

ACKNOWLEDGEMENT

First and foremost, I would like to thank God, the almighty, for giving me the strength and encouragement during all the challenging moments in completing this dissertation. I would like to thank my supervisor, Professor Mahendra Nath Roy for giving me the opportunity to work within a great team, and for all his encouragement and tutorage. The trust, support and 'the freedom to create' that he has provided throughout the work is very much appreciated. Without his loving care, dependable guidance, and precious supervision, it would have been impossible for me to bring the present contour to this thesis. I am also thankful for the excellent example he has provided as a successful researcher and professor.

Profound gratitude goes to Dr. Pinaki Bandopadhyay for his valuable suggestions and motivation during tough times in Ph.D. pursuit.

I would like to acknowledge Prof. Pranab Ghosh, Honorable Head, Department of Chemistry, NBU for his continuous encouragement throughout my research period.

I also express my gratitude to the other Honourable faculty members, Department of Chemistry, University of North Bengal for their priceless assistance during the course of my research. I am grateful to the University authority for providing laboratory facilities, especially University Scientific Instrumentation Centre,N.B.U (USIC) for SEM analysis.

I am truly thankful that many people in my field who have offered both insightful advice and warm friendship, including my labmates Dr. Siti Barman, Dr. Biraj Kumar Barman, Niloy Roy, Samapika Ray, Biplab Rajbanshi and Pranish Bomzan . For their support throughout my Ph.D., I will never be able to fully convey my gratitude. I am immensely grateful to Dr. Siti Barman, Dr. Biraj Kumar Barman and Niloy Roy for helping me throughout the research work with good grace.

I would also not be in the position I am today without the help and support of all the academic staff from the Chemistry Department.

I am also thankful to the Departmental Special Assistance Scheme under the University Grants Commission, New Delhi (No. F 540 / 27 / DRS / 2007, SAP-1) and the 'ONE TIME GRANT' Ref No. F.4-10/2010(BSR) awarded to Prof. M. N. Roy, under Basic Scientific Research (BSR), UGC, New Delhi for financial and instrumental assistance in connection with my research works.

Never-ending thanks are also extended to my friends Tanmay Dutta, Amit Mandal, Prasun Choudhury and my roommate Manoswita Homray for their cordial help and genuine advice. I

acknowledge, admire, and return the love and support of my parents Farida Yasmin and Md. Saukat Ali, without whom I would be lost. My grandmom Geeta Sarkar and aunt Bishnupriya Sarkar have always been my emotional anchors through not only the vagaries of research period, but my entire life. Lastly, I dedicate this thesis to the memories of my Late grandfather whose blessings have always inspired me to be a better version of myself.
