

PREFACE

At the outset, I would like an attempt to express my deepest gratitude and endless thanks to my research supervisor, Dr Subhas Chandra Roy, Department of Botany, University of North Bengal for his supervision, encouragement and continuous support for my research. I would also like to express my deep sense of gratitude to my second supervisor, Dr Dhani Raj Chhetri, Department of Botany, School of Life Sciences, Sikkim University for his conceptualization, overall guidance and support regarding the entire work. His drive for scientific excellence has constantly pushed me during my research and it was a great pleasure for me to have gotten a chance of working with him.

I owe debts of gratitude to my respected teachers Dr P.C. Lama, Dr B. C. Sharma and Dr D. Lama for their encouragement, help and sound advices and all the members of the P.G Department of Botany, Darjeeling Government College for their cordial help and guidance which led towards the fulfillment of this work. I consider it a great privilege to have associated with some great professors in my field of research namely Prof. Jukta Adhikari, Prof A.K Mukherjee and Prof K.K Tamang. I appreciate the help rendered by them. I too offer my heartfelt thanks to Sharda Chhetri who have passed onto me a wonderful humanitarian lineage.

I convey my thanks to Dr Dinesh Agarwal, Scientist Incharge, BSI, Eastern Regional Circle, Gangtok, Sikkim for identifying my research samples.

My special thanks go to my friends with whom I have shared my research experiences which was a joy of enlightenment for me. I am fortunate to have friends like Rasika Gurung, Salina Rai, Sulaxana Baraily, Deewa Basnett, Dr Sujata Kalikotay, Dr Sabina Pradhan, Deepa Tamang, Dr Ranju Tamang, Basundhara Tamang, Raksha Raj Karki and Abhijit Chhetri who always opened their heart and hand to me in time of need and constantly motivated me with their extraordinary brilliance and analytical perceptions.

I am also deeply indebted to the affection and support extended to me by my in-laws. The warmest of thanks goes to my husband Amrit Subba for his understanding, patience and consistent support throughout my research. He showed me the meaning of “pains and gains” during the crucial times of completion of this thesis. I am blessed with a son “Li Hang Ejam Subba,” without whose everlasting love this thesis would never have been completed.

Finally, I take this opportunity to extend my deep appreciation to my family Apa, Ama, Jojo and Nana who supported me in various ways, believed in me and inspired me in all the tribulations of life. They never relented in wishing me well and their constant blessing has helped me to complete this thesis. I feel obliged to say ‘thank you all’ one more time.
