

LIST OF SCHEMES

CHAPTERS	SCHEMES	PAGE NO.
Chapter IV	Scheme 1: Optimized 3D structure of the [BMPy][LS]	116
Chapter V	Scheme 1. Synthesis of 1-Butyl-3-methylimidazolium dodecyl sulfate (BMIMDS)	132
	Scheme 2. Synthesis 1-butyl-1-methylpyrrolidinium dodecyl sulfate (BMPDS)	133
Chapter VI	Scheme 1. Molecular structure of DMPI, β -CyD & HP β -CyD respectively	157
	Scheme 2. Synthesis of DMPI	158
Chapter VII	Scheme 1. Molecular structure of Trigonelline hydrochloride & schematic presentation of α & β -CyD	188
	Scheme 2. Probable mode of inclusion, bucket shape structure represents the cyclodextrin molecules (both α & β).	189
	Scheme 3. This scheme showing the stereo chemical appearance of the protons of the cyclodextrin molecule	200
Chapter VIII	Scheme 1. $3H^+$ Cit^{3-} form of the citric acid in aqueous uric acid solutions.	251
	Scheme 2. Plausible sites of interactions between solute-solute (citric acid-citric acid), cosolute-cosolute (uric acid-uric acid) and solute-cosolute molecules (citric acid-uric acid)	
	Scheme 3. Deposition of uric acid in joints in absence of citric acid (top) and in presence of citric acid (bottom)	

Chapter IX	Scheme 1. Molecular (a) Three dimensional and (b) Two dimensional structure of amino acid cysteine.	
	Scheme 2. Structure of cyclodextrin molecules.	263
	Scheme 3. Truncated conical structure of α and β -cyclodextrin.	
	Scheme 4 Plausible Schematic representation of mechanism for the formation of (1: 1) inclusion complex of cysteine with both α and β -cyclodextrin.	264
