ACKNOWLEDGEMENTS

The experimental results obtained during the last seven years in the Expert System Laboratory, Department of Computer Science & Application, University of North Bengal, are included in the thesis. A part of results, obtained from other similar studies, have been published in reputed journals of Computer Sciences. The research work explored various Computing techniques which includes Data Mining, Rough Set Theory, Artificial Neural Network, and Machine Learning algorithms to design intelligent automated decision support systems. Indeed, without precious support of others it would not be possible to carry out the research work.

The success and final outcomes of the research work required a lot of assistance from many people. I take this opportunity to express my gratitude to all those people who made it possible to complete the research work successfully.

I express my sincere gratitude to my Principal Supervisor, Professor (Dr.) Ranjit Kumar Samanta, Professor (reduced), Department of Computer Science & Application, University of North Bengal, for his continuous guidance, supervision, patience, motivation, immense knowledge, and technical supports throughout the research work. He always guided me to steer in the right direction whenever it was needed. His relentless contribution of precious knowledge without any complaint motivated me to be a part of the research works in the field of Computer Science. His vast experiences helped me a lot to widen my research work from various perspectives.

I express my special thanks to Dr. Amitava Basu, MD, Pathologist, Jalpaiguri Sadar Hospital, Jalpaiguri, for sharing domain-oriented knowledge as an experience on the subjects.

Besides my advisor, I would like to express my sincere thanks to all faculty members and staffs of the Department of Computer Science & Application, University of North Bengal, for their continuous support, cooperation, and valuable assistance. Additionally, special thanks go to Dr. Sarad Sinha, Professor, for his continuous encouragements and supports from the beginning of the research work. It would not have been possible to conduct the research work without their valuable support.

I feel indebted to my heavenly parents who always inspired me unquesionably throughout the academic carrier of my life. I would prefer my homage by dedicating my thesis to my parents without whom I would never have enjoyed so many
opportunities. I would like to thank my elder sister, Soma Ghosh Ray and her husband Anup Ghosh Ray for their moral support towards completing the research work.

My special thanks go to my wife, Debasri Mitra, for her restless support, and encouragements throughout the research work. She has made untold number of sacrifices without any complain. This thesis would never have been completed without her understanding and inspiration.

And finally, last by no means least, I would like to express my heartfelt thanks to my daughter, Sucheta Mitra, for providing me with unfailing support, and continuous encouragement throughout the process of researching, and writing the thesis. Thank you for bearing with me.
