>Lepidocephalichthys guntea</i>	160
Fig. 5.91	Naturally EUS affected fish <i>C. mrigala</i> , <i>C. striatus</i> , <i>L.bata</i> , <i>C. catla</i> and <i>M. tengara</i> (in group)	160
Fig. 5.92	Naturally EUS affected <i>C. mrigala</i> and <i>Labeo bata</i> (in group)	160
Fig. 5.93	Infected tilapia	161
Fig. 5.94	Infected tilapia in concrete pond	161
Fig. 5.95	Infected <i>Cyprinus carpio</i> at Site 3	161
Fig. 5.96	Infected <i>Cyprinus carpio</i>	161
Fig. 5.97	Dropsy in <i>Labeo rohita</i>	162
Fig. 5.98	Gas bubble filled in intestine of naturally dropsy infected tilapia	162

Fig. 5.99	Tilapia fin rot	162
Fig. 5.100	Body lesion with fin rot in <i>Cirrhinus mrigala</i>	162
Fig. 5.101	Section of the ulcer of naturally infected <i>Cirrhinus mrigala</i> showing granuloma formation in the muscle layer and myonecrosis (H-E., x 400).	168
Fig. 5.102	Section of the ulcer of naturally infected <i>Labeo rohita</i> showing the presence of fungal hyphae and accumulation of cells around it (GMS, x 400).	168
Fig. 5.103	Section of the liver of naturally infected <i>Cirrhinus mrigala</i> showing infiltration of blood capillaries and vacuolation of hepatocytes (H-E., x 400).	168
Fig. 5.104	Section of liver of naturally infected <i>Labeo rohita</i> (PAS x 400)	168
Fig. 5.105	Section of the kidney of naturally infected <i>Cirrhinus mrigala</i> showing tubular vacuolation and haemorrhages in certain haemopoietic region (H-E., x 400).	168
Fig. 5.106	Section of kidney of naturally infected <i>Labeo rohita</i> (H-E, x 400)	168
Fig. 5.107	Section of the ulcer of naturally infected <i>Labeo bata</i> showing the presence of fungal hyphae and degenerative changes (GMS, x 400).	169
Fig. 5.108	Section of ulcer of naturally infected <i>Catla catla</i> showing fungal (<i>Aphanomyces invadans</i>) hyphae (GMS, x400).	169
Fig. 5.109	Section of liver of naturally infected <i>Labeo bata</i> showing necrosis and vacuolation (GMS,x400).	169
Fig. 5.110	Section of liver of naturally infected <i>Catla catla</i> showing vacuolation (GMS,x400).	169

Fig. 5.111	Section of kidney of naturally infected <i>Labeo bata</i> showing necrotic changes, haemorrhages and tubular vaculation (H-E,x400)	169
Fig. 5.112	Section of kidney of naturally infected <i>Catla catla</i> showing necrotic changes, haemorrhages and tubular vaculation (H-E,x400)	169
Fig. 5.113	Section of the ulcer of naturally infected <i>Channa striata</i> showing the presence of fungal hyphae (GMS, x 400).	170
Fig. 5.114	Section of muscle of heavily infected <i>Channa striata</i> (GMS, x 400)	170
Fig. 5.115	Section of liver of <i>Channa striata</i> (H-E, x 400)	170
Fig. 5.116	Section of the kidney of naturally infected <i>Channa striata</i> showing tubular vacuolation and haemorrhages in certain haemopoietic region (H-E., x 400).	170
Fig. 5.117	Section of the ulcer of naturally infected <i>Puntius sp.</i> showing the presence of fungal hyphae (GMS, x 400).	170
Fig.5.118	Section of ulcer of naturally infected <i>Catla catla</i> (PAS,x 400)	170
Fig. 5.119	Section of the liver of naturally infected <i>Puntius sp.</i> showing infiltration of blood capillaries and vacuolation of hepatocytes (H-E., x 400).	171
Fig. 5.120	Section of the kidney of naturally infected <i>Puntius sp.</i> showing tubular vacuolation and haemorrhages in certain haemopoietic region (H-E., x 400).	171
Fig. 5.121	Section of muscle of <i>Clarias batrachus</i> Showing <i>Aphanomyces</i> filament (GMS, x 400).	171
Fig. 5.122	Section of the ulcer of naturally infected <i>Mystus tengara</i> showing the presence of fungal hyphae (GMS, x 400).	171

