

P R E F A C E

The present work is a sociological study in aspects of production system, relations of production and social implication of a power plant. The study was conducted Farakka Super Thermal Power Project located at Murshidabad District of West Bengal. The data presented in this thesis were collected between March, 1988 to July, 1991.

Dr. S.R. Mondal encouraged me since the initial stage and by his guidance, comments, criticism and continuous encouragement I have been able to complete this work. It is not possible to express my indebtedness to him. It may sound too formal yet I feel to record my deep gratitude to him. I cannot find words adequate to describe the magnitude of my indebtedness to Dr. A.K. Danda for his valuable suggestions, criticism and encouragement to complete this dissertation. I would like to express my gratitude to Dr. R.K. Bhadra and other teachers of the Department of Sociology & Social Anthropology. I would like to record my gratitude to my teacher Shri C.R. Nayak, Department of Computer Science & Application, North Bengal University.

I am grateful to the management of Farakka Super Thermal Power Project, particularly to Shri N.C. Das, Manager (P & A) and Shri P. Purkayastha, Deputy Manager (P & A) for their kind help

and co-operation during my field work. I wish to record my thanks to the employees of the project, people of Farakka and several Government Officials who extended their helping hands to me with several information and co-operation. My special thanks are to my respondents.

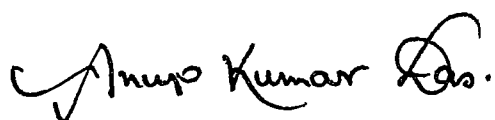

I am grateful to the authorities of I.C.S.S.R. for sanctioning study grants for this work.

My thanks are also due to my friends Shri A. Majumder and Shri M. Bhattacharya.

I find it impossible to express my thanks to my wife, Jayashri Das. Her continuous encouragement helped me to complete this work within proper time.
