

List of Figures

Figure	Title	Page #
2.1	Morphological features considered for bamboo taxonomy as per traditional method	14
3.1	Map of the study area	42
3.2	Datasheet used for collection of germplasm and recording field data	44
3.3	Schematic representation of the Tab c-f primer location	50
4.1	Newly emerged bamboo shoots of some species of bamboos encountered in North Bengal during growing season	67
4.2	Some of the bamboos encountered in North Bengal during growing season	68
4.3	A representative RAPD profile of 29 accessions of bamboo	72
4.4	Dendrogram constructed on the basis of the data from RAPD analysis illustrating the genetic relationships among the bamboos under study	73
4.5	Principal coordinate analysis of 29 species and varieties of bamboo based on RAPD analysis data	75
4.6	ISSR banding patterns of 29 accessions of bamboo	77
4.7	Dendrogram generated from the cluster analysis of ISSR markers of 29 bamboo accessions	78
4.8	Principal coordinate analysis of 29 species and varieties of bamboo based on ISSR analysis data	80
4.9	Dendrogram constructed on the basis of data obtained from the combined RAPD and ISSR analysis	82
4.10	Principal coordinate analysis of 29 accessions of bamboo based on combined RAPD and ISSR analysis data	83
4.11	Amplification of bamboo accessions with primer Tab c-f (TrnL-TrnF)	84
4.12	Restriction digestion products of TrnL-TrnF region of chloroplast genome	86
4.13	Dendrogram based on the restriction digestion products data of the TrnL-TrnF region of different bamboo genome	87
4.14	Principal coordinate analysis of 29 accessions of bamboo based on restriction digestion products of TrnL-TrnF region of chloroplast genome.	88
4.15	Snapshot of partial sequence of <i>Pleioblastus argenteostriatus</i> chloroplast genome (TrnL– F region) with Genbank accession number.	91
4.16	PCR amplification product of 29 accessions of bamboo for 16S rDNA region of the chloroplast genome	92
4.17	Banding pattern of 16S rDNA PCR product of different bamboo under study after restriction digestion with restriction enzyme <i>MspI</i>	92
4.18	Stages in development of <i>in vitro</i> cultured <i>Dendrocalamus strictus</i> .	98
4.19	DNA fingerprinting patterns of <i>in vitro</i> raised <i>D. strictus</i>	100
4.20	DPPH scavenging activity of bamboo leaf extracts	106
4.21	Ferric reducing power activity of bamboo leaf extracts	108
4.22	H ₂ O ₂ scavenging activity of bamboo leaf extracts	109
4.23	HPLC chromatogram	112
4.24	Effect of <i>B. balcooa</i> leaf extract supplementation on superoxide dismutase in liver of experimental rats	116
4.25	Effect of <i>B. balcooa</i> leaf extract supplementation on glutathione peroxidase in liver of experimental rats	116
4.26	Effect of <i>B. balcooa</i> leaf extract supplementation on lipid peroxidation in liver of experimental rats	117
4.27	Snapshot of home page of bambooinfoline	118
4.28	Snapshot of bamboopedia	119
4.29	Snapshot of bamboomining	119
4.30	Snapshot of bambooclick	120