Fig. 5.123	Section of liver of <i>Clarias batrachus</i> (GMS,x 400)	171
Fig. 5.124	Section of the liver of naturally infected <i>Mystus tengara</i> showing infiltration of blood capillaries and vacuolation of hepatocytes (H-E., x 400).	171
Fig. 5.125	Section of the Kidney of <i>Clarias batrachus</i> (H-E, x 400)	172
Fig. 5.126	Section of the kidney of naturally infected <i>Mystus tengara</i> showing tubular vacuolation and haemorrhages in certain haemopoietic region (H-E., x 400).	172
Fig. 5.127	<i>Aeromonas caviae</i> , Cs ₂ (X400)	180
Fig. 5.128	<i>Micrococcus</i> sp., P ₄ (x400)	180
Fig. 5.129	<i>Pseudomonas</i> sp. Cc ₄ (X1000)	181
Fig. 5.130	Bacterial culture after 48 hrs of incubation	181
Fig. 5.131	Pure culture of bacteria in agar slant	181
Fig. 5.132	<i>Aeromonas hydrophila</i> Cm ₁ , (x400)	181
Fig. 5.133	<i>Aeromonas</i> sp. Confirmatory test	181
Fig. 5.134	Bacterial culture after 48 hrs of incubation	181
Fig. 5.135	<i>H. fossilis</i> showing manifestation of ulcer after 24 hrs of intramuscular injection with the culture of <i>A. hydrophila</i> , Cm ₁ .	182
Fig. 5.136	<i>H. fossilis</i> showing manifestation of ulcer after 48 hrs of intramuscular injection with <i>A. hydrophila</i> , Cc ₄	183
Fig. 5.137	<i>H. fossilis</i> showing manifestation of ulcer after 96 hrs of intramuscular injection with <i>A. hydrophila</i> , P ₂ .	183
Fig. 5.138	Zoosporangia of <i>Aphanomyces</i> sp. isolated from naturally infected <i>Cirrhinus mrigala</i> (A1) (GMS, x400)	184

Fig. 5.139	Zoosporangia of <i>Aphanomyces</i> sp. isolated from naturally infected <i>Catla catla</i> (A2) (Cotton blue x400)	184
Fig 5.140	Zoosporangia of <i>Aphanomyces</i> sp. isolated from naturally infected <i>Labeo bata</i> (A3) (Cotton blue x400)	185
Fig. 5.141	Zoosporangia of <i>Aphanomyces</i> sp. isolated from naturally infected <i>Puntius</i> sp. (A4) (GMS, x400)	185
Fig. 5.142	<i>H. fossilis</i> showing manifestation of ulcer after 48 hrs of intramuscular injection with <i>Aphanomyces</i> sp. zoospores.	185
Fig. 5.143	<i>H. fossilis</i> showing manifestation of ulcer after 72 hrs of intramuscular injection with <i>Aphanomyces</i> sp. zoospores.	185
Fig. 5.144	Section of ulcer of experimentally infected <i>H. fossilis</i> with <i>Aphanomyces</i> sp.(GMS,x 400)	187
Fig. 5.145	Section of liver of experimentally infected <i>H. fossilis</i> (H-E,x 400)	187
Fig. 5.146	Section of kidney of experimentally infected <i>H. fossilis</i> (H-E, x 400)	187
Fig. 5.147	Section of normal muscle of <i>H. fossilis</i> (control)	187
Fig. 5.148	Section of normal liver of <i>H. fossilis</i> (control)	187
Fig. 5.149	Section of normal kidney of <i>H. fossilis</i> (control)	187
