

LIST OF APPENDIX

	Page No.
APPENDIX A	115-122
List of publications	115
Published paper	116-122
APPENDIX B	123-126
1 Soil survey and soil sampling sheet	123
2 Percent slope corresponding to degree slope	123-124
3 Soil textural class in relation with LCC (FAO)	124
4 Estimated runoff and yield per ha from catchment area- Strange's table	125
5 Isopleth map based on rainfall intensity per hour for different frequencies in India	126
APPENDIX C	127-130
2.2 Rainfall and Temperature of the study area	127
4.2 Area Slope Distribution of the Study area	127
4.6 The coverage of total area (Sq. Km.) under different major contours	128
4.7 Area (in %) of alluvial fans under different amplitude or Relative Relief zones.	128
5.3 Differences of forest cover and tea garden cover in between year 1959 and 2016	128
5.4 Alluvial fan segment wise coverage of landuse type of the study area	129
5.5 Diversified landuse occupancy on the different fan segments	129
6.1 Alluvial fan segment wise runoff, sand% and silt% differences	129
6.2 Physical and chemical properties of the collected soil samples	130
